Market Update

- **Coriander Prices in Gondal market showed upward trend and lower Arrivals till 24th Oct and Lower Dec NCDEX Futures:** Coriander prices at the Gondal market showed upward trend on 23rd Oct from 16th Oct. The Badami, and Eagle Plus variety were quoted at 1,57,000, and 1,64,000 INR/tonne, both variety up by 3,000 and 4,000 INR respectively. On the National Commodity and Derivatives Exchange, coriander contracts for Dec delivery down by Rs 194, or 1.12 per cent, to Rs 17,106 per quintal with an open interest of 5,850 lots. In last week (till 24th Oct), cumulative arrivals during the current market year (April to March) reached 1,58,099 tonnes, representing a 30.6% down compared to the same period last year. Meanwhile, the total stocks position at Gondal and Kota market are currently reported at 7,310 tonnes, but Unencumbered Valid Stock reported at 5,610 tonnes.
- **Market Outlook Remains Bullish as Prices Rise 3% Week-on-Week:** The market closed at ₹167,812 per tonne, up 3% week-on-week. Prices are trading above the trend reversal point of ₹166,381 per tonne, indicating a bullish near-term outlook. Immediate resistance is placed at ₹169,484 per tonne, followed by ₹171,155 per tonne. On the downside, immediate support is seen at ₹164,710 per tonne, followed by stronger support at ₹161,607 per tonne. The near-term outlook remains bullish as long as prices sustain above the trend reversal point of ₹166,381 per tonne, while a sustained break below this level could weaken bullish momentum.
- **Coriander Supply Expected to Remain Tight Until New Crop Arrivals:** Coriander supplies are expected to remain constrained until the arrival of the next crop in 2027, keeping market attention focused on rabi sowing progress during the 2026–27 season across Rajasthan, Madhya Pradesh and Gujarat. Lower acreage in the previous season, along with post-monsoon soil moisture conditions, is likely to influence farmers' sowing decisions. Early acreage estimates and planting trends will be key indicators for assessing future production prospects and the potential supply situation in the coriander market.
- **Coriander Acreage May Increase on Attractive Prices:** Coriander acreage is expected to increase, supported by attractive market prices and low carry-over stocks. Improved price realisations may encourage farmers to expand cultivation despite broader weather-related uncertainty across spice-producing regions. However, higher acreage may not necessarily translate into increased production if rainfall distribution and soil-moisture conditions remain unfavourable. Crop development and yield performance will be important in determining future availability and price direction.

Price Influencing Factor (Coriander)

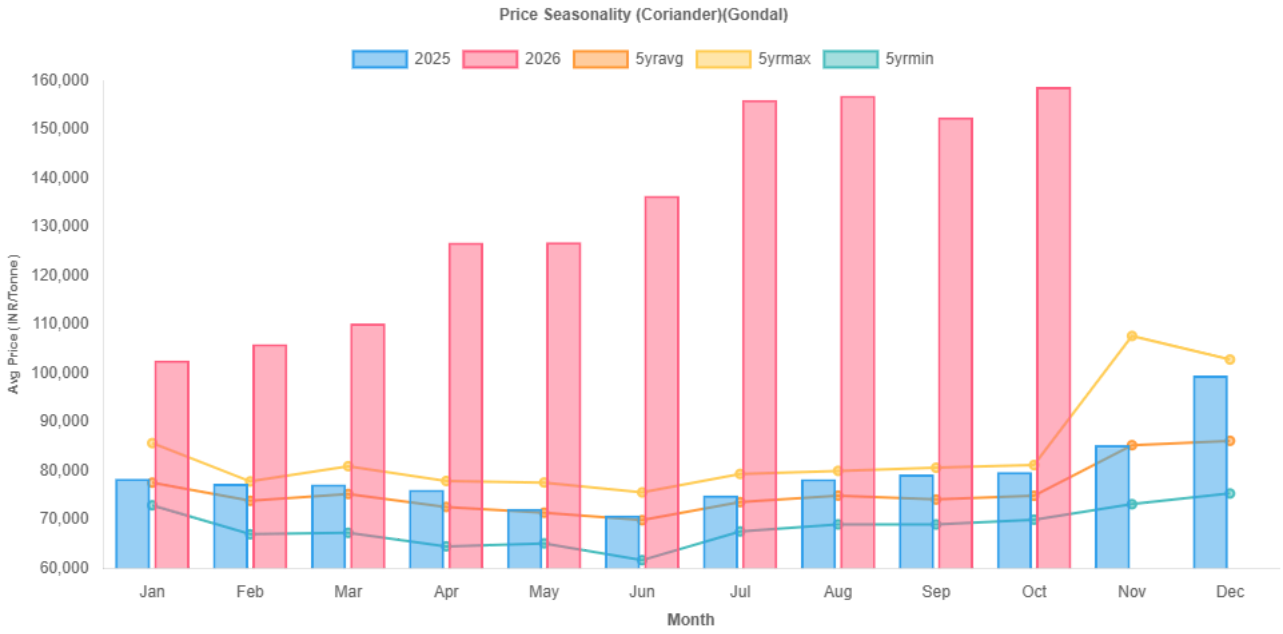

S.No.	Factors	Current Status	Expected Impact on Prices
1	Area('000.ha)	Lower (607.8 vs 609.9) (Rabi 2026 vs 2025)	Bullish
2	Yield (tonnes/Ha.)	Lower(1.4 vs 1.3) (Rabi 2026 vs 2025)	Bullish
3	Production ('000 Tonnes)	Lower (607.8 vs 844.1) (Rabi 2026 vs 2025)	Bullish
4	Arrivals (Tonnes)	Lower (1,58,099 Vs 2,27,780)	Bullish
5	Export (Tonnes)	Lower (3,664 vs 4,465) (Aug 2026 vs Aug 2025)	Bearish
