Weather Forecast and Warning

- **West Bengal: Rainfall and Gusty Winds Expected :** Gangetic West Bengal is likely to receive widespread rainfall on October 28–30, followed by isolated to scattered showers from October 31 to November 3. Thunderstorms, lightning and gusty winds of 40–50 kmph, with gusts up to 60 kmph, are expected on October 28–29, with further thunderstorm activity possible on October 30. Sub-Himalayan West Bengal may experience widespread rainfall on October 29–30, with isolated heavy rainfall during the same period. Strong, squally winds of 40–50 kmph, gusting to 60 kmph, are likely along and off the West Bengal coast on October 28–29. Sea conditions are expected to remain rough to very rough, gradually improving thereafter. Fishermen are advised not to venture into the northwest Bay of Bengal and along or off the West Bengal coast on October 28–29.
- **Uttar Pradesh: Rainfall and Thunderstorm Activity Likely :** East Uttar Pradesh is likely to receive widespread rainfall on October 29–30, with isolated to scattered showers on October 28 and again from October 31 to November 2. West Uttar Pradesh may experience isolated to scattered rainfall from October 29–31. Thunderstorms, lightning and gusty winds of 40–50 kmph, with gusts up to 60 kmph, are expected across eastern and western parts of the state on October 29–30. East Uttar Pradesh may receive very heavy rainfall on October 29 and heavy rainfall on October 30. Rainfall activity may affect local travel and agricultural operations.
- **Punjab: Rain, Thunderstorms and Hailstorm Warning :** Punjab is likely to experience isolated to scattered rainfall from October 28–31. Thunderstorms, lightning and squally winds are expected, with thundersqualls reaching 50–60 kmph and gusts up to 70 kmph likely on October 29–30. Hailstorm activity is also possible during these two days, which may affect standing crops and harvesting operations. Farmers should monitor local weather warnings and take precautions while handling harvested produce.
- **Andhra Pradesh: Cyclone Arnab Crosses Coast, Extremely Heavy Rainfall Recorded :** Very severe cyclonic storm Arnab crossed the Andhra Pradesh and Yanam coast between Bapatla and Visakhapatnam during the early hours of October 28, with sustained winds of 125–135 kmph and gusts reaching 150 kmph. The landfall process was completed by 8:00 a.m. The storm was centred near Narsapur and is expected to move north-northwestwards and gradually weaken into a cyclonic storm and subsequently a deep depression. Extremely heavy rainfall exceeding 21 cm was recorded in parts of Coastal Andhra Pradesh, including Garividi in Vizianagaram district, which received 26 cm. Widespread rainfall is expected on October 28–29, followed by isolated heavy rainfall on October 29 and November 1–3. Thunderstorms, lightning and extremely strong winds are likely, with gale-force winds gradually weakening through October 28–29. A storm surge of approximately 1 metre above the astronomical tide may inundate low-lying coastal areas, while sea conditions are expected to remain very high to high before gradually improving. Fishermen are advised not to venture into the west-central Bay of Bengal or along and off the Andhra Pradesh and Odisha coasts on October 28.
- **Gujarat: Rainfall Expected in Parts of the State :**Gujarat is likely to experience isolated to scattered rainfall in the Gujarat region from October 29–31. Saurashtra and Kutch may also receive isolated to scattered showers on October 30–31. Weather conditions should be monitored during this period, particularly in areas where rainfall may interrupt agricultural activities.
- **Maharashtra: Rainfall and Thunderstorms Forecast :**Konkan and Goa, along with Marathwada, are likely to receive isolated to scattered rainfall from October 28–30. Madhya Maharashtra may experience rainfall from October 28–31. Thunderstorms, lightning and gusty winds of 40–50 kmph, with gusts reaching 60 kmph, are likely in Madhya Maharashtra from October 28–30, while similar conditions are expected in Konkan and Goa on October 29. Vidarbha may receive widespread rainfall on October 28, followed by isolated to scattered showers from October 29 to November 1. Heavy rainfall is also possible in Vidarbha on October 28.
- **Telangana: Heavy Rainfall and Strong Winds Expected :** Telangana is likely to experience widespread rainfall on October 28, followed by isolated to scattered showers from October 29 to November 3. Isolated very heavy rainfall is expected on October 28. Thunderstorms and lightning, accompanied by gusty winds, are likely on October 29–30, while a thundersquall with winds of 50–60 kmph and gusts reaching 70 kmph is forecast on October 28. Strong winds are also expected in northeastern Telangana, including Khammam, Bhadradri Kothagudem, Mulugu and Mahabubabad, with wind speeds potentially reaching 60–70 kmph and gusts up to 80 kmph in the affected areas. Weather conditions may disrupt transport and agricultural activities.
- **Madhya Pradesh: Rainfall and Thunderstorm Activity Likely :** East Madhya Pradesh is likely to receive widespread rainfall on October 28–29, with isolated heavy rainfall expected on October 28. Isolated very heavy rainfall is also possible on October 29. West Madhya Pradesh may experience isolated to scattered showers from October 28 to November 3. Thunderstorms, lightning and gusty winds are likely across parts of the state, with stronger wind activity expected in East Madhya Pradesh on October 28–29 and in West Madhya Pradesh on October 28–30. Farmers should remain alert to changing weather conditions during harvesting and post-harvest operations.
- **Karnataka: Rainfall Forecast for Interior and Coastal Areas :** North Interior Karnataka and South Interior Karnataka are likely to experience isolated to scattered rainfall from October 31 to November 3. Coastal Karnataka may receive similar rainfall from November 1–3. South Interior Karnataka may also experience changing weather conditions as rainfall activity develops over the southern peninsula. Farmers should monitor local forecasts, particularly where harvesting or drying operations are underway.
- **Bihar: Rainfall, Thunderstorms and Gusty Winds Expected :** Bihar is likely to receive widespread rainfall from October 29–31, with isolated to scattered showers also possible on October 28 and from November 1–3. Thunderstorms, lightning and gusty winds of 40–50 kmph, with gusts reaching 60 kmph, are expected from October 28–31. Isolated heavy rainfall is likely on October 29–30. These conditions may affect agricultural activities, especially the harvesting, transportation and storage of crops.
