Key Updates

- **India Post-Monsoon Rainfall Remains 58% Below Normal Through 19 October:** The India Meteorological Department (IMD) reported cumulative post-monsoon rainfall of 23.4 mm against the normal 55.1 mm from 1–19 October 2026, a deficit of 58%. Central India recorded a steep 92% shortfall, with rainfall at 3.7 mm against 45 mm normal, while East and Northeast India reported a 64% deficit. South Peninsula rainfall was 45% below normal at 53 mm against 97.1 mm. In contrast, Northwest India received 19.9 mm against 17.8 mm normal, registering a 12% surplus. The widespread rainfall deficit could affect soil moisture and influence Rabi sowing decisions, particularly in regions dependent on post-monsoon showers.
- **India Rabi Crops Face Production Risks as Rainfall Deficits and El Niño Concerns Grow:** Deficient rainfall, inadequate soil moisture and declining irrigation reserves are raising concerns over Rabi sowing and crop yields across major producing states. Rajasthan recorded a 55% rainfall deficit during 1–18 October, while Maharashtra received only 3% of its normal rainfall during the period, following a 52% deficit in September. Madhya Pradesh also recorded a 96% rainfall deficit in October so far. In contrast, excess October rainfall in Punjab and Haryana could support wheat sowing. Chana and mustard sowing in Rajasthan remains significantly below seasonal targets, while pulses and oilseeds face greater risks because 60–70% of their Rabi acreage is rain-fed. Lower sowing and potential yield losses could tighten supplies and support prices of Chana, Masoor, Mustard and Wheat, although winter rainfall and irrigation availability will be crucial. (Source: BusinessLine)
- **Bengal Gram rising CPI and WPI Indices Indicate Increasing Price Pressure:** Bengal Gram recorded an increase in both consumer and wholesale price indices in September 2026 compared with August. The CPI index rose to 101.0 from 99.8, an increase of 1.20%, while the WPI index increased to 128.1 from 125.1, up 2.40%. CPI inflation accelerated to 1.42% from 0.32%, while WPI inflation moved sharply from -0.2% to 4.3%. These increases indicate strengthening retail and wholesale price pressures for Bengal Gram.
- **Masoor mixed CPI and WPI Signals Indicate Moderating Retail Inflation:** Masoor recorded mixed price signals in September 2026 compared with August. The CPI index remained broadly unchanged at 104.5, with a reported marginal decline of 0.03%, while the WPI index increased by 0.41% to 97.9 from 97.5. CPI inflation eased to 3.12% from 4.03%, indicating a moderation in consumer-level inflation. In contrast, WPI inflation edged up to 3.4% from 3.3%, suggesting a slight increase in wholesale price pressure. Overall, easing CPI inflation may indicate reduced retail price pressure, while the marginal rise in WPI inflation points to firmer wholesale trends.
- **Moong CPI and WPI Indices Rise, Signalling Firmer Price Pressure:** Moong recorded an increase in both consumer and wholesale price indices in September 2026 compared with August. The CPI index rose by 0.17% to 99.4 from 99.2, while the WPI index increased by 0.99% to 112.2 from 111.1. CPI inflation edged up to 3.00% from 2.80%, while WPI inflation moved from -0.2% to 1.2%, indicating a shift from wholesale price deflation to inflation.

Pulses Sowing Update

Kharif pulses sowing increased 2.1% YoY to 12,239 thousand hectares. Tur acreage increased 3.2% to 4,793 thousand hectares and Moong sowing declined 3.4% to 3,373 thousand hectares, while Urad acreage increased 12.6% to 2,657 thousand hectares. The above sowing data is based on the Ministry of Agriculture & Farmers Welfare's latest Kharif Sowing Progress Report released on 2 October 2026.

Commodity	Current Sowing	Previous Year Sowing	YoY Change (%)	Normal Sowing	Deviation from Normal (%)
