Market Update

- **Cumin Prices showed mixed trend in Unjha market while decline in Nov NCDEX Futures and higher Arrivals till 21st Oct:** Cumin prices at the Unjha market showed mixed trend on 23rd Oct. The FAQ and Machine Cleaned variety quoted at 2,50,000 and 2,73,000 INR/Tonne, Machine Cleaned variety down by 5,000 INR. On the National Commodity and Derivatives Exchange, cumin contracts for Nov delivery downward by Rs 85, or 0.32 per cent, to Rs 26,370 per quintal with an open interest of 3,219 lots. In last week (till 21st Oct), cumulative arrivals during the current market year (April to March) reached 3,77,014 tonnes, representing a 22.8% incline compared to the same period last year. NCDEX Total stocks position at the Unjha market currently stand at 3,939 tonnes, of Unencumbered Valid Stock, and Pledged Valid Stock, meanwhile Unencumbered Valid Stock accounts for 2,947 tonnes.
- **Cumin Prices Gain on Tight Supplies and Export Demand Prospects, While Global Competition Caps Upside:** Cumin prices gained, supported by tightening nearby supplies, declining arrivals and expectations of improved export demand during the lean season. Farmers are holding stocks in anticipation of better prices, while limited availability of premium-quality, export-grade cumin is providing additional support as arrivals at Unjha and major Rajasthan markets decline. However, further gains remain capped by farmer selling ahead of the upcoming cropping season, rising NCDEX warehouse stocks and cautious procurement by spice processors. Geopolitical tensions in the Middle East continue to disrupt logistics and weigh on traditional export demand, while renewed interest from European and North American buyers offers selective support. Meanwhile, expectations of higher production in Turkey and Syria are pressuring Indian export premiums and limiting the upside.
