Price Influencing Factor

S.No.	Factors	Current Status	Expected Impact on Prices
1	Arrivals('000 tonnes) M.Y	25,760 vs 26,113 thousand tonnes (-1.4% YoY) through 23-Oct-26	Bullish
2	Import - Jul 26 Vs 25 ('000 tonnes)	0.9 vs 7.4 thousand tonnes in Aug-26 vs Aug-25 (-87.8%)	Bullish
3	Export - Jul 26 Vs 25 ('000 tonnes)	55.5 vs 2 thousand tonnes in Aug-26 vs Aug-25 (97.0%)	Bullish
4	Current Price Trend	Upward WoW: Delhi ₹31,180/t (+₹830, ~+3% weekly); Indore ₹30,038/t (+₹1,038); Kanpur ₹28,375/t (+₹575); Rajkot ₹30,000/t (+₹1,500); Kota ₹30,000/t (+₹1,000)	Bullish
5	Retail Prices	Firmer: Haryana ₹30,250/t (+₹1,580 WoW), Tamil Nadu ₹47,460/t (+₹280), Madhya Pradesh ₹29,330/t (+₹180), Andhra Pradesh ₹42,210/t (+₹170), Punjab ₹28,750/t (+₹20); Delhi ₹34,000/t and West Bengal ₹33,000/t flat	Bullish
6	Wholesale Prices	Firmer in Andhra Pradesh ₹38,604.2/t (+₹277.3 WoW), Karnataka ₹39,737.5/t (+₹131.2), Madhya Pradesh ₹26,913.3/t (+₹146.3), Tamil Nadu ₹43,047.1/t (+₹194.2), Uttar Pradesh ₹26,080.3/t (+₹165.4) and West Bengal ₹28,250/t (+₹250).	Bullish
7	WPI (July 26 Vs 25)	3.6% (provisional) in Sep-26 vs 0.3% in Aug-26	Bullish
8	Inflation (July 26 Vs 25)	Wheat WPI inflation 3.6% YoY (provisional) in Sep-26, up from 0.3% in Aug-26	Bullish
9	International Price Trend	CBOT fell 4.7% in the week to 23-Oct, an eighth straight weekly loss. FOB (23-Oct vs 19-Oct): France $271/t (-3.2%), US HRW $301/t (-5.0%), US SRW $270/t (-4.6%)	Bearish
10	MSP (INR/Tonne)	Wheat MSP increased by ₹25/quintal to ₹2,610 for the 2027–28 marketing season.	Bullish
11	Processing (Milling) Margins	Delhi retail wheat ₹34,000/t vs retail wheat flour ₹35,000/t (spread ₹1,000/t, unchanged WoW) while Delhi mandi wheat rose ₹830 WoW to ₹31,180/t, squeezing mill margins; flour mixed: Haryana ₹38,000/t (+₹2,330), Punjab ₹34,080/t (-₹390)	Bearish
12	Substitute Crops	Rabi competing crops mixed: chana ₹71,000/t in Bikaner (-₹1,625) and ₹72,500/t in Akola (-₹1,500); rapeseed-mustard ₹91,840/t in Jaipur (+₹780) and ₹92,305/t in Alwar (-₹773)	Bearish
13	Central Pool Stocks (Mln Tonnes)	Central wheat stocks reported at 48.0 MMT (Sep-26) vs 33.3 MMT a year earlier.	Bearish
14	Currency (INR vs USD)	₹94.95/USD, +0.18 WoW	Bearish

