Malawian Kwacha	1733.66	0.33
Tanzanian Shilling	2644.83	7.52

Key Updates

- **Centre Resists State Demand for Tur and Chana Buffer Stocks:** Several states, particularly in southern India, have sought supplies of Tur and Chana from the Centre, with some reportedly demanding more than 1,00,000 tonnes of Tur each. However, the Centre is maintaining its position that buffer stocks should be preserved for emergencies and used to intervene in domestic retail markets when necessary, rather than being allocated to state welfare schemes. According to the supplied market update dated 21 October 2026, the Consumer Affairs Ministry's pulse buffer stocks comprise 11,00,000 tonnes of Tur, 23,00,000 tonnes of Chana, 6,50,000 tonnes of Masoor, 3,70,000 tonnes of Moong and 70,000 tonnes of Urad. Meeting large state demands could reduce the stocks available for future market intervention.
- **Madhya Pradesh; Dhar Farmers Worry About Drought Impact on Wheat and Chana:** Farmers in Dhar district are concerned about the impact of drought conditions on the upcoming Rabi season, particularly wheat and Chana, as inadequate rainfall threatens soil moisture and irrigation availability. Limited water supplies could affect sowing decisions, crop establishment and production prospects. Wheat requires timely irrigation, while Chana sowing may also be affected by dry soil conditions. If rainfall remains insufficient and irrigation resources are constrained, farmers may reduce acreage or shift towards crops requiring less water.
- **Haryana; Subsidy on Certified Chana and Masoor Seeds for Rabi 2026–27:** The Agriculture and Farmers Welfare Department has introduced subsidies on certified Chana and Masoor seeds to promote pulses cultivation during the Rabi 2026–27 season. For varieties less than five years old, Chana seeds qualify for a 75% subsidy, capped at ₹6,000 per quintal, while Masoor seeds qualify for 100%, capped at ₹12,000 per quintal. For older varieties, the subsidy is 50% up to ₹4,000 per quintal for Chana and 75% up to ₹9,000 per quintal for Masoor. Eligible farmers can receive seeds for up to 2.5 acres after verification. (Source: Atal Hind)
- **Canada Masoor Production Falls 27%, but Higher Carry-In Stocks Limit Supply Tightness:** Canada's lentil production is estimated to decline 26.6% to 24,67,000 tonnes in 2026–27, compared with 33,63,000 tonnes last season, as planted area falls 10.9% and average yields drop 17.6%. However, higher carry-in stocks and imports are expected to cushion the decline, with total supply projected at 38,25,000 tonnes, down just 3.7% year-on-year. Exports are forecast at 24,00,000 tonnes, while carry-out stocks are expected to remain substantial at 11,45,000 tonnes. Red lentil prices may face pressure from ample supplies in Canada and Australia, although demand from India and other South Asian markets could provide support. Green lentils may remain relatively firmer due to tighter production across several exporting countries. (Source: Mundus Agri)

Pulses Sowing Update

Kharif pulses sowing increased 2.1% YoY to 12,239 thousand hectares. Tur acreage increased 3.2% to 4,793 thousand hectares and Moong sowing declined 3.4% to 3,373 thousand hectares, while Urad acreage increased 12.6% to 2,657 thousand hectares. The above sowing data is based on the Ministry of Agriculture & Farmers Welfare's latest Kharif Sowing Progress Report released on 2 October 2026.

Commodity	Current Sowing	Previous Year Sowing	YoY Change (%)	Normal Sowing	Deviation from Normal (%)
Tur	4793	4643	3.2%	4432	8.1%
Urad	2657	2360	12.6%	2960	-10.2%
Moong	3373	3490	-3.4%	3548	-4.9%
