Price Influencing Factor

S.No.	Factors	Current Status	Expected Impact on Prices
1	Sowing Acreage ('000 ha)	Rabi rice sowing: 102 vs 213 thousand ha as of 23-Oct-26	Bullish
2	Crop Condition	Mixed/uneven: below-normal rainfall during crop maturation raises production concerns; unseasonal rain damaged paddy quality in Haryana.	Bullish
3	Total Production (Mln Tonnes)	Industry fears 2026-27 kharif rice output could fall at least 10 MMT from 123.9 MMT last year, with acreage down ~4% to 42.7 million ha; USDA Oct India production 147.0 MMT vs 154.0 MMT (-4.6%); Punjab non-basmati paddy seen above 22.0 MMT vs 18.0 MM	Bullish
4	Paddy-Common Arrivals('000 tonnes) M.Y	5,702 vs 6,546 thousand tonnes (-12.9% YoY) through 23-Oct-26 (Punjab -16.9%, Haryana -60.2%, UP +161.9%); KMS procurement 5,437 thousand tonnes (11.3% of 48,235 target) as of 25-Oct	Bullish
5	Paddy-Basmati Arrivals('000 tonnes) M.Y	1,340 vs 1,250 thousand tonnes (+7.2% YoY) through 23-Oct-26	Bearish
6	Import - Jul 26 Vs 25 ('000 tonnes)	2.3 vs 0.4 thousand tonnes in Aug-26 vs Aug-25 (+475%)	Bearish
7	Export - Jul 26 Vs 25 ('000 tonnes)	1,600 vs 1,628 thousand tonnes in Aug-26 vs Aug-25 (-1.7%)	Bearish
8	Current Price Trend	Firmer: Delhi Basmati ₹109,000/t (+₹3,000 WoW); Karnal 1121 Steam ₹101,000/t (+₹2,000); Nizamabad BPT Raw ₹74,000/t (+₹2,000); Karnal Sabarmati Steam ₹70,000/t (+₹3,000)	Bullish
9	Retail Prices	Firmer: West Bengal ₹52,240/t (+₹3,240 WoW), Delhi ₹47,000/t (+₹2,000), Karnataka ₹70,250/t (+₹1,410), Andhra Pradesh ₹60,500/t (+₹1,100), Tamil Nadu ₹66,080/t (+₹990); Haryana ₹43,000/t (-₹1,000)	Bullish
10	Wholesale Prices	Firmer: Karnataka ₹64,594/t (+₹1,725), Punjab ₹37,597/t (+₹1,357), Tamil Nadu ₹61,407/t (+₹1,089), Andhra Pradesh ₹55,668/t (+₹783), West Bengal ₹46,619/t (+₹566); Delhi flat at ₹40,000/t.	Bullish
11	WPI (July 26 Vs 25)	8.6% (provisional) in Sep-26 vs 7.0% in Aug-26	Bullish
12	Inflation (July 26 Vs 25)	Rice (Non-Basmati) WPI inflation 8.6% YoY (provisional) in Sep-26, up from 7.0% in Aug-26	Bullish
13	International Price Trend	Firmer: CBOT rough rice (Nov-26) $17.5/100 lb (+$0.2 WoW). FOB Thailand $475/t (+0.4%) and Vietnam $427/t (+0.7%)	Bullish
14	MSP (INR/Tonne)	Paddy MSP for KMS 2026-27: ₹24,410/t for Common and ₹24,610/t for Grade A (₹2,441 and ₹2,461/quintal respectively).	Bullish

