# Pulses Daily Digest

27 July 2026

## Key Updates

- **August–September Rainfall Key to India's 2026–27 Pulse Crop Outlook:** India's kharif pulse sowing has recovered significantly following improved monsoon rainfall, with the overall acreage gap narrowing in recent weeks. While urad sowing has already exceeded last year's level and the shortfall in tur acreage has reduced, industry experts believe the final size of the 2026–27 pulse crop will depend on rainfall during August and September. Adequate rainfall during this period will be crucial for crop development and soil moisture, particularly for the upcoming rabi season. Domestic pulse supplies remain comfortable and imports are available if required, but below-normal rainfall during the remaining monsoon period could affect both kharif yields and moisture availability for the 2027 rabi pulse crop. (Source: Businessline)
- **Government May Preserve Pulse Buffer Stocks Amid Weather Uncertainty:** The Central Government is considering retaining a larger share of its pulse buffer stocks amid concerns over possible El Niño-related weather risks and their impact on future production. The Department of Consumer Affairs has proposed relaxing stock disposal norms under the Price Support Scheme (PSS) and reviewing Open Market Sale (OMS) operations to maintain adequate inventories of tur, chana and urad. Although domestic pulse supplies remain comfortable, the move reflects a precautionary approach to safeguard availability and price stability if adverse weather affects the 2026–27 kharif and subsequent 2027 rabi crops. Trade sources said the government's buffer stock policy and monsoon performance during August–September will be key factors influencing the pulse market in the coming months. (Source: Rural Voice)
- **Fresh Monsoon Showers to Support Kharif Pulse Crops Across Central India:** Light to moderate rainfall, with isolated heavy spells, is expected over Chhattisgarh, Madhya Pradesh, Vidarbha and Coastal Karnataka during the next 24 hours, while light to moderate rain is also forecast across Northeast India, Telangana, Marathwada, Uttar Pradesh, parts of Delhi, Punjab, Haryana, East Rajasthan and South Gujarat. Isolated light showers are likely over West Rajasthan, Andhra Pradesh, Tamil Nadu and Interior Karnataka.
- **Gujarat Kharif Pulse Sowing Rises 13% on Higher Tur and Urad Acreage:** Gujarat's kharif pulse sowing reached 285,247 hectares as of 27 July 2026, up 12.92% from 252,616 hectares during the same period last year. The increase was driven by tur, where acreage rose 25.34% to 194,565 hectares, and urad, which increased 40.17% to 70,772 hectares. Moth sowing also edged up 7.74% to 7,791 hectares. However, moong acreage declined sharply by 69.16% to 11,908 hectares, while other pulses fell 80.06% to 210 hectares.
- **North India's Strong Urad Sowing Offsets Weak Progress in Maharashtra and Karnataka:** India's urad sowing reached 1,867,000 hectares as of 24 July 2026, up 8% from 1,727,000 hectares a year earlier, driven by improved monsoon rainfall across Uttar Pradesh, Madhya Pradesh and Rajasthan. Uttar Pradesh recorded the sharpest increase, with urad acreage rising 75% to 499,000 hectares, while Madhya Pradesh and Rajasthan registered gains of 13% and 16%, respectively. In contrast, delayed monsoon rainfall reduced sowing by 53% in Maharashtra and 24% in Karnataka. (Source: Gaon Connection)

## Pulses Sowing Update

**According to the Ministry of Agriculture & Farmers Welfare's latest release on July 25th, India's kharif pulses sowing surged to 8457 thousand hectares, compared from 9146 thousand hectares sowed during the corresponding period in last year.**

| Commodity Name | Current Year | Last Year | Change |
|---|---|---|---|
| Tur | 3117 | 3527 | -12% |
| Urad | 1867 | 1727 | 8% |
| Moong | 2689 | 2839 | -5% |
| Kulthi | 17 | 14.7 | 16% |
| Moth Bean | 508 | 768 | -34% |
| Other Pulses | 259 | 270 | -4% |
| Total Pulses | 8457 | 9146 | -8% |

## Pulses Arrivals Update
