Pulses Daily Digest

12 May 2026

Key Updates

- **India Summer Pulse Sowing Gains Momentum Amid Shift Toward Climate-Resilient Crops:** India's 2026 summer sowing season is showing a strong shift toward pulses, with total pulse acreage rising to 24,97,000 hectares as farmers increasingly prefer short-duration and water-efficient crops. Summer rice acreage declined, while moong and urad recorded strong expansion across major producing states. Moong remained the leading summer pulse with area reaching 20,07,000 hectares, supported by sharp growth in Uttar Pradesh, Chhattisgarh, and Karnataka. Urad acreage also increased significantly to 4,60,000 hectares, led by higher sowing in Madhya Pradesh and Uttar Pradesh.
- **Rajasthan; Pulses Production Estimates Show Higher Chana Output, Lower Kharif Pulse Crop:** Rajasthan released its 2025-26 second advance estimates for rabi pulses and third advance estimates for kharif pulses as on May 5, 2026. Rabi pulse production is estimated at 25,12,056 tonnes, up 15.72% from 21,70,790 tonnes last year. Chana production is estimated sharply higher at 24,52,188 tonnes, compared to 21,01,558 tonnes last year, showing an increase of 19.53%. However, masoor production declined to 23,815 tonnes from 27,165 tonnes, while matar output also fell to 36,050 tonnes from 42,067 tonnes. Kharif pulse production is estimated lower at 19,64,095 tonnes, down 2.28% from 20,10,008 tonnes last year. Tur production declined sharply by 47.79% to 1,592 tonnes, while urad output dropped 27.46% to 91,822 tonnes. Moong production remained almost stable at 13,90,197 tonnes, slightly higher than last year's 13,83,621 tonnes.
- **Canada; Cold Spring Slows Alberta Pulse Seeding Progress:** Cold temperatures and delayed field conditions are slowing seeding progress across Alberta, impacting pulse crops including peas, lentils, and chickpeas. Durum and pulse crops are leading early planting activity in southern Alberta, but overall seeding pace remains below normal due to cool weather and wet soil conditions. Market reports indicate chickpeas are nearly one-third seeded in some southern regions, while pea and lentil planting has also started gradually. However, unseasonably cold temperatures, snow, and excess moisture in several areas have delayed field operations and slowed crop emergence. Analysts believe improved weather conditions during the second half of May will be crucial for accelerating pulse seeding across Alberta and supporting crop development ahead of the 2026-27 growing season.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on May 8th, India's summer pulses sowing surged to 2497 thousand hectares, compared from 2376 thousand hectares sowed during the corresponding period in last year.
