Domestic News

- **At Jaipur, rapeseed prices were quoted at INR ₹92000 up by 500 INR, Rapeseed meal prices were quoted at INR ₹28,500, while Rapeseed oil were quoted at INR ₹1,79,000.**
- **Domestic Rapeseed-Mustard Production and MSP Support :** India's rapeseed-mustard production is estimated to increase by 3.5% to 11.94 million tonnes in the 2025–26 rabi season, compared with 11.52 million tonnes in the previous season, according to the Solvent Extractors' Association of India (SEA). Higher acreage, which increased to 9.391 million hectares from 9.215 million hectares, and improved average yields of 1,271 kg per hectare against 1,250 kg per hectare supported the expected growth. Rajasthan remains the largest producing state, with estimated output of 5.39 million tonnes, followed by Uttar Pradesh at 1.81 million tonnes and Haryana at 1.27 million tonnes. Meanwhile, the government has increased the MSP for rapeseed and mustard for the 2027–28 marketing season by ₹413 per quintal, from ₹6,200 to ₹6,613 per quintal. The revised MSP is expected to provide a 96% margin over the all-India weighted average cost of production, improve farmers' returns and encourage oilseed cultivation and crop diversification.
- **Rapeseed and Mustard Prices Strengthen Across Domestic Markets :** Rapeseed prices strengthened across major domestic markets on October 14 and 15, reflecting an overall upward trend. On October 15, Jaipur prices increased by ₹1,000 to ₹91,500 per tonne, while Alwar and Delhi rose by ₹1,000 to ₹89,000 and ₹91,000 per tonne, respectively. Agra prices increased by ₹480 to ₹95,240 per tonne, whereas Hapur and Kota remained unchanged at ₹89,000 per tonne, and Morena declined by ₹250 to ₹86,500 per tonne. On October 14, prices also advanced in Agra, Delhi, Alwar, Hapur and Jaipur, with Jaipur reaching ₹90,500 per tonne. Mustard oil prices in Delhi increased by around ₹50–100 per quintal in recent sessions, supported by tightening domestic supplies, slower seed arrivals, cautious selling by stockists and steady household and food-service demand. Higher raw-material costs have also prompted oil mills to manage crushing operations carefully, while relatively stable imported edible oil prices have limited the scope for a sharper rally.
- **Rapeseed Oil and Meal Market Trends :** Rapeseed oil prices recorded gains across major domestic markets on October 14 and 15. On October 15, Jaipur Kacchi Ghani oil prices increased by ₹3,000 to ₹1,83,000 per tonne, while Agra rose by ₹1,000 to ₹1,80,500 per tonne. Neewai and Sri Ganganagar also gained ₹1,000 each to reach ₹1,80,000 and ₹1,81,000 per tonne, respectively, while Kota remained unchanged at ₹1,80,000 per tonne. The Jaipur rapeseed oil benchmark was reported at ₹1,80,000 per tonne, up ₹3,000. On October 14, oil prices also increased in Agra, Kota, Sri Ganganagar, Jaipur and Neewai. Rapeseed meal prices showed mixed movements, with Jaipur FAQ-grade meal declining by ₹500 to ₹29,000 per tonne on October 14 before remaining stable at that level on October 15. In contrast, Sri Ganganagar meal prices rose from ₹36,200 to ₹36,500 per tonne over the same period.
- **Domestic Rapeseed Arrivals Decline Year-on-Year :** India's cumulative rapeseed arrivals declined 17.3% to 2.215 million tonnes from 2.677 million tonnes during the corresponding period last year, indicating lower overall market supplies. Rajasthan arrivals decreased by 3.7% to 1.106 million tonnes, while Haryana recorded a sharp 64.2% decline to 194,000 tonnes. Uttar Pradesh arrivals fell 39.4% to 194,000 tonnes. In contrast, Madhya Pradesh arrivals increased by 16.2% to 409,000 tonnes, Gujarat rose 18.1% to 333,000 tonnes, and West Bengal recorded a 13.6% increase to 25,000 tonnes. The overall decline reflects reduced arrivals across several major producing states. Meanwhile, the Indian rupee strengthened by 0.20 to ₹95.04 against the US dollar. The Brazilian real weakened to 5.03 and the Japanese yen to 158.45, while the Argentine peso, Ukrainian hryvnia and Canadian dollar strengthened to 1,513.28, 45.01 and 1.42, respectively. The Malaysian ringgit and Chinese yuan remained unchanged at 4.08 and 6.69.
- **Telangana Advises Farmers to Adopt Water-Efficient Rabi Crops :** The Telangana government has advised farmers to cultivate short-duration pulses and oilseeds requiring less water and investment during the upcoming rabi (yasangi) season due to the possibility of water shortages associated with the continuing effects of El Niño. Agriculture Minister Tummala Nageswara Rao urged farmers to select crops according to local irrigation availability and market demand. Agriculture and allied departments have been directed to coordinate efforts to help farmers assess local conditions and identify suitable alternative crops. Officials have also been instructed to prepare and implement irrigation plans under district collectors' supervision, taking reservoir water availability into account to protect standing crops. Agricultural scientists have been asked to develop groundnut varieties suited to farmers' needs and market requirements. Additionally, steps will be taken to provide subsidised sprinklers to farmers in the erstwhile Mahabubnagar district to improve irrigation efficiency.

