Weather Forecast and Warning

- **Andhra Pradesh Braces for Extremely Heavy Rainfall on 27–28 October as Cyclonic Storm Approaches the Coast:** A low-pressure system over the Bay of Bengal is expected to intensify into a cyclonic storm by the morning of 26 October and move towards the North Andhra Pradesh and South Odisha coasts. Coastal Andhra Pradesh may receive extremely heavy rainfall on 27–28 October, accompanied by strong winds and rough seas. Farmers are advised to ensure proper drainage in standing crops, support horticultural plants, and safely store harvested produce.
- **West Bengal Likely to Receive Rainfall on 28–29 October, with Isolated Heavy Showers:** Gangetic West Bengal may receive widespread rainfall on 28–29 October, with isolated heavy rainfall expected during this period. Sub-Himalayan West Bengal may also experience isolated heavy rainfall on 29 October, accompanied by gusty winds. Farmers should take precautions to protect harvested crops and avoid leaving produce exposed to rain and strong winds.
- **Uttar Pradesh May Receive Heavy Rainfall in Eastern Districts on 29 October:** East Uttar Pradesh is likely to receive isolated heavy rainfall on 29 October. Scattered rainfall, thunderstorms and lightning may also affect parts of northwest India. Farmers should monitor local weather forecasts and protect harvested produce from unexpected rainfall.
- **Punjab May Experience Scattered Rainfall and Thunderstorms Across Northwest India:** Scattered rainfall accompanied by thunderstorms and lightning is possible over parts of northwest India. However, the bulletin does not specify a separate heavy rainfall warning for Punjab. Farmers should remain alert to changing weather conditions.
- **Gujarat to Experience No Significant Weather Activity During the Week:** No significant weather activity is expected across Gujarat during the forecast period. Overall, weather conditions are likely to remain relatively stable.
- **Maharashtra to See Generally Stable Weather, with Hot and Humid Conditions in Konkan:** No significant weather activity is expected across Maharashtra during the week. However, hot and humid conditions are likely over Konkan and Goa on 23 October.
- **Telangana Likely to Receive Rainfall and Gusty Winds During 27–29 October:** Scattered rainfall is likely over Telangana during 27–29 October, with isolated heavy rainfall expected on 28 October. Thunderstorms, lightning and gusty winds may also occur during this period. Farmers should arrange proper field drainage and secure harvested produce and horticultural crops.
- **Madhya Pradesh May Receive Heavy Rainfall and Thunderstorms on 28–29 October:** East Madhya Pradesh may receive widespread rainfall accompanied by thunderstorms and lightning on 29 October. Isolated heavy rainfall is also likely during 28–29 October. Farmers should take precautions against waterlogging and protect harvested crops.
- **Karnataka Likely to Receive Rainfall Across Coastal and South Interior Regions Through 29 October:** Coastal and South Interior Karnataka are likely to receive widespread rainfall during 23–24 October, followed by scattered rainfall during 25–29 October. Heavy rainfall is possible in South Interior Karnataka on 23–24 October and in Coastal Karnataka on 23 October. Farmers should maintain proper drainage and move harvested pulses and other produce to safe storage.
- **Bihar Expected to Receive Widespread Rainfall and Isolated Heavy Showers on 29 October:** Bihar may receive widespread rainfall on 29 October, with isolated heavy rainfall and thunderstorms accompanied by gusty winds. Farmers should secure harvested crops and protect stored produce from rainfall and strong winds.