S.No.	Factors	Current Status	Expected Impact on Prices
15	Processing (Milling) Margins	DORB mixed-to-firmer (24-Oct vs 19-Oct): Karnal ₹20,800/t (+₹800), Raichur ₹24,200/t (+₹400), Kolkata ₹21,250/t, Anand ₹24,700/t (-₹300); RB extraction (Punjab) ₹21,000/t flat WoW	Bullish
16	Substitute Crops	Kharif competing crops mostly firm: soybean Indore ₹72,312/t (+2.9% WoW, +26.6% MoM), cotton Rajkot +3.8% WoW (price shown at a different scale, 325,314), bajra ₹25,400/t (+1.4%), tur Akola ₹104,000/t (-1.9% WoW, +6.7% MoM).	Bullish
17	Central Pool Stocks (Mln Tonnes)	Rice and paddy stocks in the central pool 69.8 MMT in Sep-26 vs 53.8 MMT in Sep-25, above five- and ten-year averages.	Bearish
18	Rainfall Status	Post-monsoon rainfall 1-Oct to 23-Oct was 27.9 mm vs 63.2 mm normal, -56% LPA; Central India -92%, East & Northeast India -68%, South Peninsula -36%, Northwest India +2%	Bullish
19	Rainfall Outlook (Sep)	IMD sees heavy northeast-monsoon rain in Tamil Nadu through 26-Oct, with two low-pressure systems expected over the Bay of Bengal bringing more rain to southern/coastal districts including the Cauvery delta.	Bullish
20	Temperature Status & Outlook	WMO-cited outlook points to above-normal temperatures across parts of South Asia in Oct–Dec 2026 as El Niño strengthens, adding irrigation and crop-stress risk	Bullish
21	Currency (INR vs USD)	₹94.95/USD, +0.18 WoW.	Bearish
22	Substitute Crop Prices (Sowing Side)	Mixed: tur ₹104,000/t (+6.7% MoM, -1.9% WoW), soybean ₹72,312/t (+26.6% MoM, +2.9% WoW), bajra ₹25,400/t (+12.9% MoM), cotton -1.2% MoM (+3.8% WoW)	Bullish
23	Price Seasonality	Kota Basmati paddy Oct-26 average ₹43,650/t (through 26-Oct) vs ₹33,163/t in Oct-25 (+31.6% YoY); Sep-26 ₹47,988/t (Oct -9.0% MoM); 24.9% above the five-year October average (₹34,959/t) and 3.0% below the five-year maximum (₹45,000/t)	Bullish
24	Policy / Regulation	Paddy MSP KMS 2026-27 ₹24,410/t Common and ₹24,610/t Grade A; Haryana millers seek raising the permissible damaged-rice limit from 3.0% to 4.5%; Punjab cash credit limit ₹42,786.7 crore for 18.0 MMT procurement.	Bullish
25	Export Parity	Indian 5% broken parboiled $387–392/t (from $384–389) and white $389–394/t, highest in over a year; Thai 5% broken ~$480/t and Vietnam $440–450/t, keeping India price-competitive	Bullish
26	Geopolitical Condition	Gulf buying (Saudi Arabia, UAE, Iran) to replenish reserves amid Strait of Hormuz disruption lifted basmati paddy in Punjab/Haryana to ₹42–45/kg vs ₹28/kg in 2025.	Bullish
27	Global Production Outlook	IGC Oct production 536 MMT (unchanged; 547 MMT last year) USDA Oct milled production 533.1 MMT vs 533.9 MMT Sep and 545.7 MMT last year (-2.3%).	Bullish
28	Weather Outlook in Major Producing Countries	Mixed/unfavorable: India has rainfall-related production risks (-56% LPA post-monsoon); Philippines El Niño damage reached ₱8.57 billion by 21-Oct (rice 71,408 t, ₱2.95 billion); Indonesia output may fall 0.2%.	Bullish

S.No.	Factors	Current Status	Expected Impact on Prices
29	Global Weather Outlook	El Niño is strengthening and a strong to very strong event could persist into H1 2027 (Philippine weather bureau); India faces post-monsoon dryness, while the Philippines, Singapore (reserve rebuilding).	Bullish
30	OMSS (June 26 Vs 25)	2026 OMSS(D) allocation/offtake 4.47/4.47 MMT (100%); total allocation 41.04 MMT and offtake 20.82 MMT (51%) vs 2025 total 50.48/47.83 MMT (95%)	Bullish
31	Competing Crops (Demand Side)	Maize ₹25,750–30,973/t (Rabi Gulabbagh ₹27,850); soybean ₹72,312/t (+2.9% WoW); tur ₹104,000/t (-1.9%); competing crop prices are firm	Bullish
32	Feed Raw Material Prices	DORB: Raichur ₹24,200/t, Karnal ₹20,800/t, Kolkata ₹21,250/t. soya extract Indore ₹59,000/t (-₹2,000), soybean seed Indore ₹69,000/t (-₹1,800), rapeseed expeller ₹37,500/t flat, sunflower expeller ₹40,500/t (+₹500)	Bearish

