Executive Summary

- **In Indore, ref soybean oil prices were quoted at ₹143,750/tonne, up by ₹200. Soybean seed prices declined by ₹1515 to ₹72312/tonne, while soybean meal prices rise by ₹250 to ₹58000/tonne. Soybean meal (Hypro) prices increased by ₹500 to ₹63000/tonne.**
- **Soybean Auction Records 21,117 Quintals of Produce in Ashta Mandi.**
- **Madhya Pradesh Reintroduces Bhavantar Scheme for Soybean Farmers.**
- **On Thursday, 22nd October 2026, CBOT soybean futures for November 2026 delivery were quoted at 1253.4 cents per bushel, up 7.2 cents, indicating weaker soybean prices. Soybean meal futures for December 2026 delivery declined by USD 0.7 to USD 347.4 per short tonne, while soybean oil futures for December 2026 delivery fell by 0.78 cents to 66.7 cents per pound.**
- **US Soybean Exports to China Decline Amid Tariffs and Market Diversification.**
- **US Soybean Futures Rebound as Harvest Pressure Eases.**
- **US Soybean Futures Rise on Strong Export Sales Despite Harvest Pressure.**

Domestic News

- **In Indore, ref soybean oil prices were quoted at ₹143,750/tonne, down by ₹250. Soybean seed prices declined by ₹1515 to ₹72312/tonne, while soybean meal prices rise by ₹250 to ₹58000/tonne. Soybean meal (Hypro) prices increased by ₹500 to ₹63000/tonne.**
- **Soybean Auction Records 21,117 Quintals of Produce in Ashta Mandi :** A total of 21,117 quintals of agricultural produce was auctioned in Ashta Mandi, Sehore district, Madhya Pradesh, with soybean prices reaching a maximum of ₹7,312 per quintal. The auction reflects active soybean arrivals in the mandi, with prices varying according to the quality of the produce.
- **Madhya Pradesh Reintroduces Bhavantar Scheme for Soybean Farmers :** Madhya Pradesh has reintroduced the Centre's Price Deficit Payment Scheme (PDPS), known as Bhavantar, for soybean farmers during the 2026 kharif season to protect them against market prices falling below the Minimum Support Price (MSP). Under the scheme, farmers can receive compensation of up to 15% of the MSP, with coverage limited to 25% of anticipated oilseed production. In the 2025 kharif season, the state disbursed ₹1,500 crore to around 7.2 lakh farmers. However, with current soybean prices trading above the MSP, compensation payments may not be required this season. Registrations are open until October 24, 2026, while the scheme's benefit period will continue until January 15, 2027. The state has also established a ₹1,500 crore credit limit for the Madhya Pradesh Mandi Board and plans to use digital platforms such as AgriStack to improve transparency and prevent market manipulation. Karnataka has also expressed interest in adopting the scheme for the first time. Unlike physical procurement, the PDPS compensates farmers for price differences while allowing them to sell their produce through regular market channels, thereby avoiding procurement-related storage losses and market distortions.

International News

- **On Thursday, 22nd October 2026, CBOT soybean futures for November 2026 delivery were quoted at 1253.4 cents per bushel, up 7.2 cents, indicating weaker soybean prices. Soybean meal futures for December 2026 delivery declined by USD 0.7 to USD 347.4 per short tonne, while soybean oil futures for December 2026 delivery fell by 0.78 cents to 66.7 cents per pound.**
- **US Soybean Exports to China Decline Amid Tariffs and Market Diversification :** US soybean farmers are facing growing uncertainty from weather conditions, trade tariffs and changing export demand. According to the US Soybean Export Council (USSEC), US soybean exports to China declined 45% year-on-year as of July 23, 2026. China, which accounted for an average of 60% of total US soybean exports during the seven years before 2018, currently imposes a 10% retaliatory tariff introduced in 2025, in addition to a 3% most-favoured-nation tariff on US soybeans, compared with a 3% tariff on Brazilian and Argentine supplies. To offset declining Chinese demand, US exporters are diversifying their markets, with shipments to other international destinations increasing by 1.96 million tonnes year-on-year, while purchases by China fell by 10.19 million tonnes, compensating for approximately one-fifth of the decline. US soybean farmers are also adopting technologies such as precision planting, improved seed genetics, irrigation, drainage systems and satellite data to manage weather-related risks.
- **US Soybean Futures Rebound as Harvest Pressure Eases :** US soybean futures rebounded on October 22, 2026, after declining for eight consecutive sessions. The November 2026 soybean contract closed 7.75 cents higher at $12.53 per bushel, supported by technically oversold conditions and easing harvest pressure. According to Sam Hudson of Cornbelt Marketing, farmer selling from newly harvested supplies had weighed on prices as producers sought cash flow amid strong yields and concerns over soybean quality. As harvest progresses, selling pressure is expected to ease, potentially helping the market establish a price bottom. Continued Chinese purchases are also providing support to the soybean market.
- **US Soybean Futures Rise on Strong Export Sales Despite Harvest Pressure :** Chicago soybean futures rose on October 23, 2026, supported by strong US export sales, although prices remained on track for a weekly decline amid ongoing harvesting in the US Midwest. The most-traded soybean contract on the Chicago Board of Trade (CBOT) increased 0.32% to $12.57 per bushel as of 0345 GMT but remained down 0.34% for the week. According to the US Department of Agriculture (USDA), net US soybean export sales for the week ended October 15 reached 2.84 million tonnes, significantly above the previous four-week average and within market expectations of 1.8–3.0 million tonnes. Meanwhile, the ongoing US harvest is replenishing near-term supplies and reducing the risk of further crop deterioration. Expectations of a stronger Brazilian soybean crop in the 2026/27 season are also weighing on prices, despite continuing weather-related risks.