S.No.	Factors	Current Status	Expected Impact on Prices
15	Price Seasonality	Delhi wheat averaged ₹30,147/t in Oct-26 (through 26-Oct) vs ₹28,131/t in Oct-25 (+7.2% YoY) and ₹29,577/t in Sep-26 (+1.9% MoM); 19.6% above the five-year October average (₹25,202/t) and 3.1% below the five-year maximum (₹31,100/t).	Bullish
16	Policy / Regulation	Wheat and specified wheat flour products remain under the Free export policy effective 24-Aug-2026.	Bearish
17	Export Parity	Delhi ₹31,180/t is roughly $328/t at ₹94.95/USD, above France $271/t, US HRW $301/t and US SRW $270/t, so Indian wheat is not export-competitive	Bearish
18	Geopolitical Condition	Black Sea risk persists but the premium has eased: global wheat futures hit their lowest since 12-Aug on 19-Oct despite renewed vessel attacks as Russian shipments reroute via Baltic ports; Ukraine is discussing an export corridor with Turkey.	Bullish
19	Global Production Outlook	IGC Oct production 820 MMT (unchanged vs Sep; 845 MMT last year), trade 199 MMT, consumption 827 MMT, carryover 279 MMT; USDA Oct production 822.4 MMT vs 844.1 MMT last year (-2.6%).	Bearish
20	Weather Outlook in Major Producing Countries	Mixed: US winter wheat planting 63% by 18-Oct vs 69% five-year average (emergence 39% vs 43%); France planting 45% by 19-Oct vs 42% last year; Argentina 2026/27 crop forecast 23.4 MMT with frost/cloud-cover risk.	Bullish
21	Global Weather Outlook	Mixed: WMO-cited El Niño could strengthen into 2027; 2026 monsoon was 13% below normal and India post-monsoon rain is -56% vs LPA (1–23 Oct; Central India -92%); above-normal Oct–Dec temperatures and warm Jan–Feb 2027 could hit wheat grain filling.	Bullish
22	OMSS	2026 total allocation 22.63 MMT; offtake 10.79 MMT (48%); OMSS(D) 0.01/0.01 MMT. Second OMSS tender announced; Karnataka received 6,000 t in the 21-Oct auction (~17% of mills' 34,600 t weekly need) and mills seek 3.0 lakh t weekly nationally.	Bullish
23	Competing Crops (Demand Side)	Maize ₹25,750–30,973/t (Chhindwara ₹25,750, Delhi ₹26,500, Sangli ₹30,973); barley ₹33,500/t (-₹500 WoW); bajra ₹25,400/t (+₹345); firm coarse-grain prices support wheat in feed and crop-choice markets	Bullish

Domestic News

- **Wheat prices exhibited an upward trend in most markets, with the weekly price in the Delhi market quoted at ₹31,180 per tonne.**
- **Delhi Wheat Prices Hit Record ₹3,118 per Quintal Despite Government Sales:** Wheat prices in Delhi rose to a seasonal record of ₹3,118 per quintal on October 23, 2026, up ₹148 or 4.9% from ₹2,970 when the government announced its second Open Market Sale Scheme (OMSS) tender. The rally is being supported by declining private-sector stocks, strong festive demand and export interest from Bangladesh amid Black Sea supply disruptions. Despite comfortable government reserves, reported central wheat stocks stood at around 46.0 MMT, compared with 33.3 MMT in October 2024. Market prices in November and December are expected to depend partly on the timing and volume of further government wheat sales.
