Executive Summary

- **In Indore, ref soybean oil prices were quoted at ₹1,43,950/tonne, down by ₹560. Soybean seed prices inclined by ₹2072 to ₹72312/tonne, while soybean meal prices rise by ₹1000 to ₹58000/tonne. Soybean meal (Hypro) prices increased by ₹1000 to ₹63000/tonne.**
- **Soybean Production Outlook and Weather Impact.**
- **Domestic Arrivals and Price Trends.**
- **Government Support and Farmers' Demands.**
- **Soybean Meal Exports and International Competitiveness.**
- **Crop Losses, Harvesting Challenges and Farmer Distress.**
- **On Friday, 23rd October 2026, CBOT soybean futures for November 2026 delivery were quoted at 1257.4 cents per bushel, down 3 cents, indicating weaker soybean prices. Soybean meal futures for December 2026 delivery declined by USD 10.2 to USD 346.5 per short tonne, while soybean oil futures for December 2026 delivery fell by 0.31 cents to 66.8 cents per pound.**
- **US Soybean Harvest Progress and Weather Conditions.**
- **China's Soybean Purchases Support US Export Demand.**
- **US Soybean Crushing Declines Amid Tight Supplies.**
- **South American Production Outlook and Weather Risks.**
- **Global Price Pressure and Export Market Developments.**

Price Influencing Factor

S.No.	Factors	Current Status	Expected Impact on Prices
1	Sowing Acerage ('000.ha)	Higher (12,315.8 vs 12,044.7) (Kharif - 2026 Vs Kharif - 2025)	Bearish
2	Area('000.ha)	Low (12 vs 12.3 lakh hectares) (2026 Vs 2025)	Bullish
3	Crop Condition	Sowing very low in Maharashtra and Karnataka and Telengana. In contrast Madhya Pradesh and Rajasthan has shown strong sowing coverage and higher production this season.	Neutral
4	Yield (tonnes/Ha.)	Low (0.92 Vs 1.06) (2025 Vs 2024)	Bullish
5	Production (Mln Tonnes)	Declined (10700 vs 11000) (2026 vs 2025)	Bullish
6	Arrivals ('000 tonnes)	High (1186 Vs 537)(W-O-W)	Bearish
7	Import ('000.Tonnes)	Soyoil Up by 52% (Apr-Jun Period), Jun import totalled around 4561 against 4464 in same period last year	Bearish
8	Export ('000.Tonnes)	Soymeal Down by 31% (Apr-Jun Period), Jun export totalled around 217 against 313 in same period last year	Bearish
9	Current Price Trend	Upward (W-O-W)	Bullish
10	Retail Prices	Upward (W-O-W)	Bullish
11	Wholesale Prices	Upward (W-O-W)	Bullish
12	WPI	Upward (M-O-M) (Oct'26' Vs Sep'26)	Bullish
13	Inflation	Upward (M-O-M) (Oct'26' Vs Sep'26)	Bullish
14	International Trend	Upward (CBOT) (W-O-W)	Bullish
15	Crude Oil Prices	Upward (as they support biofuel demand and improve the competitiveness of soybean oil as a renewable-fuel feedstock.)	Bullish

S.No.	Factors	Current Status	Expected Impact on Prices
16	MSP	Relative Increase by ₹308 (from ₹5328 to ₹5708)	Bullish
17	Milling margins	Low (-420 Vs 130)	Bearish
18	Substitute Crops	Adequate rainfal	Bearish
19	Rainfall Status	Below Normal Rainfall	Bullish
20	Rainfall Outlook	Below Normal Rainfall	Bullish
21	Temperature Outlook	Above Normal (Higher daytime temperatures across Central & Northern India)	Bullish
22	Currency (INR/USD)	Strong (94.95)	Bearish
23	Substitute Prices	Upward	Bullish
24	Price Seasonality	High (Oct Avg)	Bearish
25	Policy / Regulation	Normal	Neutral
26	Geopolitical	Russian-Ukraine, US-China, Middle East Iran conflict tensions still persist	Bullish
27	Global Prod. Outlook	Marginally Higher by 0.1 MMT (442.3 MMT) (WASDE)	Bearish
28	Weather (Major Prod.)	Production uncertainties in key regions of world	Bullish
29	Global Weather	Excessive rain Brazil and moderate rainfall in US. El Nino risks still persist	Bullish
30	Feed Raw Material	Upward (WoW)	Bullish
31	Egg price	Upward (WoW)	Bullish

