Domestic News

- **Domestic Rapeseed Prices Rise in Jaipur :** Rapeseed prices in Jaipur increased by ₹500 to ₹93,000 per tonne on October 27, 2026, while rapeseed meal and rapeseed oil prices remained unchanged at ₹28,400 and ₹1,81,000 per tonne, respectively. The rise in seed prices indicates a firm trend in the Jaipur market, although prices of the major processed products remained stable.
- **Rapeseed Prices Show Mixed Trends Across Domestic Markets :** Domestic rapeseed prices recorded mixed movements across major markets on October 27. Prices in Agra increased by ₹240 to ₹96,190 per tonne, while Delhi and Hapur recorded gains of ₹1,000 each, reaching ₹91,500 and ₹91,000 per tonne, respectively. Jaipur prices rose by ₹500 to ₹93,000 per tonne. In contrast, Alwar prices declined by ₹1,000 to ₹89,000 per tonne. The mixed trend indicates regional differences in rapeseed price movements, with gains in four markets offset by a decline in Alwar.
- **Rapeseed Meal Prices Remain Stable Across Major Markets :** Rapeseed meal prices remained unchanged across the reported domestic markets on October 27. FAQ-grade meal prices held steady at ₹28,300 per tonne in Alwar and ₹28,400 per tonne in Jaipur. In Sri Ganganagar, prices remained significantly higher at ₹37,150 per tonne, with no change from the previous session. The stability across all three markets indicates that rapeseed meal prices were largely unaffected by the daily increase in seed prices.
- **Domestic Rapeseed Oil Prices Remain Unchanged :** Rapeseed oil prices remained stable across all reported domestic markets on October 27. Kacchi Ghani oil prices held at ₹1,80,500 per tonne in Agra, ₹1,84,000 per tonne in Jaipur, ₹1,81,000 per tonne in Neewai and ₹1,82,000 per tonne in Sri Ganganagar. Mustard expeller oil prices in Delhi also remained unchanged at ₹1,80,000 per tonne. The absence of price movements across these markets indicates a stable trend in the domestic rapeseed oil segment.
- **Rapeseed Crushing Margins Turn More Negative :** Rapeseed crushing economics weakened on October 27 as higher seed prices increased processing costs while oil and meal realizations remained unchanged. The ex-Jaipur rapeseed price rose by ₹500 to ₹93,000 per tonne, pushing the total cost of crushing up by ₹491.30 to ₹92,622.50 per tonne. Total realization remained unchanged at ₹84,862 per tonne, supported by stable oil realization of ₹66,970 and meal realization of ₹17,892 per tonne. Consequently, the net crushing loss widened by ₹491.25 to ₹7,760.50 per tonne, compared with ₹7,269.25 per tonne on October 26. The widening loss indicates increased pressure on processing profitability as seed prices strengthened without a corresponding rise in oil and meal prices.

International News

- **ICE Canola Futures Close Higher Across All Contracts :** ICE canola futures closed higher across all tracked contracts in the October 26, 2026, session. The November 2026 contract settled at CAD 779.4 per tonne, up CAD 1.3 from October 23, while January 2027 futures rose by CAD 1.6 to CAD 793.6 per tonne. March 2027 futures increased by CAD 1.9 to CAD 805.7 per tonne, and May 2027 futures gained CAD 1.9 to CAD 813.8 per tonne. The July 2027 contract recorded the largest increase of CAD 2.3, closing at CAD 816.1 per tonne. Despite the daily gains, all five contracts remained lower on a weekly and monthly basis, indicating that the latest recovery has not reversed the broader price weakness.
- **Canola Futures Remain Under Weekly and Monthly Pressure :** Despite the gains in the latest session, ICE canola futures continued to show declines across all tracked contracts on a weekly and monthly basis. The November 2026 contract was down CAD 7.2 week-on-week and CAD 48.3 month-on-month. January 2027 futures declined by CAD 6.5 over the week and CAD 46.8 over the month, while March 2027 futures fell by CAD 5 and CAD 42.1, respectively. May 2027 futures recorded weekly and monthly declines of CAD 2.9 and CAD 36.6, while July 2027 futures were down CAD 1.7 week-on-week and CAD 31.1 month-on-month. The relatively smaller declines in the deferred contracts suggest that the recent weakness has been more pronounced in the nearby contracts, although prices remain below their earlier levels across the entire futures curve.
