- **Coriander Supply Expected to Remain Tight Until New Crop Arrivals:** Coriander supplies are expected to remain constrained until the arrival of the next crop in 2027, keeping market attention focused on rabi sowing progress during the 2026–27 season across Rajasthan, Madhya Pradesh and Gujarat. Lower acreage in the previous season, along with post-monsoon soil moisture conditions, is likely to influence farmers' sowing decisions. Early acreage estimates and planting trends will be key indicators for assessing future production prospects and the potential supply situation in the coriander market.
