Pulses Daily Digest

04 August 2026

Key Updates

- **NAFED Invites Bids for Monthly Masur Dal Supply in Assam:** NAFED has invited bids for the monthly supply of 7,000 MT of imported medium-grade masur dal (unsplit) to ASWC district godowns across Assam from October 2026 to March 2027. The tender covers a total supply of 42,000 MT over the six-month period, while the technical bids are scheduled to be opened on 11 August 2026. The procurement is aimed at ensuring a steady availability of masur in the state through the public distribution system during the period. (Source: NAFED)
- **Gujarat Pulse Sowing Rises 8.68% on Strong Tur and Urad Acreage:** Gujarat's total kharif pulse sowing reached 322,740 hectares as of 3 August 2026, up 8.68% from 296,970 hectares a year ago. The increase was driven by tur, where sowing rose 17.35% to 215,823 hectares, and urad, which increased 32.48% to 78,074 hectares. In contrast, moong acreage declined 54.37% to 20,166 hectares, while moth increased 6.82% to 8,269 hectares. The higher acreage in tur and urad indicates improved pulse planting in Gujarat despite a sharp decline in moong sowing. (Source: Gujarat Agriculture Department)
- **Kharif Sowing Gap Narrows, but Moong and Tur Acreage Remain Below Last Year:** India's kharif sowing reached 89,420,000 hectares as of 31 July 2026, reducing the year-on-year acreage gap to 2.9% from 4.7% a week earlier. However, moong, tur (arhar) and maize continue to lag behind last year's sowing levels, while the outlook for the season will depend on rainfall distribution during August. Lower reservoir levels and the IMD's forecast of below-normal August rainfall remain key concerns for crop development and production. (Source: Business Standard)
- **Madhya Pradesh Extends Moong and Urad Procurement Timeline:** The Madhya Pradesh Government has extended the slot booking deadline to 10 August 2026 for summer moong and urad procurement under MSP, while procurement will continue until 20 August 2026. The revised policy also allows procurement of up to 60% of a farmer's moong production, up from the earlier limit, to improve MSP coverage. The extension is expected to benefit more farmers by providing additional time for registration and sale of produce at the support price. (Source: Dainik Bhaskar)
- **Karnataka Moong Output Falls Despite High Prices:** Moong production in Gadag, Karnataka has declined sharply as prolonged dry weather followed by disease outbreaks severely affected crop yields. Farmers in some areas reported harvesting less than 50 kg per acre, despite strong market prices, highlighting the impact of adverse weather on production. The lower output is expected to tighten the availability of premium-quality moong from Karnataka, a key producing state. (Source: Udayavani)
- **Heavy Rain Boosts Crop Prospects in Rajasthan's Moong-Growing Region:** Heavy rainfall in the Maujamabad area of Jaipur district has significantly improved soil moisture, bringing relief to farmers and benefiting standing kharif crops. The rains are expected to support the growth of moong, bajra, guar and other rain-fed crops, while reducing irrigation requirements and improving yield prospects. Farmers expressed optimism that continued timely rainfall during August would further strengthen crop conditions and support higher production in the region. (Source: Dainik Bhaskar)
- **Kenya's Green Gram Exports Surge on Strong Global Demand:** Kenya's green gram (moong) exports rose sharply to 6,233.20 tonnes during the first quarter of 2026, compared with 355.82 tonnes in the same period last year, generating Sh835.52 million in export earnings. Strong demand from Hong Kong, Thailand, South Sudan, the Democratic Republic of the Congo, the Philippines, Singapore, Pakistan, and Indonesia supported the growth, while India remained an export destination for smaller volumes. The export boom is boosting incomes for farmers in Kenya's arid regions and highlights growing global demand for plant-based protein and pulses. (Source: The Kenyan Diaspora Media)

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on July 31st, India's kharif pulses sowing surged to 9518 thousand hectares, compared from 10160 thousand hectares sowed during the corresponding period in last year.
