Maize Daily Digest

27 October 2026

Executive Summary

- **Maize prices remained upward trend in most markets throughout the day. The price of Gulabbagh market is quoted at 28000 INR/Tonne, up by 100 INR.**
- **Drought Damage in Hassan May Tighten Local Maize Supply.**
- **Industry Seeks Higher Maize-Based Ethanol Price Amid Rising Feedstock Costs.**
- **Unseasonal Rains Damage Maize Harvest in Karnataka.**
- **CBOT: Corn Dec 2026 is quoted at 455 c/bu , down by 1 cents.**
- **Philippines Raises Corn Import Quota to 500,000 Tonnes to Control Feed Costs.**
- **US Corn Harvest Reaches 60%, Remains Behind Five-Year Average.**

Maize Daily Digest

27 October 2026

Domestic News

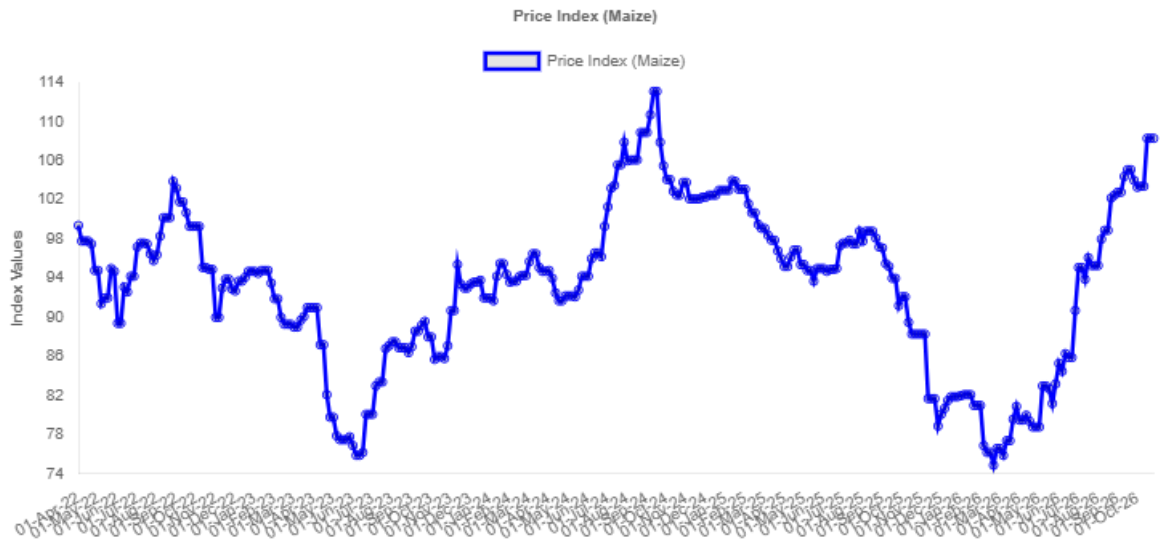

- **Maize prices remained upward trend in most markets throughout the day. The price of Gulabbagh market is quoted at 28000 INR/Tonne, up by 100 INR.**
- **Drought Damage in Hassan May Tighten Local Maize Supply:** Severe drought conditions in Hassan district, Karnataka, have damaged around 64.1% of the sown maize area, potentially reducing local maize availability and market arrivals. Maize was cultivated across 183.6 thousand hectares against a target of 286.2 thousand hectares, while 102.6 thousand hectares remained unsown due to inadequate rainfall. Extensive crop damage, with many fields producing only fodder instead of grain, may limit marketable maize supplies and affect procurement from the district. The reduced output could tighten local availability and support maize prices, depending on arrivals from other producing regions and overall market demand.
- **Industry Seeks Higher Maize-Based Ethanol Price Amid Rising Feedstock Costs:** The distillers' industry has urged the Centre to increase the procurement price of maize-based ethanol to ₹75 per litre from ₹68.86 per litre, citing rising maize prices and higher operational costs. Maize prices have increased to around ₹27/kg from ₹17–18/kg a year ago, putting pressure on distillers' margins. The industry has also called for a predictable long-term ethanol pricing policy and higher blending targets beyond E20 to support grain-based distilleries. A higher procurement price could improve the viability of maize-based ethanol production and sustain demand for maize from the ethanol industry, although the impact on maize demand will depend on procurement volumes and future policy decisions.
- **Unseasonal Rains Damage Maize Harvest in Karnataka:** Unseasonal rains in Kushalnagar taluk, Karnataka, have disrupted maize harvesting and transportation, causing losses for farmers. Continuous rainfall has left harvested maize in the fields, while moisture has caused some maize cobs to sprout, affecting crop quality. Poor road conditions have also delayed the movement of maize to markets. The damage and delays may reduce the availability of good-quality maize and affect local market arrivals.

International News

- **CBOT: Corn Dec 2026 is quoted at 455 c/bu , down by 1 cents.**
- **Philippines Raises Corn Import Quota to 500,000 Tonnes to Control Feed Costs:** The Philippines has increased its corn import quota under reduced tariff rates from 220,000 tonnes to 500,000 tonnes to address domestic supply shortages and control rising feed prices. The additional imports are expected to support the livestock, poultry and feed industries amid concerns over domestic production and the potential impact of El Niño on corn yields. The move could increase import demand and competition for global corn supplies while helping ease feed costs in the Philippines.
- **US Corn Harvest Reaches 60%, Remains Behind Five-Year Average:** According to the USDA Crop Progress Report released on October 26, US corn harvesting reached 60% as of October 25, compared with the five-year average of 66%. Around 56% of the remaining corn crop was rated good to excellent, while 18% was rated poor to very poor. Harvest progress improved from 44% in the previous week but remained behind the average pace. The slower harvest may delay the movement of new-crop corn into the market, with further price implications depending on harvest progress and overall supply conditions.
