Executive Summary

- **At Indore, soybean seed prices were quoted at ₹70240/tonne, up by 4940. Soy meal prices were quoted at ₹57000 down by 7000, while soybean oil prices were quoted at INR ₹144510 up by 1210/tonne. Soymeal (Hypro) was quoted at ₹62000 down by 7000.**
- **Domestic Soybean Market Prices and Arrivals.**
- **Madhya Pradesh Approves Bhavantar Scheme Amid Farmers' Demand for MSP Procurement.**
- **Drought and Adverse Weather Affect Soybean Production.**
- **Delayed Harvesting and Rainfall Threaten Farm Operations.**
- **Soybean Farmers Face Financial Pressure Amid Crop Losses and Market Challenges.**
- **On Friday 16th Oct, CBOT soybean futures for Nov 2026 delivery were quoted at 1260.4 cents down by 13.8/bushel, indicating mild weakness in soybean prices. Soybean meal futures down by USD 8.7 to USD 356.7/short tonne, while soybean oil futures slipped up by 0.93 cents to 67.1 cents/pound.**
- **Argentina Soybean Production and Export Prospects Improve.**
- **Brazil Soybean Outlook Faces Weather Risks Amid Expanding Processing Capacity.**
- **US Soybean Market Faces Harvest Delays and Mixed Demand Signals.**
- **India's Oilmeal Exports Decline as South American Meal Gains Competitiveness.**
- **Global Soybean Trade Expands Amid New Market Access and Regulatory Changes.**

Price Influencing Factor

S.No.	Factors	Current Status	Expected Impact on Prices
1	Sowing Acerage ('000.ha)	Higher (12,223.8 vs 12,044.7) (Kharif - 2026 Vs Kharif - 2025)	Bearish
2	Area('000.ha)	Low (12 vs 12.3 lakh hectares) (2026 Vs 2025)	Bullish
3	Crop Condition	Mixed / Average. Moisture stress in some regions, but crop growth remains satisfactory in several major producing areas.	Neutral
4	Yield (tonnes/Ha.)	Low (0.92 Vs 1.06) (2025 Vs 2024)	Bullish
5	Production (Mln Tonnes)	Declined (125.96 vs 127.20) (2026 vs 2025)	Bullish
6	Arrivals ('000 tonnes)	High (481 Vs 190)(W-O-W)	Bearish
7	Import ('000.Tonnes)	Soyoil Up by 52% (Apr-Jun Period), Jun import totalled around 4561 against 4464 in same period last year	Bearish
8	Export ('000.Tonnes)	Soymeal Down by 31% (Apr-Jun Period), Jun export totalled around 217 against 313 in same period last year	Bearish
9	Current Price Trend	Upward (W-O-W)	Bullish
10	Retail Prices	Upward (W-O-W)	Bullish
11	Wholesale Prices	Upward (W-O-W)	Bullish
12	WPI	Upward (M-O-M) (June 26' Vs July'26)	Bullish
13	Inflation	Upward (M-O-M) (June 26' Vs July'26)	Bearish
14	International Trend	Upward (CBOT) (W-O-W)	Bullish
15	Crude Oil Prices	Upward (as they support biofuel demand and improve the competitiveness of soybean oil as a renewable-fuel feedstock.)	Bullish

S.No.	Factors	Current Status	Expected Impact on Prices
16	MSP	Relative Increase by ₹308 (from ₹5328 to ₹5708)	Bullish
17	Milling margins	Low (780 Vs 3180)	Bearish
18	Substitute Crops	Adequate rainfal	Neutral
19	Rainfall Status	Below Normal Rainfall	Bullish
20	Rainfall Outlook	Below Normal Rainfall	Bullish
21	Temperature Outlook	Above Normal (Higher daytime temperatures across Central & Northern India)	Bullish
22	Currency (INR/USD)	Strong (95.7)	Bearish
23	Substitute Prices	Upward	Bullish
24	Price Seasonality	High (Oct Avg)	Bearish
25	Policy / Regulation	Normal	Bearish
26	Geopolitical	Russian-Ukraine, US-China, Middle East Iran conflict tensions still persist	Bullish
27	Global Prod. Outlook	Marginally Higher by 0.1 MMT (442.3 MMT) (WASDE)	Neutral
28	Weather (Major Prod.)	Production uncertainties in key regions of world	Bullish
29	Global Weather	Excessive rain Brazil and moderate rainfall in US. El Nino risks still persist	Neutral
30	Feed Raw Material	Upward (WoW)	Bullish
31	Egg price	Upward (WoW)	Bullish