Domestic News

- **Rice prices witnessed a mixed trend in most markets, while the weekly price in the Delhi (Basmati) market was quoted at ₹1,09,000 Per tonne.**
- **Indian Rice Export Prices Reach Over One-Year High Amid Stronger Rupee and Tight Supply:** Indian rice export prices rose to their highest levels in more than a year, supported by rupee appreciation and tight supplies. The 5% broken parboiled variety was quoted at USD 387–392/tonne, up from USD 384–389/tonne a week earlier, while 5% broken white rice was priced at USD 389–394/tonne. Below-normal rainfall during the crop maturation period is raising concerns over India's rice production, with industry estimates pointing to a possible annual decline. Meanwhile, Vietnam's 5% broken rice remained at USD 440–450/tonne and Thailand's at USD 480/tonne. Demand from the Philippines is supporting regional trade, while elevated rice prices in Bangladesh are adding to consumer cost pressures. (Source: Deccan Herald)
- **Punjab Expects Paddy Production to Exceed 22.0 MMT, Raising Procurement Concerns:** Punjab's non-basmati paddy production is projected to exceed 22.0 MMT in the 2026–27 Kharif season, compared with the Centre's approved procurement quota of 18.0 MMT. Crop-cutting experiments indicate average yields of 6.7 tonnes per hectare, up from 5.9 tonnes last season, across 3.3 million hectares of paddy cultivation. Around 2.6 million hectares are under non-basmati varieties eligible for government procurement. Existing rice stocks of approximately 15.0 MMT from previous seasons, along with an expected addition of 12.0 MMT from current procurement, are adding to storage pressures. Punjab has been sanctioned a cash credit limit of ₹42,786.7 crore to procure 18.0 MMT of paddy at the MSP of ₹2,441 per quintal, and may seek an increase if arrivals exceed the approved quota.
- **Heavy Rains in Tamil Nadu Flood Paddy Fields; More Rain Forecast Until October 26:** Tamil Nadu's northeast monsoon has brought heavy rainfall and flooding, with more downpours forecast by the IMD until October 26, 2026. In Madurai district, more than 140 acres of newly planted paddy fields were submerged, raising concerns over crop damage and rotting. Heavy rain has also flooded homes in Kanyakumari and disrupted transport in parts of Chennai. Reservoir storage has increased, with Chennai's six main drinking-water reservoirs reaching 37% of capacity. Two low-pressure systems are expected to develop over the Bay of Bengal, bringing further rainfall across southern and coastal districts, including the Cauvery delta region.
- **Basmati Paddy Prices in Punjab and Haryana Rise 53% to ₹42–45/kg Amid Strong Gulf Demand:** Basmati paddy prices in Punjab and Haryana have increased to ₹42–45 per kg, compared with ₹28 per kg in 2025, benefiting farmers as early varieties such as Pusa 1509 enter the market. The price rally is attributed mainly to strong international demand, particularly bulk purchases by Gulf countries such as Saudi Arabia, the UAE and Iran to replenish reserves amid geopolitical uncertainty and disruptions around the Strait of Hormuz. India exported a record 6.5 MMT of basmati rice in 2025, with more than half of its basmati exports going to West Asia. Unseasonal rain and hailstorms may have affected production slightly, but exporters indicate that increased demand, rather than a major supply shortfall, is the primary driver of higher prices. With varieties such as 1121 and Pusa 1718 expected to arrive in the coming weeks, farmers may see further opportunities; however, experts caution that basmati has no MSP and prices remain vulnerable to changes in global demand, making higher production risky if international prices weaken next year.
- **Indian Farmers Receive Record Premiums for Paddy as El Niño Threatens Rice Production:** Farmers growing premium paddy varieties in India are receiving ₹3,600–3,700 per quintal, around ₹1,100 above the central MSP for Grade A paddy of ₹2,461, as deficient monsoon rainfall affects production in parts of South India. Prices for BPT paddy have reached ₹3,600–4,500 per quintal in some Andhra Pradesh markets, while Karnataka prices have climbed above ₹3,000 and reached as high as ₹5,200. Reduced supplies of varieties such as Sona Masuri and Kolam are pushing up domestic prices and tightening export trading timelines, with some millers' quotations remaining valid for only six hours. Export prices have also increased, with parboiled rice (5% broken) quoted at $395/tonne and white rice (5% broken) above $380/tonne. India's 2026–27 kharif rice production is feared to fall by at least 10 MMT from last year's 123.9 MMT, while paddy acreage has declined by around 4% to 42.7 million hectares. However, government reserves remain substantial, with FCI holding 39.1 MMT of rice as of September 1, alongside paddy stocks capable of yielding another 30.8 MMT of rice. (Source: Business Line)
- **Haryana Rice Millers Seek Increase in Permissible Damaged Rice Limit to 4.5% Amid Rain Damage:** Rice millers in Yamunanagar, Haryana, have urged the state government to raise the permissible limit for damaged and discoloured rice from 3.0% to 4.5%, citing deteriorating paddy quality due to unseasonal and prolonged rainfall during the ongoing procurement season. Millers reported concerns over increased bold damage, pin-point damage and water-marked grains, which could raise losses during milling under existing quality norms. The Rice Millers Association said the current limit may not adequately account for the higher proportion of damaged grain and called for a review in consultation with the industry. The association also reported that the number of registered rice mills in the district had declined from 184 to 150 this year, warning that unresolved financial pressures could lead to further closures. Millers have sought timely government intervention to revise the standards and support paddy processing amid rain-related quality deterioration. (Source: Tribune)