Domestic News

- **In Indore, ref soybean oil prices were quoted at ₹1,43,950/tonne, down by ₹560. Soybean seed prices inclined by ₹2072 to ₹72312/tonne, while soybean meal prices rise by ₹1000 to ₹58000/tonne. Soybean meal (Hypro) prices increased by ₹1000 to ₹63000/tonne.**
- **Soybean Production Outlook and Weather Impact :** India's soybean production in Kharif 2026 is projected at 10.8 MMT, down 2.1% from 11.0 MMT in the previous season, according to SOPA. Prolonged dry spells and moisture deficiency in Maharashtra, Karnataka and Telangana damaged crops across 7.8 lakh hectares, with 7.0 lakh hectares reportedly completely destroyed. Madhya Pradesh production is estimated to increase 32.2% to 5.7 MMT, while Maharashtra output is expected to decline 33.2% to 3.5 MMT. Rajasthan production is projected to rise 48.2% to 0.9 MMT. Although soybean sowing area increased nearly 5% to 117.7 lakh hectares, the harvested area declined to 110.0 lakh hectares due to crop damage. Average yield is estimated at 981 kg per hectare, slightly below 983 kg per hectare in the previous season. Meanwhile, Madhya Pradesh has reported encouraging initial production estimates despite El Niño-related monsoon concerns. The state accounts for approximately 45% of India's soybean acreage, with the government focusing on farmer welfare, agricultural processing and agriculture-based industries.
- **Domestic Arrivals and Price Trends :** Soybean arrivals have increased across several domestic markets as harvesting progresses. Rajkot APMC in Gujarat recorded approximately 110,000 maunds of soybean arrivals on October 22, 2026, amid the arrival of more than 900 vehicles carrying various agricultural commodities. In Madhya Pradesh, Sehore mandi is receiving around 5,000–6,000 quintals daily, while soybean prices in Khurai mandi, Sagar district, have reached a maximum of ₹6,760 per quintal. In Maharashtra, Arni APMC in Yavatmal district is recording daily arrivals of 2,000–3,000 bags, with prices ranging between ₹5,500 and ₹6,700 per quintal. In contrast, farmers in Tarana mandi, Ujjain, reported prices of around ₹4,400 per quintal, compared with ₹5,200–₹5,600 per quintal outside the mandi. Limited trader participation and inadequate market facilities have also prompted protests over price realisation.
- **Government Support and Farmers' Demands :** The Madhya Pradesh Cabinet has approved the Bhavantar Bhugtan Yojana under PM-AASHA for the Kharif 2026 soybean crop to compensate eligible farmers for the difference between the applicable market price and MSP. Registrations were required through the e-Uparjan portal by October 17, 2026, while sales under the scheme are scheduled from October 22, 2026, to January 15, 2027, at notified mandis. Compensation eligibility will depend on registered land area and the state's previous-year average productivity, with soybean sold between October 1 and October 21 deducted from the eligible quantity. Payments will be transferred directly to registered bank accounts according to the prescribed price-difference calculation. However, the Bharatiya Kisan Sangh has rejected the scheme and demanded 100% procurement of eligible Kharif crops at MSP, arguing for guaranteed procurement rather than price-difference compensation.
- **Soybean Meal Exports and International Competitiveness :** India's total oilmeal exports declined 65% year-on-year to 148,000 tonnes in July 2026, compared with 422,000 tonnes a year earlier, according to SEA. Soybean meal exports plunged nearly 90% to 17,810 tonnes from 183,553 tonnes, as Indian supplies remained uncompetitive against cheaper South American exports and rising freight costs associated with Red Sea shipping disruptions. Indian soybean meal was quoted at approximately $613 per tonne, compared with international prices of around $428 per tonne. Strong domestic demand from poultry and livestock feed manufacturers further restricted export availability. Rapeseed meal exports also declined to 96,539 tonnes from 209,128 tonnes in July. During April–July 2026–27, total oilmeal exports fell 27% to 1.105 MMT, while soybean meal shipments dropped to 187,000 tonnes from 676,000 tonnes. Rapeseed meal exports increased slightly to 756,000 tonnes from 740,000 tonnes, providing partial support to overall shipments. China, Bangladesh and Vietnam remained major destinations for Indian oilmeals.
- **Crop Losses, Harvesting Challenges and Farmer Distress :** Soybean farmers in Telangana are seeking drought relief amid deficient rainfall, declining yields and reduced water availability. In Adilabad, one farmer reported an expected yield of around 5 quintals per acre against 8–10 quintals, while rainfall in the district was 34% below normal up to October 12. Declining water levels in the Penganga and Godavari rivers have further increased irrigation concerns, prompting demands for drought declarations, financial assistance and the release of Rythu Bharosa payments. In Maharashtra's Latur district, a fire allegedly set by an unidentified person destroyed around 160 quintals of soybean belonging to four farmers, causing estimated losses of ₹14 lakh. Meanwhile, delayed soybean harvesting in Ganjbasoda, Vidisha district, Madhya Pradesh, is raising concerns about postponed Rabi sowing and higher ploughing and irrigation costs. These developments highlight the challenges facing farmers amid crop damage, price disparities and seasonal farming pressures.