International News

- **Canola (ICE) Nov 2026 closed at 778.1 CAD/Tonnes up by 1.2 CAD.**
- **ICE Canola Futures Continue to Decline :** ICE canola futures recorded broad-based declines across delivery contracts during October 13–15, 2026, reflecting continued weakness in the international market. On October 15, the November 2026 contract closed at CAD 801.5 per tonne, down CAD 10.3 from the previous session, while January 2027 futures fell CAD 11.5 to CAD 813.4 per tonne. March 2027 declined CAD 11.1 to CAD 823.2 per tonne, while May and July 2027 contracts settled at CAD 828.6 and CAD 828.1 per tonne, respectively. Compared with the previous week, prices declined by CAD 11.3–15.4 per tonne, while monthly losses ranged from CAD 24.4 to CAD 27.4 per tonne. Earlier sessions also recorded declines across contracts, with October 14 settlements falling slightly despite weekly gains of CAD 1.0–1.9 per tonne. The overall trend indicates sustained downward pressure on canola futures prices.
- **European Union Rapeseed Imports Decline Amid Supply Disruptions :** The European Union's rapeseed imports declined 14% year-on-year to 871,500 tonnes during the first quarter of the current season. Ukraine remained the largest supplier, but shipments fell to 336,000 tonnes from 599,900 tonnes during July–September 2025, mainly because of export logistics constraints and maritime transportation difficulties. Australia strengthened its position as the second-largest supplier, increasing shipments by 35% to 185,100 tonnes and accounting for 21% of total imports. Canada ranked third with 121,700 tonnes, compared with almost negligible shipments during the corresponding period in 2025. The changing trade pattern reflects Black Sea logistical disruptions, trade tensions with China and higher Australian freight rates. Canadian rapeseed continues to face restrictions in the European market because a substantial share of its production is genetically modified, directing much of its use towards the biofuel sector. Canada has updated regional production statistics required for greenhouse gas emissions calculations across the production chain, a development endorsed by the European Commission.
- **China's Rapeseed Imports May Limit Oil Price Gains :** China is expected to increase rapeseed imports during the fourth quarter of 2026, potentially putting downward pressure on domestic rapeseed oil prices. Current market conditions are supported by low inventories and limited import availability, but additional supplies could improve raw-material availability for processors and restrict further price increases. Rapeseed oil prices declined marginally by 0.19% from 10,664 yuan to 10,644 yuan per tonne between September 24 and 29, before recovering on September 30 amid limited immediate supplies and increased market activity. Pre-holiday buying and expectations of higher rapeseed oil consumption in biodiesel production also supported prices. However, the anticipated increase in imports could ease supply constraints and limit further appreciation.
- **Rapeseed Oil Market Faces Conflicting Supply Factor :** China's rapeseed oil market is expected to remain volatile in the near term as competing supply and demand factors influence prices. Low inventories and restricted import availability are providing support to prices for upcoming deliveries, while expectations of increased rapeseed imports during the fourth quarter could improve domestic availability and limit further gains. Pre-holiday demand and anticipated growth in biodiesel consumption have also contributed to market support. Consequently, rapeseed oil prices are expected to fluctuate within a relatively narrow range without establishing a sustained upward trend as the market adjusts to changing supply conditions.
- **Overall International Rapeseed and Canola Market Outlook :** International rapeseed and canola markets are experiencing contrasting supply dynamics. ICE canola futures have weakened across delivery contracts, with weekly and monthly comparisons indicating persistent downward pressure. Meanwhile, European Union rapeseed imports have declined due to reduced Ukrainian shipments and logistical challenges, increasing the importance of supplies from Australia and Canada. In China, low rapeseed oil inventories and limited immediate imports have supported prices, but expectations of higher fourth-quarter rapeseed imports could improve supply availability and restrict further gains. These developments highlight the influence of futures market weakness, international trade flows, transportation constraints and changing import availability on the broader rapeseed and canola market.

Wholesale Price Index(Rapeseed Meal)

According to the Ministry of Commerce & Industry, the annual rate of inflation for Rapeseed Oil Cake, based on the monthly Wholesale Price Index (WPI), declined to 36.1% in September 2026 from 41.6% in August 2026. The WPI for Rapeseed Oil Cake increased from 117.4 in August to 119.8 in September, indicating that the wholesale price index rose despite a moderation in annual inflation.

Wholesale Price Index(Rapeseed)

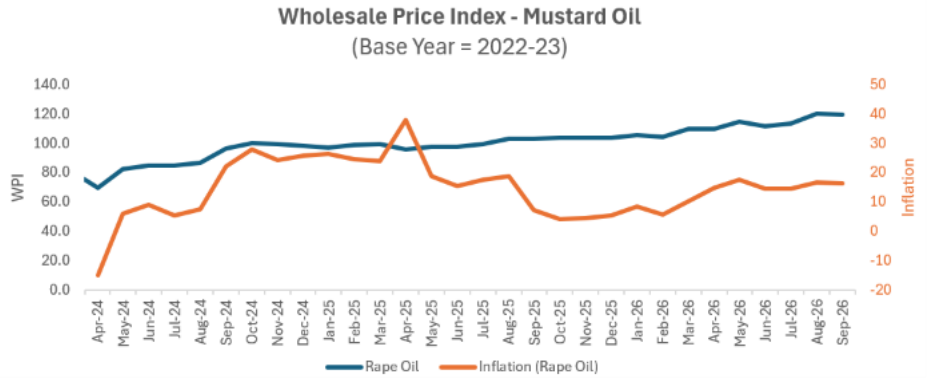

According to the Ministry of Commerce & Industry, the annual rate of inflation for Rapeseed, based on the monthly Wholesale Price Index (WPI), increased to 15.1% in September 2026 from 9.4% in August 2026. The WPI for Rapeseed rose from 118.2 in August to 124.6 in September, indicating an increase in wholesale prices alongside a rise in annual inflation.