- **Karnataka Flour Mills Seek Higher Wheat Allocation Under OMSS Ahead of Diwali:** Karnataka's roller flour mills have urged the Food Corporation of India (FCI) to increase weekly wheat allocations under the Open Market Sale Scheme (Domestic) to 3.0 lakh tonnes nationally and 15,000 tonnes for Karnataka ahead of Diwali on November 8. Karnataka received only 6,000 tonnes in the October 21 auction, meeting around 17% of mills' estimated weekly requirement of 34,600 tonnes. All 1,300 tonnes offered from Ludhiana were sold at an average winning price of ₹3,179 per quintal, while 4,130 tonnes of the 4,700 tonnes offered from Bhopal were sold. Between October 16 and 23, mill-delivered wheat prices in Bengaluru rose by 3.6–6.3%, with Madhya Pradesh-origin wheat increasing to ₹3,400 per quintal and Rajasthan-origin wheat to ₹3,600. The association said increasing weekly national allocations to 3.0 lakh tonnes could release around 6.0 MMT into the market over 20 weeks, compared with approximately 3.0 MMT last year. (Source: Business Line)
- **DAP Shortage in Uttar Pradesh Raises Concerns Over Wheat Sowing:** Farmers in Banda district, Uttar Pradesh, faced a shortage of diammonium phosphate (DAP) fertilizer for nearly a month as potato sowing continued and wheat planting approached. Long queues formed at fertilizer distribution centres and cooperative societies following limited supplies, leaving many farmers without fertilizer. One cooperative society distributed 300 bags of DAP and 150 bags of NPK, while other farmers awaited verification and additional stocks. The district agriculture department said more DAP had been dispatched to distribution centres, with supplies being allocated at five bags per hectare per farmer.
- **Bijnor Distributes Rabi Crop Seeds at 50% Subsidy; Wheat Seed Allocation Raised to 14,000 Quintals:** Agriculture department centres in Bijnor, Uttar Pradesh, have begun distributing wheat and other Rabi crop seeds, including mustard, gram, peas and linseed, at a 50% subsidy. Wheat seed allocation has been increased to 14,000 quintals for the 2026–27 season, compared with 8,500 quintals last year. The prescribed prices for wheat seeds are ₹4,991 per quintal for basic seeds and ₹4,738 per quintal for certified seeds, with farmers paying half the price after subsidy. Wheat sowing is expected to accelerate from November as sugarcane crushing resumes and harvested fields become available.
- **Potential El Niño Strengthening Raises Concerns Over India's Wheat Production in 2026–27:** The World Meteorological Organization has indicated that El Niño could strengthen towards the end of 2026 and persist into 2027, raising concerns over winter temperatures and water availability in India. The 2026 monsoon reportedly recorded 13% below-normal rainfall, with eastern and northeastern India receiving 26% below average and southern India 24% below average. Above-normal temperatures across parts of South Asia during October–December 2026 could increase pressure on irrigation and Rabi crops. Higher temperatures during January–February 2027, particularly during wheat grain filling, could reduce yields, although the impact will depend on actual weather conditions and Western Disturbances.