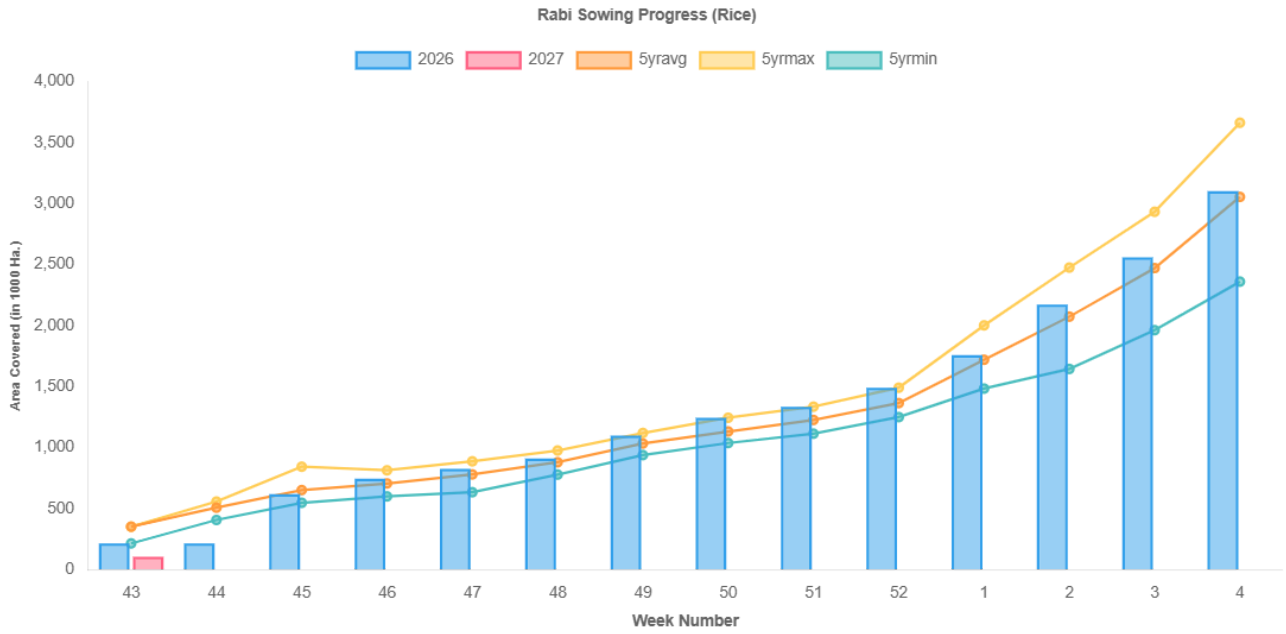

- **Haryana Paddy Procurement Faces Lifting Delays and Rain-Related Quality Losses Across Several Districts:** Paddy procurement operations in Haryana are facing storage congestion as slow lifting leaves purchased stocks exposed in grain markets. In Panipat, 7,541 tonnes of procured paddy remained unlifted as government agencies HAFED and HWC had lifted only 1,267 tonnes of the 8,809 tonnes they purchased, while total mandi arrivals reached 137,832 tonnes. In Jind's new grain market, only 2,743 quintals had been lifted against 15,901 quintals purchased, creating space constraints and increasing the risk of further rain damage. In Fazilka, Punjab, separate reports indicated that around 7,000 quintals of paddy were washed away or damaged following heavy rainfall on October 11, with farmers struggling to find buyers for discoloured stocks and awaiting damage assessments and compensation. Procurement progress varied across Haryana: Hisar reported 22,306 tonnes procured and ₹30.0 crore paid to farmers, while Kaithal recorded nearly 0.5 MMT of arrivals, with approximately 70% of procured paddy lifted by October 18. Continued arrivals, exposed stocks, and uneven lifting rates are raising concerns about market congestion, grain quality deterioration, and disruption to procurement unless agencies accelerate transportation and storage operations.