International News

- **On Friday, 23rd October 2026, CBOT soybean futures for November 2026 delivery were quoted at 1257.4 cents per bushel, down 3 cents, indicating weaker soybean prices. Soybean meal futures for December 2026 delivery declined by USD 10.2 to USD 346.5 per short tonne, while soybean oil futures for December 2026 delivery fell by 0.31 cents to 66.8 cents per pound.**
- **US Soybean Harvest Progress and Weather Conditions :** Soybean harvesting reached 64% of acreage as of October 18, 2026, up from 46% the previous week and just one percentage point below the five-year average of 65%. Louisiana led harvesting at 97%, followed by Arkansas at 87%, while progress remained behind historical averages in major producing states such as Iowa and Nebraska. Generally dry conditions are expected across the US, although a weather system may bring rainfall to parts of New Mexico, Colorado, the Texas Panhandle, western Kansas and Nebraska over the weekend. Earlier heavy rainfall across the western Midwest delayed harvesting and restricted fresh soybean supplies to processing plants, prompting some processors to offer higher cash premiums or reduce crushing operations. Drier weather in early October helped harvesting recover, although Iowa remained behind its normal pace.
- **China's Soybean Purchases Support US Export Demand :** China's cumulative purchases of US soybeans for the 2026/27 marketing year have reached an estimated 15.0 MMT, representing approximately 60% of the 25.0 MMT target under the broader trade arrangement. The USDA confirmed private export sales of 558,000 tonnes to China on October 16, while total US soybean sales reached 1.88 MMT over three days, including 236,000 tonnes allocated to unknown destinations. For October 2–8, US soybean net sales totalled 574,900 tonnes, while export shipments reached 1.154 MMT, up 23% from the previous four-week average. China was the largest shipment destination, receiving 649,300 tonnes during the reporting period. Despite renewed Chinese demand and continued purchases from Asian markets, US soybean futures have recorded only modest support as ample domestic supplies and concerns about processing demand continue to weigh on prices.
- **US Soybean Crushing Declines Amid Tight Supplies :** US soybean crushing by National Oilseed Processors Association (NOPA) members declined 4.5% month-on-month to 196.3 million bushels in September 2026, the lowest level in 13 months and 0.8% below the previous year. The figure fell below market expectations due to scheduled plant maintenance, harvesting delays and limited soybean availability, with Iowa recording a 13.2% year-on-year decline in crushing. Meanwhile, soybean oil stocks fell 12.3% from August to 1.053 billion pounds, the lowest month-end level since November 2014. Despite fresh export sales to China, soybean futures faced selling pressure following the weaker-than-expected crushing data and broke below key technical support levels. In contrast, US soybean meal exports are forecast to increase 11% year-on-year to a record 20.6 MMT in 2026/27, supported by stronger global feed demand, competitive prices and expanding domestic processing capacity. Soybean meal production is expected to rise 5%, with the Philippines, Mexico, Canada, Colombia and Vietnam remaining important export destinations.
- **South American Production Outlook and Weather Risks :** Brazilian soybean planting is progressing ahead of schedule, with record early sowing reported in Mato Grosso. However, limited October rainfall across central Brazil has raised concerns about moisture availability for crop establishment and early development. Although rain is expected following a weather front, precipitation may become limited again next week, making rainfall distribution critical as the crop approaches the December pod-filling stage. Separately, forecasts Brazil's soybean production to decline 2.2% in 2026/27, citing potential El Niño-related adverse weather and limited fertilizer availability linked to Middle East conflict disruptions. Higher input costs could further pressure production and yields. Argentina's soybean production, meanwhile, is expected to increase, with USDA forecasting 50 MMT and the Foreign Agricultural Service projecting 52.5 MMT. Planted area is expected to expand by around 0.9 million hectares to 17.1 million hectares, supported by favourable soybean economics, strong meal demand and the possibility of above-average rainfall associated with El Niño. Final production prospects in both countries will depend on weather conditions and crop development.
- **Global Price Pressure and Export Market Developments :** US soybean futures have faced downward pressure amid expectations of higher US production, weaker crushing figures and favourable crop weather in major producing regions. Chicago November soybean futures declined 2.4% over the week to $464 per tonne, extending their monthly decline to 5.3%, following the USDA's increase in its US soybean production estimate to 124.2 MMT. Ukrainian soybean prices have also weakened under global market pressure and export logistics constraints. Domestic processor prices for genetically modified soybeans remained at UAH 15,500–17,000 per tonne, while export prices varied by delivery route amid higher transportation costs and maritime disruptions. Ukraine had harvested 2.6 MMT from 1.2 million hectares by October 12, representing 73% of the planned area, with an average yield of 2.2 tonnes per hectare. Meanwhile, China has scheduled an online auction of soybean stocks from the 2023 and 2024 crop years for October 27, 2026, with participation restricted to eligible domestic crushing and feed-processing enterprises authorised to handle imported genetically modified soybeans. Separately, Indian oilmeal exports fell 65% year-on-year to 148,000 tonnes in July 2026, while cumulative exports during April–July declined 27% to 1.105 MMT, reflecting weak soybean meal shipments, uncompetitive domestic prices and higher freight costs.