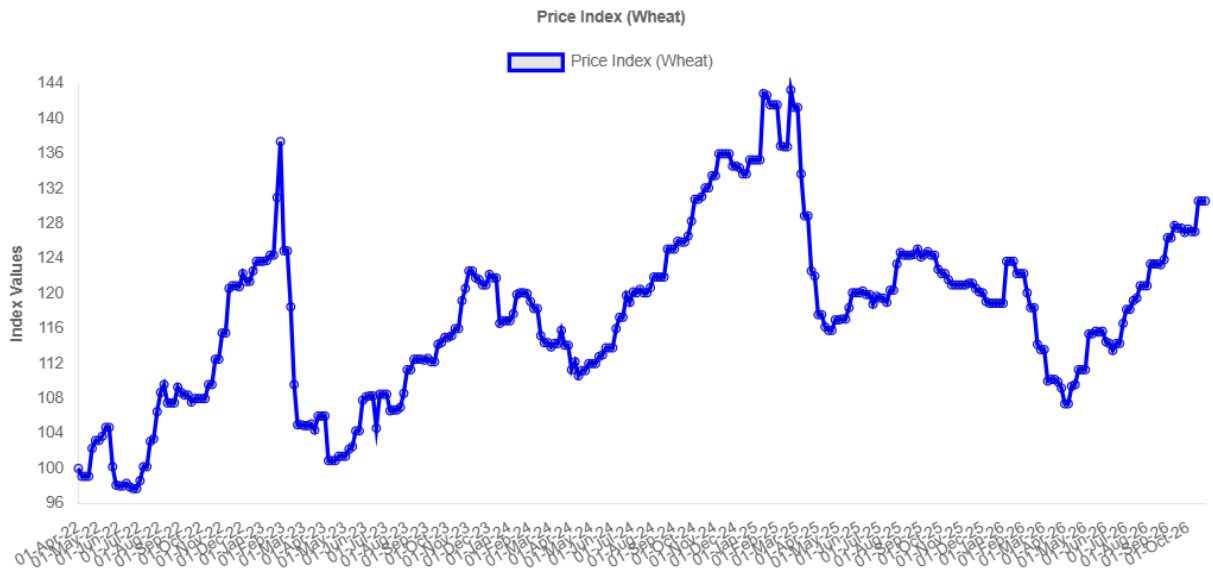

International News

- **South Korean Mill Tenders for 50,000 Tonnes of US Wheat:** A South Korean flour mill has issued a tender to purchase 50,000 tonnes of US wheat, with offers due on October 23, 2026. The purchase will depend on the submitted offers and final tender results.
- **France Wheat Planting Reaches 45% by October 19:** France had planted 45% of its wheat crop by October 19, ahead of 42% at the same time last year, according to FranceAgriMer.
- **CBOT Wheat Futures Face Eighth Consecutive Weekly Decline, Longest Losing Streak Since 1997:** Chicago Board of Trade (CBOT) wheat futures were down 4.7% for the week ending October 23, 2026, putting prices on track for an eighth consecutive weekly decline, the longest such streak since 1997. The downturn follows September's rally to the highest levels since 2023, as the geopolitical risk premium linked to Black Sea export disruptions has eased. Russian grain shipments are increasingly moving through alternative routes, including Baltic ports, while weaker-than-expected US wheat export sales have added pressure. Harvesting in Australia and Argentina is also progressing, with additional supplies expected to enter global markets in the coming months. Corn futures were heading for a fourth consecutive weekly decline amid broader grain-market weakness. (Source: Bloomberg)
- **Czech Grain Production Falls 16% to 6.5 MMT in 2026 Due to Adverse Weather:** The Czech Republic's grain production is estimated at 6.5 MMT in 2026, down 16.0% from 7.7 MMT in 2025, as spring frosts, drought and high temperatures reduced crop yields. Total grain area declined 2.1% to 1.2 million hectares. Wheat production fell to 4.4 MMT from 5.2 MMT. The September grain estimate was slightly above the July forecast of 6.4 MMT.
- **Russian Wheat Exports to Georgia Reach Five-Year High:** Russia's wheat exports to Georgia rose 21% year-on-year to USD 77.8 million during January–September 2026, the highest level for the period since 2020. Russia accounted for 95.5% of Georgia's wheat imports, remaining its largest supplier. Georgia last recorded a higher value of Russian wheat imports in January–September 2020, at USD 80.3 million. Other suppliers included Kazakhstan, with shipments worth USD 2.0 million, and the United Arab Emirates, at USD 1.6 million.
- **Kazakhstan's Wheat Flour Exports Rise 24.5% to 1.4 MMT in January–August 2026:** Kazakhstan's wheat flour exports increased 24.5% year-on-year to 1.4 MMT during January–August 2026, while export revenue rose 39.6% to USD 399.9 million. Afghanistan remained the largest buyer, accounting for 874,300 tonnes, up 47.5%, followed by Uzbekistan at 222,200 tonnes, down 13.0%. Exports to Kyrgyzstan increased 14.9% to 134,400 tonnes, Turkmenistan rose 13.3% to 80,000 tonnes, and Tajikistan climbed 53.1% to 45,900 tonnes. Exports of feed flour and feed mixtures reached 2.4 MMT, valued at USD 577.6 million, reflecting growth in Kazakhstan's grain-processing trade.
- **Argentina Wheat Crop Forecast at 23.4 MMT Amid Weather Risks:** The Buenos Aires Grain Exchange estimates Argentina's 2026/27 wheat crop at 23.4 MMT, while warning that persistent cloud cover and recent frosts could threaten yields. Weather conditions remain a key factor in determining final production as the crop develops.