International News

- **Indonesia's Rice Production May Decline 0.2% in 2026 Despite Large Reserve Stocks:** Indonesia's rice production could decline by around 80,000 tonnes, or 0.2%, in 2026, following a strong increase in the previous year. Statistics Indonesia projected production for January–July 2026 to be 80,000 tonnes lower year-on-year. Despite the expected decline, the country's rice surplus from the previous year is expected to help maintain overall supply. Rice reserves in government warehouses stood at 5.17 MMT as of June 23, 2026, including domestically produced rice and carryover stocks. Concerns have also been raised over ageing and discoloured rice stocks, prompting calls for faster distribution and improved stock management.
- **Vietnam's Rice Exports to Singapore Rise 5.2% to 118,900 Tonnes in January–September 2026:** Vietnam's rice shipments to Singapore increased 5.2% year-on-year to 118,900 tonnes in the first nine months of 2026, raising its volume-based market share from 28.1% to 31.4%. Singapore's total rice imports declined 5.8% to 378,900 tonnes, while import value fell 11% to SGD 309.1 million. Vietnam's rice export value to Singapore decreased 9.2% to SGD 79.5 million, despite higher shipment volumes. Meanwhile, Vietnam's overall rice exports fell 6.1% to 6.4 MMT during January–September, with export earnings declining 10.9% to USD 3.1 billion. Further opportunities in Singapore could emerge in the fourth quarter as the country replenishes rice reserves amid El Niño-related concerns.
- **Philippines' El Niño Crop Losses Rise to ₱8.6 Billion, Affecting 220,307 Tonnes of Output:** El Niño-related agricultural damage in the Philippines increased to ₱8.57 billion as of October 21, 2026, affecting 288,058 farmers and 291,154 hectares of farmland. Total production losses reached 220,307 tonnes, with rice accounting for 71,408 tonnes. Rice damage reached ₱2.95 billion. The ongoing dry conditions have affected multiple regions across the country, while authorities are implementing support measures, including seed and fertiliser assistance, water pumps, and cloud-seeding operations. The weather bureau warned that a strong to very strong El Niño could persist into the first half of 2027.
- **Cambodia's Rice Exports Surpass 1.0 MMT, Setting a New Annual Record:** Cambodia exported 1.014 MMT of rice as of October 19, 2026, surpassing its previous annual record of approximately 940,000 tonnes set in 2025, with more than two months remaining in the year. During the first eight months of 2026, the country shipped 792,000 tonnes worth $464 million to 66 international markets through 61 companies. The European Union was the largest destination by value, importing 232,000 tonnes worth $175 million, followed by China and Hong Kong at 178,000 tonnes and five ASEAN countries at 315,000 tonnes. Export growth reflects improvements in production capacity, storage, financing, and market access, supported by a $200 million credit package to help rice mills purchase and store paddy. However, high production costs, limited affordable credit, and delayed harvesting remain challenges, while concerns over El Niño and potential water shortages could affect the 2027 dry-season crop.
- **Thailand Plans Rice Export Push After Shipments Fall 19.3% in January–September 2026:** Thailand exported 4.99 MMT of rice during January–September 2026, down 19.3% year on year, while export earnings declined 16.8% to $2.96 billion. Despite lower shipment volumes, the average export price of Thai 5% broken white rice rose to $482/tonne in September, up 28.9% from $374/tonne a year earlier. The Commerce Ministry plans to boost exports through direct engagement with importers in the Philippines, Japan and South Africa, faster government-to-government sales, international trade fairs and a rice conference. Higher purchases by the Philippines and Malaysia have partly offset weaker demand from Iraq, where Middle East tensions and elevated transport costs have disrupted shipments. Thailand also faces strong competition from India's large supplies and Pakistan's incoming harvest, alongside high domestic production costs and port labour shortages. Authorities may retain the 7.0 MMT rice export target for 2027, while reviewing geopolitical and El Niño risks before finalising the forecast. (Source: The Nation)
- **Pakistan's Rice Exports to Iran Face Disruption as Border Trade Suspension Raises Shipping Costs:** Pakistan's rice exporters have warned that the temporary suspension of land trade with Iran could delay shipments, increase logistics costs, and cause financial losses. The closure of the Taftan and Gabd-Rimdan border crossings has left thousands of containers and trucks stranded, disrupting a key route for rice exports. Iran imported around 354,000 tonnes of Pakistani rice worth $430.5 million in 2023, highlighting the importance of the market for Pakistan's exporters. Diverting shipments to Iran's Bandar Abbas port by sea is becoming more expensive due to elevated freight and maritime insurance costs amid disruptions in the Strait of Hormuz. Pakistan exported 5.8 MMT of rice worth $3.4 billion in FY2024–25, while exporters warned that the border disruption could cause substantial losses and affect domestic rice prices. The Rice Exporters Association of Pakistan has urged both governments to resolve the issue and restore trade flows.

