Wheat Daily Digest

22 October 2026

Domestic News

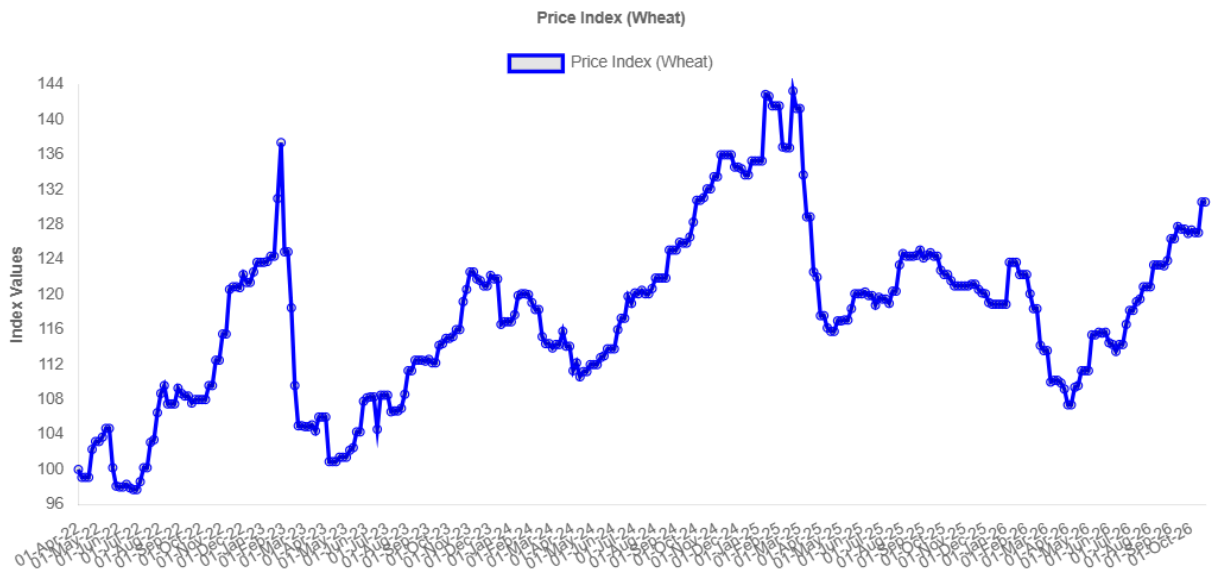

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,000 per tonne, up by 200.**
- **Bijnor Distributes Rabi Crop Seeds at 50% Subsidy; Wheat Seed Allocation Raised to 14,000 Quintals:** Agriculture department centres in Bijnor, Uttar Pradesh, have begun distributing wheat and other Rabi crop seeds, including mustard, gram, peas and linseed, at a 50% subsidy. Wheat seed allocation has been increased to 14,000 quintals for the 2026–27 season, compared with 8,500 quintals last year. The prescribed prices for wheat seeds are ₹4,991 per quintal for basic seeds and ₹4,738 per quintal for certified seeds, with farmers paying half the price after subsidy. Wheat sowing is expected to accelerate from November as sugarcane crushing resumes and harvested fields become available.
- **Potential El Niño Strengthening Raises Concerns Over India's Wheat Production in 2026–27:** The World Meteorological Organization has indicated that El Niño could strengthen towards the end of 2026 and persist into 2027, raising concerns over winter temperatures and water availability in India. The 2026 monsoon reportedly recorded 13% below-normal rainfall, with eastern and northeastern India receiving 26% below average and southern India 24% below average. Above-normal temperatures across parts of South Asia during October–December 2026 could increase pressure on irrigation and Rabi crops. Higher temperatures during January–February 2027, particularly during wheat grain filling, could reduce yields, although the impact will depend on actual weather conditions and Western Disturbances.

International News

- **CBOT Wheat (Dec 26) closed at 628.25 c/bu, down by 14.5 cents;**
- **MATIF wheat (Dec 26) closed at €232.75, down by €8.75;**
- **Bangladesh Receives 175,000 Tonnes of US Wheat Under 220,000-Tonne Purchase:** Bangladesh has received nearly 175,000 tonnes of US wheat at Chattogram, accounting for around 80% of its latest purchase of 220,000 tonnes. The shipment, reported on October 21, 2026, is expected to support the country's food supply and reflects continued wheat trade between Bangladesh and the United States.
- **Brazil's Imported Wheat Costs Face Pressure from Rising Logistics Expenses:** Imported wheat prices in Brazil could rise as higher fuel and transportation costs increase delivery expenses in MY 2026/27, despite a favourable global supply outlook. Ocean freight rates to Brazilian ports increased by an average of 3% between October 5 and 13, while domestic diesel prices reached BRL 7.17/litre on October 6, up 6.4% over the month. Trucking rates from Goiás to Paranaguá rose 11% to BRL 355/tonne between September 28 and October 19, while rates from Sorriso, Mato Grosso, to Paranaguá increased 5% to BRL 515/tonne. Argentina remains Brazil's main wheat supplier, and higher maritime and inland freight costs could raise import costs for domestic flour millers.
- **Egypt Resumes Wheat Imports with Five Cargoes Amid Black Sea Shipping Disruptions:** Egypt has reportedly purchased around five cargoes of wheat through private negotiations in October 2026, resuming imports after several months of limited activity. The origins, total tonnage, purchase value, and delivery dates have not been confirmed, although supplies are expected to come from European exporters, particularly France and Romania. Ukraine and Russia accounted for more than 82% of Egypt's wheat imports in the first half of 2026. Disruptions to Black Sea shipments, including attacks on ports and commercial vessels, have prompted importers to consider alternative supply sources.