- **Bangladesh Receives 175,000 Tonnes of US Wheat Under 220,000-Tonne Purchase:** Bangladesh has received nearly 175,000 tonnes of US wheat at Chattogram, accounting for around 80% of its latest purchase of 220,000 tonnes. The shipment, reported on October 21, 2026, is expected to support the country's food supply and reflects continued wheat trade between Bangladesh and the United States.
- **U.S. Winter Wheat Planting Reaches 63%, Remains Below Five-Year Average:** Winter wheat planting across 18 major U.S. producing states reached 63% of intended acreage as of October 18, 2026, up from 51% the previous week but six percentage points below the 2021–2025 average of 69%, according to the supplied report. Crop emergence increased to 39%, compared with 27% a week earlier, but remained below the five-year average of 43%. Washington led planting progress at 96%, followed by Colorado at 91%, Idaho and Nebraska at 90% each, and South Dakota at 89%. Planting remained behind average in key states, including Kansas at 60% versus 69%, and Oklahoma at 37% versus 59%. Emergence was strongest in Washington at 80%, while Kansas and Oklahoma remained below their historical averages at 30% and 18%, respectively. Overall, planting and emergence progress varied across the winter wheat belt, with several northwestern states advancing faster than parts of the southern Plains.
- **Egypt's Wheat Imports Plunge as Black Sea Disruptions Tighten Supplies:** Egypt's wheat imports have fallen sharply in the 2026–27 marketing year as escalating conflict and shipping disruptions in the Black Sea constrain supplies from its major exporters, Russia and Ukraine, which accounted for around 85% of Egypt's wheat purchases in 2025. Imports during July and August were below 1.0 MMT, approximately half the volume recorded a year earlier, while September imports plunged 76.6% year-on-year to 363,000 tonnes from 1.55 MMT. The Egyptian government has relied on private-sector imports and strategic reserves, although shipping risks, higher freight and insurance costs, and importer withdrawals have complicated procurement. Egypt harvested a record 10.2 MMT of wheat in 2026, up 10.9% year-on-year, while government procurement reportedly exceeded its 5.0 MMT target. Despite stronger domestic production and opening stocks of 5.8 MMT, Egypt is projected to import 12.0 MMT of wheat in 2026–27, around 3.5 MMT less than the previous season. Meanwhile, state grain buyer Future of Egypt has introduced a minimum baking-strength requirement of 160W for imported wheat, potentially narrowing sourcing options as the country considers supplies from Romania, Bulgaria, France and the United States.
- **Afghanistan's Wheat Production Rises 13.4% to 5.15 MMT, but Imports Remain Necessary:** Afghanistan harvested 5.15 MMT of wheat in 2026, up 13.4% from 4.54 MMT in 2025, according to the Ministry of Agriculture, Irrigation and Livestock. Wheat acreage increased 4.1% year-on-year to 1.97 million hectares, including 1.34 million hectares of irrigated land and 625,000 hectares of rain-fed cultivation. Despite the larger harvest, domestic wheat requirements are estimated at 7.09 MMT, leaving a production shortfall of approximately 1.94 MMT. Domestic output therefore remains insufficient to meet national demand, requiring Afghanistan to rely on wheat imports to cover the deficit.