Domestic News

- **At Indore, soybean seed prices were quoted at ₹70240/tonne, up by 4940. Soy meal prices were quoted at ₹57000 down by 7000, while soybean oil prices were quoted at INR ₹144510 up by 1210/tonne. Soymeal (Hypro) was quoted at ₹62000 down by 7000.**
- **Domestic Soybean Market Prices and Arrivals :** Soybean prices are showing mixed trends across major mandis as harvesting progresses. In Ujjain's Tarana mandi, soybean is trading around ₹4,400 per quintal, compared with ₹5,200–₹5,600 per quintal outside the mandi, prompting farmers to raise concerns over price differences, limited trader participation and inadequate market facilities. In contrast, prices in Khurai mandi, Sagar district, have reached ₹6,760 per quintal, while Manawar mandi in Dhar is reporting around ₹5,850 per quintal. Arni APMC in Yavatmal district, Maharashtra, is witnessing daily arrivals of 2,000–3,000 bags, with prices ranging from ₹5,500 to ₹6,700 per quintal. Heavy arrivals of around 5,000–6,000 quintals per day in Sehore and approximately 8,000 bags in Khanpur, Rajasthan, reflect increasing availability of the new-season crop. Aklera mandi in Rajasthan is also experiencing heavy soybean and maize arrivals, creating storage constraints.
- **Madhya Pradesh Approves Bhavantar Scheme Amid Farmers' Demand for MSP Procurement :** The Madhya Pradesh Cabinet approved the Bhavantar Bhugtan Yojana under PM-AASHA for the Kharif 2026 soybean crop to compensate eligible farmers for the difference between the applicable market price and the Minimum Support Price (MSP). Farmers were required to register through the e-Uparjan portal by October 17, 2026, with covered soybean sales scheduled from October 22, 2026, to January 15, 2027, at notified mandis. Compensation eligibility will depend on registered land area and the state's previous-year average productivity, while soybean sold between October 1 and October 21 will be deducted from the eligible quantity. Payments will be transferred directly to registered bank accounts. However, the Bharatiya Kisan Sangh (BKS) has rejected the scheme and demanded 100% procurement of eligible Kharif crops at MSP instead of price-difference compensation.
- **Drought and Adverse Weather Affect Soybean Production :** Soybean production in Maharashtra's Marathwada region has suffered severe losses due to delayed monsoon arrival and prolonged dry spells during August and September. Preliminary crop-cutting data from Beed district indicates an average yield of 410 kg per hectare, down over 73% from the five-year average of 1,534.2 kg per hectare. In Telangana's Adilabad region, farmers have reported soybean yields of around 5 quintals per acre against expectations of 8–10 quintals, with rainfall 34% below normal up to October 12 and declining river water levels adding to irrigation concerns. Farmers have sought drought declarations, financial assistance and the release of Rythu Bharosa payments. In Latur, Maharashtra, a fire allegedly set by an unidentified person destroyed around 160 quintals of soybean belonging to four farmers, causing estimated losses of ₹14 lakh. Police and revenue officials inspected the site, and villagers demanded an investigation and financial assistance.
- **Delayed Harvesting and Rainfall Threaten Farm Operations :** Delayed soybean harvesting in Ganjbasoda, Vidisha district, Madhya Pradesh, is raising concerns over the timely preparation of fields for Rabi sowing. Delays in clearing fields could push back ploughing and sowing schedules while increasing ploughing and irrigation costs. Meanwhile, rain accompanied by strong winds and hail in parts of Gadarwara, Narsinghpur district, has increased the risk of damage to standing and harvested soybean crops. Farmers are concerned that further rainfall could damage the remaining crop and delay harvesting, following earlier rain-related losses to soybean and maize.
- **Soybean Farmers Face Financial Pressure Amid Crop Losses and Market Challenges :** Farmers across soybean-growing regions are facing financial pressure due to crop losses, price disparities and concerns over returns. In Marathwada, severe yield reductions have left some farmers struggling to repay debts, while crop-cutting experiments are underway to assess damage and determine eligibility for drought relief and crop-loss compensation. In Telangana, farmers are seeking financial assistance amid reduced production and water shortages. In Madhya Pradesh, the price gap between mandi and outside-market rates has raised concerns over fair returns, while the rejection of the Bhavantar scheme by BKS reflects continued demand for guaranteed MSP procurement. These concerns highlight the challenges farmers face in securing adequate returns while managing production losses and rising cultivation costs.

