International News

- **EU Rapeseed Imports Decline 10% as Ukrainian Supplies Remain Below Last Year:** European Union rapeseed imports reached 1.09 million tonnes by October 18 in the current marketing year, down 10% from the same period last season. Ukraine remained the leading supplier, shipping 486,000 tonnes compared with 733,000 tonnes a year earlier. Ukrainian shipments increased by 47,000 tonnes in the latest reporting week, indicating a gradual recovery but remaining insufficient to close the year-on-year gap. Germany was the largest EU importer of rapeseed from non-EU countries, with 331,000 tonnes, followed by Belgium at 287,000 tonnes and the Netherlands at 166,000 tonnes.
- **Russian Farmers Shift from Grains to Rapeseed Amid Rising Overproduction Risks:** Russian farmers are increasingly shifting from wheat and barley to rapeseed due to falling grain prices and declining profitability. Rapeseed cultivation area rose to 3.9 million hectares in 2026, up from 2.97 million hectares in 2025, while winter rapeseed plantings increased by 52% to 790,000 hectares. However, expanding production is raising concerns over oversupply, limited processing capacity and higher transportation costs, particularly in Siberia. Russia's dependence on China, which accounted for around 88% of its rapeseed oil exports in 2025, also poses risks following import restrictions on products from 23 Russian facilities in 2026. Experts warn that excessive acreage expansion could increase pest and disease risks and put downward pressure on prices, highlighting the need for greater processing capacity, diversified export markets and proper crop rotation.