- **Global Wheat Prices Fall to Two-Month Low as Markets Adapt to Black Sea Disruptions:** Global wheat futures fell by as much as 1% on October 19, 2026, reaching their lowest level since August 12, despite renewed attacks on vessels and escalating tensions in the Black Sea region. Market sources attribute the decline to ample global grain stocks and the market's growing ability to adapt to export disruptions by sourcing supplies through alternative routes. As a result, the geopolitical risk premium in wheat prices is diminishing, with traders placing greater emphasis on global supply and demand fundamentals. Meanwhile, prospects for restoring stable Black Sea exports remain uncertain, as Ukraine continues discussions with Turkey, Egypt, and India on establishing an export corridor, while Russia opposes the initiative. The market's muted response to rising geopolitical risks indicates that alternative supply channels and relatively comfortable global availability are increasingly limiting the impact of Black Sea disruptions on wheat prices. (Source: Bloomberg)
- **EU Soft Wheat Exports Reach 8.5 MMT%:** European Union soft wheat exports have reached nearly 8.5 MMT since July 1, 2026, with Saudi Arabia, Nigeria, and Algeria among the leading destinations.
- **Zimbabwe Harvests 234,144 Tonnes of Wheat, Reaching 35% of National Target:** Zimbabwe has harvested 234,144 tonnes of wheat from 46,745 hectares as of October 16, achieving 35.3% of its national production target of 662,500 tonnes for the 2026 winter season. The country planted 130,316 hectares, exceeding its initial target of 125,000 hectares, with an average yield of 5.0 tonnes per hectare and 83,571 hectares still awaiting harvest. Mashonaland West led production with 77,360 tonnes, followed by Mashonaland Central with 75,487 tonnes; together, the two provinces accounted for around 65% of the harvested volume. The government is coordinating harvesting machinery, transport, financing, grain moisture management and fire prevention to minimise losses and strengthen domestic wheat self-sufficiency. Zimbabwe has also allocated 150 MW of dedicated electricity to support agricultural production and prepared more than 256,958 hectares of irrigable land. (Source: Herald)
- **Nigeria's Wheat Imports Projected at 5.6 MMT in 2026–27 as Domestic Output Declines:** Nigeria's wheat imports are forecast to reach 5.6 MMT in the 2026–27 marketing year, while domestic production is estimated at just 120,000 tonnes, down 8% from previous years. The country's annual wheat milling capacity stands at approximately 8.0 MMT, leaving a substantial gap between processing demand and local grain availability. The government aims to reduce import dependence by improving agricultural productivity, expanding irrigated cultivation and encouraging investment in domestic wheat production. Nigeria has an estimated 2.0–3.5 million hectares of land with potential for irrigated wheat cultivation, with yields expected to improve through better seed varieties, sowing schedules, crop nutrition and water management. Authorities are also urging flour mills and food manufacturers to increase purchases from local farmers, while encouraging financial institutions to provide credit to farmers and processors to strengthen domestic supply and food security. (Source: The Nation)
- **U.S. Wheat Export Sales Fall 33% Year-on-Year to 10.4 MMT:** U.S. wheat commercial sales for the 2026/27 marketing year reached 10.4 MMT as of October 8, 2026, down 33% from 15.5 MMT during the corresponding period last year, although weekly sales increased by 319,900 tonnes. Mexico remained the largest buyer at 2.4 MMT, followed by the Philippines at 1.5 MMT and Japan at 1.2 MMT, with Japanese purchases rising 2% year-on-year. Sales to Nigeria fell 81% to 200,000 tonnes, while Indonesia's purchases declined 63% to 303,000 tonnes and Venezuela's dropped 79% to 104,000 tonnes. Bangladesh's purchases decreased 48% to 234,000 tonnes, while China reported no purchases compared with 139,000 tonnes a year earlier; Taiwan was among the few major markets to record growth, with purchases up 2% to 586,000 tonnes. The 20 leading destinations accounted for 89% of total U.S. wheat sales, compared with 84% last year, highlighting a broad slowdown in export demand despite the recent improvement in weekly sales.
- **Russia's Wheat Planting Area Declines for Fourth Consecutive Season Amid Low Profitability:** Russia's total wheat planting area continues to shrink as weak farm profitability encourages producers to shift toward more profitable crops. Winter wheat area fell to 16.1 million hectares in 2026, from 17.8 million hectares in 2021, while spring wheat area declined from 10.2 million to 8.9 million hectares over the same period. Overall, wheat acreage contracted by around 3.0 million hectares, equivalent to approximately 12.0 MMT of potential production at an average yield of 4.0 tonnes per hectare. Continued acreage reductions and possible winter crop losses could put 14–18 MMT of production at risk, although the actual impact will depend on weather and yields. The report suggests domestic wheat prices may need to rise to RUB 13,500–17,000/tonne ($162–204/tonne) to improve profitability and encourage renewed planting, but a recovery in acreage may take time.

