As a result, fresh-crop arrivals are unlikely to begin before the last week of January 2027, while bulk arrivals are expected to commence in February 2027. The delayed arrival of new-season supplies may affect market availability during the initial phase of the harvesting season.
- **Bediya Red Chilli Market Sees 50% Good-Quality Arrivals; Rainfall Raises Moisture Concerns:** The market recorded estimated arrivals of 13,000–14,000 bags, with around 50% of the incoming produce classified as good quality. Recent rainfall has increased moisture levels in some consignments, affecting the condition of produce arriving at the market. Trade sources expect the arrival of higher-quality red chilli to increase over the coming days.