International News

- **On Friday 16th Oct, CBOT soybean futures for Nov 2026 delivery were quoted at 1260.4 cents down by 13.8/bushel, indicating mild weakness in soybean prices. Soybean meal futures down by USD 8.7 to USD 356.7/short tonne, while soybean oil futures slipped up by 0.93 cents to 67.1 cents/pound.**
- **Argentina Soybean Production and Export Prospects Improve :** Argentina's soybean production is expected to increase in the 2026/27 marketing year, supported by higher planted acreage, favourable yield prospects and the potential impact of El Niño. The USDA forecasts production at 50 million tonnes, up 0.7 million tonnes year-on-year, while the Foreign Agricultural Service (FAS) projects 52.5 million tonnes. Soybean acreage is expected to expand by 0.9 million hectares to 17.1 million hectares, supported by firm soybean and product prices, lower production costs than maize and strong soybean meal demand. Argentina shipped 870,000 tonnes of soybeans in September, compared with 190,000 tonnes in August, while soybean meal exports reached 2.4 million tonnes and soybean oil shipments stood at 500,000 tonnes. Early October loading schedules indicate continued export activity, although final production will depend on weather conditions.
- **Brazil Soybean Outlook Faces Weather Risks Amid Expanding Processing Capacity :** Brazil's soybean production prospects for 2026/27 remain mixed. S&P Global Energy CERA projects a 2.2% decline in soybean output and a 4.5% fall in corn production, citing potential El Niño-related weather risks, fertilizer shortages and higher input costs. However, another estimate places Brazilian soybean production at 183.36 million tonnes, 0.4% above the previous season, with planting progressing relatively normally across most major regions. Meanwhile, Brazil's annual soybean processing capacity is expected to rise 13% in 2026 to 86.4 million tonnes, supported by investments of approximately R$7.7 billion and an increase in operational plants from 131 to 148. Processing is forecast to reach a record 63.5 million tonnes, driven by demand for soybean oil in biodiesel production and soybean meal in animal feed. Increasing processing capacity and a potentially large harvest could intensify competition in global vegetable oil and meal markets.
- **US Soybean Market Faces Harvest Delays and Mixed Demand Signals :** Heavy rainfall across the US Midwest delayed soybean harvesting, tightening supplies of freshly harvested beans for processors and prompting higher cash premiums to secure immediate deliveries. Some processing plants reduced crushing operations because of limited availability, although drier weather in early October helped harvesting progress, particularly after delays in Iowa. US soybean futures declined on October 15 after September crushing reported by the National Oilseed Processors Association (NOPA) fell to a 13-month low of 196.3 million bushels, below market expectations of around 205 million bushels. The decline added to selling pressure despite fresh soybean sales to China and lower soybean oil stocks. Separately, USDA data showed August soybean crushing at 210 million bushels, up from 198 million bushels a year earlier but below July's 222 million bushels. In North Dakota, two new crushing plants with combined annual capacity of around 90 million bushels are strengthening domestic demand, supported by biofuel production, and increasing competition for soybean supplies.
- **India's Oilmeal Exports Decline as South American Meal Gains Competitiveness :** India's total oilmeal exports fell 65% year-on-year to 1.49 lakh tonnes in July 2026, compared with 4.22 lakh tonnes in July 2025, according to provisional data from the Solvent Extractors' Association of India (SEA). Exports during April–July declined 27% to 11.06 lakh tonnes from 15.17 lakh tonnes a year earlier. Lower soybean meal shipments, high domestic prices and rising freight costs reduced the competitiveness of Indian supplies against cheaper South American products. Meanwhile, Argentine soybean meal export prices moved to a premium of $7 per tonne over Brazilian offers, the widest difference in Argentina's favour since May 2026. South American soybean meal prices rose around 6% in September, supported by strong European demand ahead of the implementation of the EU Deforestation Regulation (EUDR). Argentina's meal exports and logistics conditions, along with European demand, will influence regional price relationships.
- **Global Soybean Trade Expands Amid New Market Access and Regulatory Changes :** Zambia shipped its first 120-tonne soybean consignment to China on October 10, following earlier phytosanitary arrangements and approval as an authorised supplier. The shipment opens a potential new export market for Zambian producers, although future growth will depend on production capacity, pricing, logistics and compliance with Chinese standards. China imported approximately 111.83 million tonnes of soybeans in 2025. Meanwhile, the European Commission approved or renewed authorisations for four genetically modified soybean events—MON 94637, GMB151 × DAS-44406-6, MON 94313 and MON 87705—for food and animal feed imports and processing. These approvals do not permit cultivation within the European Union and remain subject to labelling and traceability requirements. In the vegetable oil market, Chicago soybean oil futures fell 2% in the latest session to $1,489 per tonne, extending their monthly decline to 4.4% amid falling palm oil prices and seasonally increasing sunflower oil supplies.
