- **Tamil Nadu Seeks Stockholding Limits on Pulses, Rice, Edible Oils and Onions:** The state government has sought the Centre's approval to impose stockholding limits on essential commodities to curb hoarding, black marketing and rising retail prices. The proposal includes limits of 200 tonnes for wholesalers and 5 tonnes for retailers for Tur and Urad dal. In September 2026, Tur dal prices in Tamil Nadu averaged ₹134.23/kg, compared with the national average of ₹124.41/kg. The state has cited global factors and crop failures linked to El Niño as potential drivers of inflation. Separate limits have also been proposed for rice, edible oils and onions. The restrictions are proposed measures and are not currently in force. (Source: The Indian Express)
- **India's Pulse Production Faces Import Dependence, Water Stress and Affordability Challenges:** India's protein supply remains vulnerable to imported agricultural inputs, shrinking pulse cultivation and limited affordability of nutritious food, according to a new Protein Sovereignty Index report. India ranked 17th among 43 countries and regions, scoring 62.1 out of 100. The country imported a record 7.34 million tonnes of pulses in 2024–25, equivalent to around one-fifth of domestic supply, while pulse cultivation area declined from 30.6 million hectares in 2021–22 to 26.9 million hectares in 2024–25. The report also highlighted dependence on imported fertilisers, groundwater pressure and affordability concerns, with an estimated 520.1 million Indians unable to afford a healthy diet in 2025. Expanding sustainable domestic pulse production remains a key challenge. (Source: Down To Earth)