Price Index

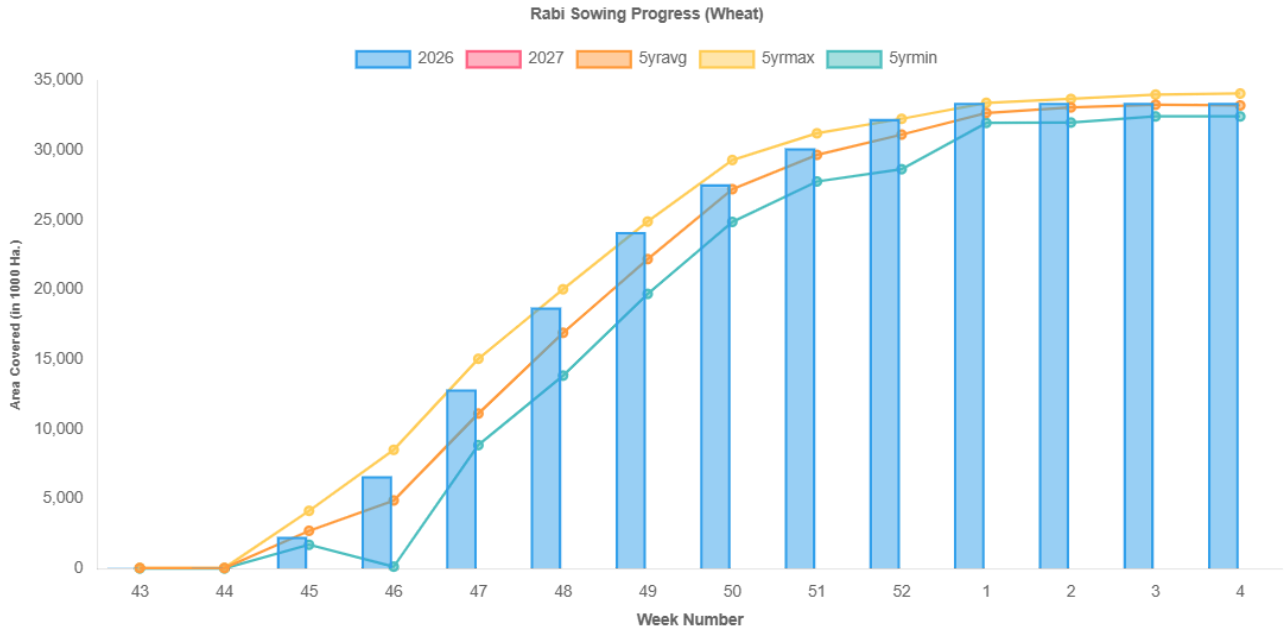

India's Wheat Price Index: Average Price of Major Origin (Base Date: 1st April 2022)

Note: Index derived from average prices of major domestic origins with keeping Base Date as 1st April 2022.

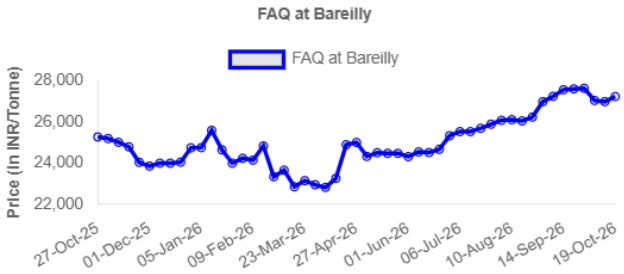

Sowing Progress

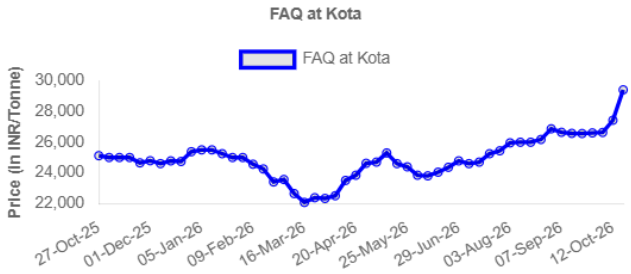

As of 23rd October 2026, the Ministry of Agriculture & Farmers Welfare reported that India's Rabi Wheat sowing area declined to 10.8 thousand hectares versus 27 thousand hectares a year ago.

IGC

In the October update, projected global wheat production for 2026/27 remained unchanged at 820 million tonnes, compared with the September estimate. Trade and carryover stocks were revised to 199 million tonnes and 279 million tonnes, respectively, while consumption was marginally increased to 827 million tonnes.

Global Wheat Outlook for 2026/27 (According to October Update)

- **Global Supply:** Global wheat supplies for 2026/27 are projected to decrease by 1.7 million tonnes to 1,308.7 million tonnes. Global production is largely unchanged, with offsetting revisions across major producing countries. EU production is lowered by 0.8 million tonnes to 133.0 million tonnes, mainly due to a reduction in Germany. Production in Canada and Turkey is each raised by 0.5 million tonnes, to 36.5 million tonnes and 23.0 million tonnes, respectively, on the back of higher yields.
- **Global Demand:** Global wheat consumption is projected to increase by 1.2 million tonnes to 823.7 million tonnes, primarily due to higher feed and residual use in China and the EU.
- **Global Trade:** World wheat trade is projected to decline by 2.8 million tonnes to 209.0 million tonnes. Lower exports from Russia and the United States are only partially offset by higher shipments from Argentina and Canada. Russia's exports are projected at 40.0 million tonnes, the lowest in five years, as continuing conflict in the Black Sea region disrupts logistics and keeps shipments below their long-term average.
- **Ending Stocks:** Global wheat ending stocks are projected to edge lower to 276.0 million tonnes. Decreases in the EU, China, Argentina, Egypt, and several other countries are nearly offset by increases in Russia, Australia, and the United States. The global stocks-to-use ratio is estimated at 33.5%, slightly below September's 33.6%.