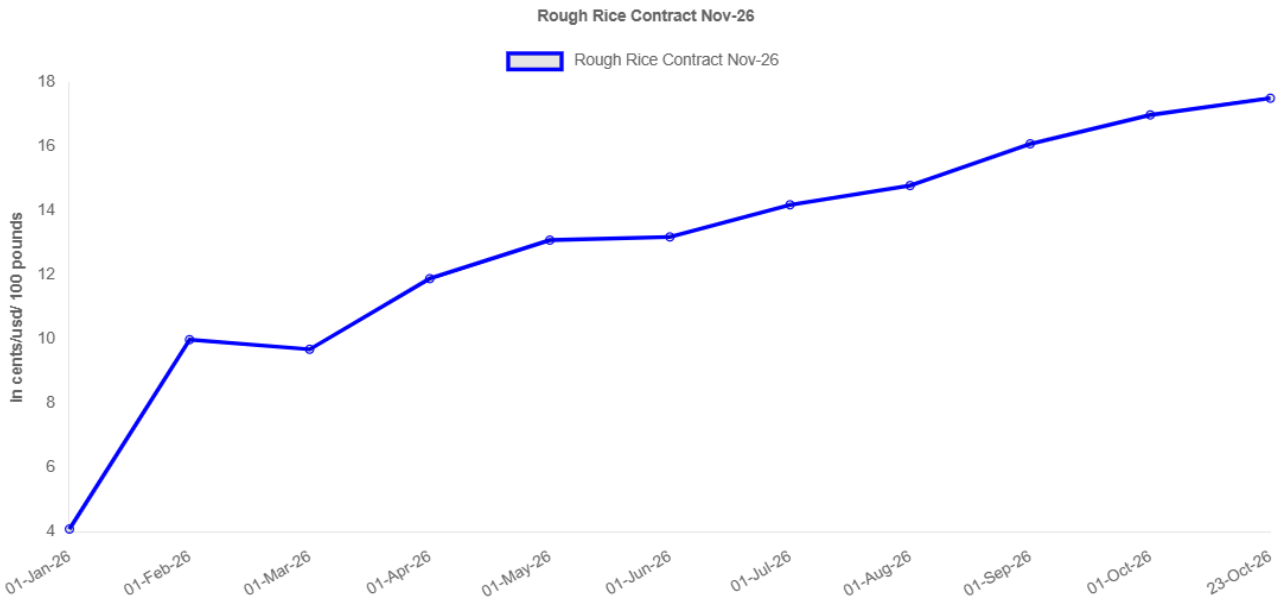

Sowing Progress

As of 23rd October 2026, the Ministry of Agriculture & Farmers Welfare reported that India's Rabi Rice sowing area declined to 102 thousand hectares versus 213 thousand hectares a year ago.

Global Rice Outlook for 2026/27 (October Update)

- **Global Supply:** Global rice supplies for 2026/27 are projected to decrease by 0.3 million tonnes to 796 million tonnes, as higher beginning stocks in India, Japan, and Bangladesh more than offset lower production in the Philippines, Pakistan, and Russia.
- **Global Demand:** Global rice consumption is projected to decrease by 0.6 million tonnes to 536.2 million tonnes, largely due to reductions across several Asian and African countries.
- **Global Trade:** World rice trade is projected to decline by 1.3 million tonnes to 61.3 million tonnes, mainly due to reduced Indian exports.
- **Ending Stocks:** Global rice ending stocks are projected to increase by 1.5 million tonnes to 198.5 million tonnes, driven by higher stocks in India and Japan, partly offset by reductions in China, the Philippines, and Indonesia.
