Domestic News

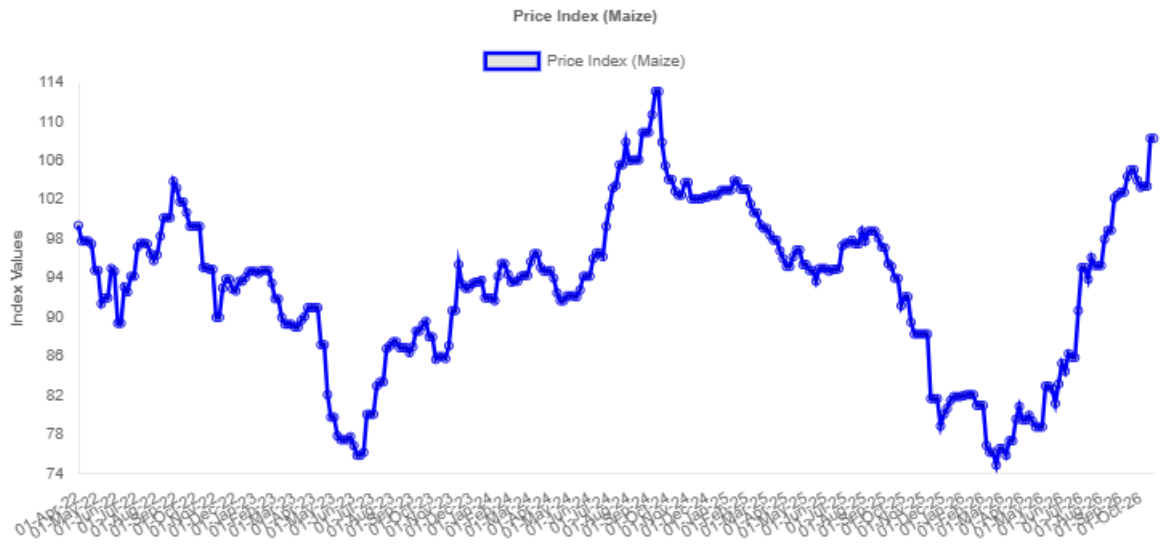

- **Maize prices remained upward trend in most markets throughout the day. The price of Gulabbagh market is quoted at 27850 INR/Tonne, up by 850 INR.**
- **Madhya Pradesh Leads Maize Arrivals from 1–21 October 2026:** India's maize arrivals totalled approximately 1,080.9 thousand metric tonnes during 1–21 October 2026. Madhya Pradesh led with 547.8 thousand tonnes, followed by Karnataka at 239.6 thousand tonnes and Rajasthan at 122.7 thousand tonnes. Uttar Pradesh and Maharashtra recorded 66.3 thousand tonnes and 56.5 thousand tonnes, respectively. The top three states accounted for around 84% of total arrivals, highlighting the concentration of maize supplies in key producing regions.
- **Water Shortage and Rising Feed Costs Pressure Pune's Poultry Market:** Water shortages and rising production costs are forcing poultry farms in Pune to scale down operations, potentially tightening chicken and egg supplies in local markets. Higher feed costs, particularly for maize, are squeezing farmers' margins, while reduced production could support poultry product prices. The situation highlights the impact of water scarcity and rising feed expenses on poultry market supply and profitability.
- **Namakkal Egg Procurement Prices Rise to ₹5.70 per Egg:** Egg procurement prices in Namakkal increased to ₹5.70 per egg on 21 October 2026, following a 10-paise rise as demand recovered after the Tamil month of Purattasi. Prices have increased by 20 paise over two days, reversing the prolonged period of subdued prices during September. However, rising poultry feed and production costs continue to pressure farmers' margins, with production costs estimated at around ₹6 per egg. Improved seasonal demand and higher operating costs are expected to keep the market firm in the near term.

International News

- **CBOT: Corn Dec 2026 is quoted at 460.2 c/bu , down by 4 cents.**
- **Zimbabwe Increases South African Maize Imports Amid El Niño Drought Concerns:** Zimbabwe imported 17.18 thousand tonnes of maize from South Africa during the week ended 9 October 2026, accounting for 49.8% of South Africa's total maize exports of 34.47 thousand tonnes. The shipment included 15.12 thousand tonnes of white maize and 2.06 thousand tonnes of yellow maize. Since May 2026, Zimbabwe's maize imports from South Africa have reached 153.05 thousand tonnes as the government strengthens strategic grain reserves amid concerns over a potential El Niño-induced drought. South African maize has an indicative import-parity price of US$391/tonne, compared with US$364/tonne for locally traded maize in Zimbabwe.
- **Brazil May Resume U.S. Ethanol Imports in January 2027:** Brazil could resume U.S. ethanol imports through Suape port in January 2027 as lower U.S. prices and higher domestic prices improve import economics during the sugarcane off-season. Despite an 18% import tariff, U.S. ethanol may remain competitive in Northeast Brazil. Meanwhile, Brazil's ethanol exports declined 17% year-on-year to 1.03 billion litres in 2026 to date. Renewed imports could increase competition for domestic producers and influence regional ethanol prices.
