Domestic News

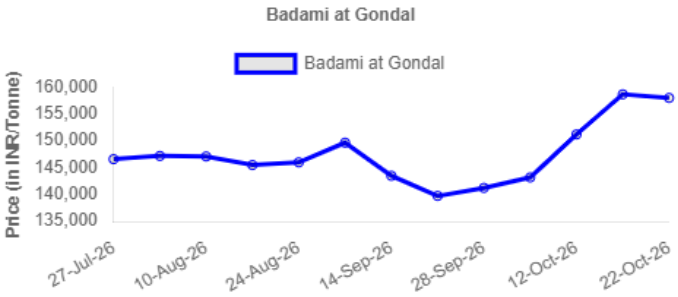

- **Coriander prices showed downward trend in the Gondal market as lower arrivals till 20th Oct, whereas Dec NCDEX futures witnessed upward:** Coriander prices at the Gondal market showed downward trend on 22nd Oct. The Badami and Eagle Plus variety are quoted at 1,58,000, and 1,65,000 INR/tonne, varieties down by 2,000 INR each. On the National Commodity and Derivatives Exchange, coriander contract for Dec delivery inclined by Rs 120, or 0.70 per cent, to Rs 17,320 per quintal with an open interest of 3,860 lots. In last week (till 20th Oct), cumulative arrivals during the current market year (April to March) reached 1,57,258 tonnes, representing a 30.7% decline compared to the same period last year. Meanwhile, Total stocks position at the Gondal and Kota markets currently stand at 7,371 tonnes, of Unencumbered Valid Stock, Pledged Valid Stock, and Quantity in Process, whereas Unencumbered Valid Stock accounts for 5794 tonnes.
- **Coriander Acreage May Increase on Attractive Prices:** Coriander acreage is expected to increase, supported by attractive market prices and low carry-over stocks. Improved price realisations may encourage farmers to expand cultivation despite broader weather-related uncertainty across spice-producing regions. However, higher acreage may not necessarily translate into increased production if rainfall distribution and soil-moisture conditions remain unfavourable. Crop development and yield performance will be important in determining future availability and price direction.
