Domestic News

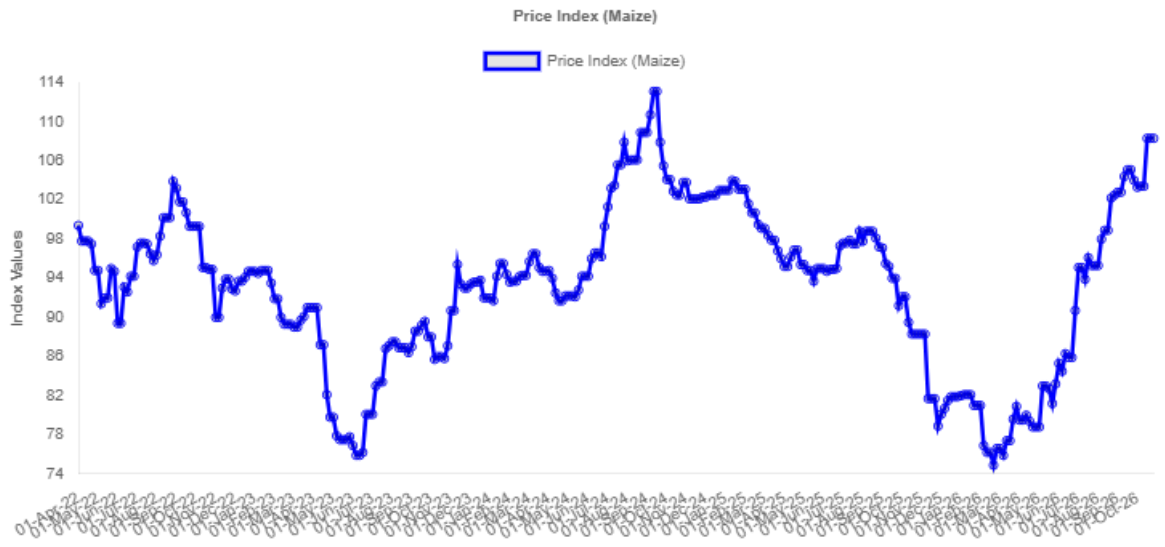

- **Maize prices remained upward trend in most markets throughout the day. The price of Gulabbagh market is quoted at 27900 INR/Tonne, up by 50 INR.**
- **India's Maize Exports Decline 25% YoY in August 2026; Cumulative Exports Remain Higher:** India exported 35 thousand tonnes of maize in August 2026, down from 46.6 thousand tonnes during the same month last year. Bangladesh remained the largest export destination, accounting for 26.6 thousand tonnes, followed by Bhutan at 3.2 thousand tonnes, Nepal at 1.6 thousand tonnes, Sri Lanka at 1.5 thousand tonnes and Oman at 0.7 thousand tonnes. Despite the decline in monthly exports, cumulative maize exports during the 2025-26 marketing year (up to August 2026) increased significantly to 1,903.3 thousand tonnes, compared with 570.4 thousand tonnes during the corresponding period of the previous year.
- **According to Livestock Sector Estimates, Drought May Reduce India's Kharif Maize Output by 16.8%:** According to livestock sector estimates, India's maize production during the 2026 kharif season is projected at 23.2 million tonnes, down 16.8% from the previous year. Maize acreage is estimated to decline by 9.0% to 8.9 million hectares. Drought conditions in Maharashtra and Karnataka are expected to weigh on production, with Maharashtra's maize output projected to fall by 24.2% to 2.3 million tonnes and Karnataka's by 33.4% to 3.4 million tonnes. The projected production decline could tighten domestic maize availability and intensify competition from the poultry feed industry, potentially putting upward pressure on maize procurement costs and market prices. The final impact will depend on harvest progress and actual market arrivals.
- **India's Rabi Maize Sowing Begins at 7.4 Thousand Hectares, Up 54.2% YoY:** As of 23 October 2026, according to the Ministry of Agriculture & Farmers Welfare, India's rabi maize sowing area stood at 7.4 thousand hectares, up 54.2% from 4.8 thousand hectares during the corresponding period last year. At the beginning of the rabi sowing season, Arunachal Pradesh reported 2.9 thousand hectares, followed by Tamil Nadu and Uttar Pradesh at 2.0 thousand hectares each, while Assam recorded 0.5 thousand hectares.

International News

- **CBOT: Corn Dec 2026 is quoted at 456 c/bu , down by 4.2 cents.**
- **Mexico's Corn Imports Rise 5.8% to 19.5 Million Tonnes in January–September 2026:** Mexico imported 19.5 million tonnes of corn during January–September 2026, up 5.8% year-on-year, with import expenditure reaching $4.36 billion. Yellow and cracked corn imports increased by 7.4% to 18.9 million tonnes, with the United States accounting for 99.8% of shipments. In contrast, white corn imports declined by 27.8% to 593.1 thousand tonnes. Corn accounted for 52.2% of Mexico's total imports of grains, oilseeds and their processed products, highlighting its significant role in the country's import demand. The continued growth in corn imports reflects Mexico's reliance on foreign supplies to meet domestic demand.
- **Moldova's Corn Exports Reach 318.3 Thousand Tonnes in January–September 2026, Exceeding 2025 Total:** Moldova exported 318.3 thousand tonnes of corn during January–September 2026, exceeding its full-year exports of 221.3 thousand tonnes in 2025 and 305.8 thousand tonnes in 2024. The increase was largely driven by the delayed 2025 harvest, which shifted a significant share of export shipments into 2026. In the third quarter, corn exports rose 28% year-on-year to 28.2 thousand tonnes, although shipments declined from 21.5 thousand tonnes in July to 3.4 thousand tonnes in August and 3.3 thousand tonnes in September, indicating the gradual depletion of old-crop stocks. The average export price increased by around 8% to 4.33 Moldovan lei/kg during July–September. Lebanon was the largest destination, purchasing 12.5 thousand tonnes, followed by Ukraine with 4.2 thousand tonnes, mainly for re-export. Further export activity will depend on the progress of the 2026 harvest, as prolonged rainfall has delayed fieldwork and could shift a significant share of new-crop corn exports to the first half of 2027.
