Pulses Daily Digest

28 October 2026

Executive Summary

- **Pulses market showed a mixed trend, with Tur (Akola) down by ₹1,000 at ₹1,03,000/tonne, Urad (Mumbai) down by ₹500 at ₹93,500/tonne, and Yellow Pea (Kanpur) up by ₹500 at ₹48,500/tonne. Masur (Kanpur) remained unchanged at ₹66,000/tonne, while Chana (Delhi) was quoted at ₹75,250/tonne and Moong (Jaipur) at ₹82,000/tonne, with no daily change reported for either.**
- **India Pulses; NCCF Sales Continue Across Chana, Urad, Tur, Moong and Masoor.**
- **India's Higher Tur Imports Pressure Pea Prices, While Weather Risks Support Outlook.**
- **El Niño Threatens to Push Up Food Prices, Raising Concerns Over Pulses Supply.**
- **Canada Pulse Crop Quality Remains Strong as Exporters Focus on China and India.**
- **Canada and UAE Sign Trade Agreement, Opening New Markets for Canadian Pulses.**

Key Updates

- **India Pulses; NCCF Sales Continue Across Chana, Urad, Tur, Moong and Masoor:** NCCF's Price Support Scheme (PSS) sales confirmations during October indicate continued disposal of government pulse stocks at varying prices across warehouses. On October 20, Chana was sold at ₹7,800 per quintal in Hubli, while Tur was sold at ₹9,722 in two Hyderabad warehouses. On October 22, Chana sales were recorded at ₹7,301 in Bapatla, and Urad at ₹6,411 in Dailwara. On October 24, Chana prices reached ₹7,619 in Dharwad, while Urad sold at ₹6,451 in Khiriya Mishra. Masoor was sold at ₹5,513 in Kanpur on October 15, while Moong sales were also reported in Rajasthan. These transactions provide an indication of government-stock selling prices across regional markets.
- **India's Higher Tur Imports Pressure Pea Prices, While Weather Risks Support Outlook:** Higher tur imports and subdued dal mill demand are limiting near-term price strength in the pulses market, keeping pea prices under pressure. India imported approximately 6,25,000 tonnes of tur during January–August 2026, up around 44% from 4,34,000 tonnes a year earlier, with Mozambique, Myanmar, Tanzania and Sudan among the major suppliers. Comfortable imported stocks and cautious mill buying have weighed on domestic tur prices. However, below-normal rainfall in Maharashtra, Karnataka and Gujarat has raised concerns over kharif crop yields and quality, with fresh domestic arrivals expected mainly from December. In the short term, prices may remain soft to sideways, while potential crop losses could sustain import demand and support international pea prices into early 2027. (Source: CMB News)
- **El Niño Threatens to Push Up Food Prices, Raising Concerns Over Pulses Supply:** El Niño-related dry conditions, reduced rainfall and prolonged heat are raising concerns over food inflation, with rice, pulses, sugar and vegetables already reporting higher prices. In Telangana, fine rice varieties are reportedly selling at ₹70–80/kg, while tur dal prices have increased from ₹126 to ₹143/kg, urad dal from ₹120 to ₹128/kg, moong dal from ₹106 to ₹112/kg and chana dal from ₹80 to ₹90/kg. Lower rainfall could affect crop yields and market arrivals, tightening supplies and increasing cultivation costs. However, actual price movements will also depend on imports, existing stocks, inter-state supplies and demand. Monitoring crop conditions, releasing government stocks when necessary and preventing hoarding will be important to contain further price pressures. (Source: Metro India)
- **Canada Pulse Crop Quality Remains Strong as Exporters Focus on China and India:** Canadian pulse crops recorded generally good yields and quality in 2026 despite periods of excessive rainfall across the Prairies, according to Pulse Canada. While chickpeas faced some production challenges, overall crop performance remained close to expectations, supporting optimism for 2027. Canada is now focusing on export opportunities in major markets, particularly China and India. Approximately 10 lakh tonnes of Canadian yellow peas have been shipped to China since the suspension of its 100% retaliatory tariff in March 2026. Pulse Canada is seeking a long-term arrangement to maintain access to the Chinese market. Meanwhile, ongoing Canada–India free trade discussions could influence future pulse trade flows, with Canadian exporters aiming to meet India's import requirements. (Source: Manitoba Co-operator)
- **Canada and UAE Sign Trade Agreement, Opening New Markets for Canadian Pulses:** Canada and the United Arab Emirates (UAE) launched a new strategic partnership on October 27, 2026, alongside the signing of a Comprehensive Economic Partnership Agreement (CEPA) aimed at expanding bilateral trade and investment. Negotiations concluded in a record 47 days, and the agreement is expected to enter into force in 2027. Once fully implemented, it will reduce or eliminate tariffs on more than 99% of current Canadian exports to the UAE, creating new market opportunities for Canadian pulse and canola exporters. The two countries also agreed to deepen cooperation in energy, technology, education and defence. The partnership builds on the UAE's $70 billion investment commitment to Canada, while both sides aim to increase annual two-way trade from $3.4 billion to $7 billion over the next decade.
