Key Updates

- **Drought Declared Across Five States, Raising Concerns for Rabi Sowing:** Drought conditions across five states are raising agricultural and economic concerns, with Maharashtra, Karnataka and Andhra Pradesh among the worst affected. In Maharashtra, the number of drought-declared talukas has increased from 265 to 305, covering around 85% of the state. Karnataka has declared 226 of its 240 talukas drought-affected, while Andhra Pradesh has identified 388 of 688 mandals across 21 districts, including 283 severely affected. Rajasthan has declared 80 tehsils across 14 districts drought-affected. Telangana is assessing 358 areas, with a final list expected by October 31, while drought declarations in Gujarat are expected after surveys in rainfall-deficient areas, particularly Saurashtra and Kutch. Limited soil moisture could affect Rabi sowing and crop prospects.
- **India Pulses Imports Rise 8.4% to 39.43 Lakh Tonnes During January–August 2026:** India's total pulses imports increased by 8.43% to 39.43 lakh tonnes during January–August 2026, compared with 36.37 lakh tonnes in the corresponding period last year, according to DGCI&S data. Masur imports surged 73.38% to 12.14 lakh tonnes, while Tur imports rose 44.24% to 6.25 lakh tonnes. Yellow peas imports increased 22.86% to 8.30 lakh tonnes. In contrast, Chana imports declined 44.43% to 6.55 lakh tonnes, while Urad imports fell 5.11% to 4.88 lakh tonnes. Imports of other pulses decreased 2.95% to 1.31 lakh tonnes. Higher Masur, Tur and yellow peas imports drove the overall increase in pulse imports during the period.
- **India Pulses Imports Surge 67.38% to 20.66 Lakh Tonnes During April–August 2026:** India's total pulses imports rose 67.38% to 20.66 lakh tonnes during April–August 2026, compared with 12.34 lakh tonnes in the corresponding period last year, according to DGCI&S data. Masur imports nearly tripled, surging 200.78% to 6.42 lakh tonnes, while yellow peas imports increased 113.99% to 6.25 lakh tonnes. Chana imports rose 160.76% to 84,046 tonnes, and Tur imports increased 10.49% to 3.58 lakh tonnes. In contrast, Urad imports declined 3.16% to 2.77 lakh tonnes, while other pulses fell 7.66% to 79,175 tonnes. Higher Masur and yellow peas imports accounted for a substantial share of the overall increase.
- **India Yellow Pea Imports Rise 23% to 8.30 Lakh Tonnes During January–August 2026:** India's yellow pea imports increased by 22.86% to 8.30 lakh tonnes during January–August 2026, compared with 6.75 lakh tonnes in the corresponding period last year, according to Department of Commerce data. Canada remained the largest supplier, accounting for approximately 5.94 lakh tonnes, while Russian imports reached 2.31 lakh tonnes. Imports from other countries totalled around 5,358 tonnes. Monthly arrivals peaked in April at 1.57 lakh tonnes and June at 1.70 lakh tonnes, supported by substantial Canadian shipments. However, Russian supplies dominated imports in July and August. Higher overall imports continue to ensure availability of yellow peas in the domestic pulses market.
- **India Chana Imports Fall 44% to 6.55 Lakh Tonnes During January–August 2026:** India's Chana imports declined 44.43% to 6.55 lakh tonnes during January–August 2026, compared with 11.78 lakh tonnes in the corresponding period last year, according to Department of Commerce data. Australia remained the dominant supplier, accounting for approximately 6.22 lakh tonnes, while Tanzania supplied around 29,533 tonnes. Smaller quantities arrived from Myanmar, the United Kingdom and other countries. Monthly imports were highest in January at 2.52 lakh tonnes and March at 1.92 lakh tonnes, before dropping sharply from April onward. The substantial decline in overall imports indicates lower overseas Chana inflows compared with the previous year.
- **India Rabi Pulses Sowing Falls 25.5% to 3.27 Lakh Hectares as of October 23:** Total Rabi pulses sowing for the 2026–27 season declined 25.51% to 3.27 lakh hectares as of October 23, compared with 4.39 lakh hectares during the corresponding period last year, according to the Department of Agriculture and Farmers Welfare. Chana sowing fell 41.38% to 2.21 lakh hectares from 3.77 lakh hectares, raising concerns over the crop's acreage. In contrast, Masur sowing increased to 0.27 lakh hectares from 0.06 lakh hectares, while Field Pea rose to 0.29 lakh hectares from 0.08 lakh hectares. Kulthi and Urad sowing declined 15% and 20%, respectively.

Pulses Sowing Update

Rabi pulses sowing declined 25.5% YoY to 327 thousand hectares. Bengal Gram acreage fell 41.4% to 221 thousand hectares and Moong sowing declined 100.0% to 0 thousand hectares, while Urad acreage declined 20.0% to 8 thousand hectares. The above sowing data is based on the Ministry of Agriculture & Farmers Welfare's latest Rabi Sowing Progress Report released on 23 October 2026.

Commodity	Current Sowing	Previous Year Sowing	YoY Change	Normal Sowing	Deviation from Normal
