Wheat Daily Digest

23 October 2026

Executive Summary

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,180 per tonne, up by 180.**
- **Delhi Wheat Prices Hit Record ₹3,118 per Quintal Despite Government Sales**
- **Karnataka Flour Mills Seek Higher Wheat Allocation Under OMSS Ahead of Diwali.**
- **DAP Shortage in Uttar Pradesh Raises Concerns Over Wheat Sowing.**
- **CBOT Wheat (Dec 26) closed at 624.75 c/bu, down by 3.5 cents;**
- **MATIF wheat (Dec 26) closed at €234.25, up by €1.5;**
- **South Korean Mill Tenders for 50,000 Tonnes of US Wheat.**
- **CBOT Wheat Futures Face Eighth Consecutive Weekly Decline, Longest Losing Streak Since 1997.**
- **US Southern Plains Wheat Prices Face Pressure Amid Black Sea Developments.**
- **Czech Grain Production Falls 16% to 6.5 MMT in 2026 Due to Adverse Weather.**
- **Russian Wheat Exports to Georgia Reach Five-Year High.**
- **Kazakhstan's Wheat Flour Exports Rise 24.5% to 1.4 MMT in January–August 2026.**
- **European Wheat Prices Rebound as Black Sea Risks Offset Rising Global Supply.**
- **Argentina Wheat Crop Forecast at 23.4 MMT Amid Weather Risks.**

Domestic News

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,180 per tonne, up by 180.**
- **Delhi Wheat Prices Hit Record ₹3,118 per Quintal Despite Government Sales:** Wheat prices in Delhi rose to a seasonal record of ₹3,118 per quintal on October 23, 2026, up ₹148 or 4.9% from ₹2,970 when the government announced its second Open Market Sale Scheme (OMSS) tender. The rally is being supported by declining private-sector stocks, strong festive demand and export interest from Bangladesh amid Black Sea supply disruptions. Despite comfortable government reserves, reported central wheat stocks stood at around 46.0 MMT, compared with 33.3 MMT in October 2024. Market prices in November and December are expected to depend partly on the timing and volume of further government wheat sales.
- **Karnataka Flour Mills Seek Higher Wheat Allocation Under OMSS Ahead of Diwali:** Karnataka's roller flour mills have urged the Food Corporation of India (FCI) to increase weekly wheat allocations under the Open Market Sale Scheme (Domestic) to 3.0 lakh tonnes nationally and 15,000 tonnes for Karnataka ahead of Diwali on November 8. Karnataka received only 6,000 tonnes in the October 21 auction, meeting around 17% of mills' estimated weekly requirement of 34,600 tonnes. All 1,300 tonnes offered from Ludhiana were sold at an average winning price of ₹3,179 per quintal, while 4,130 tonnes of the 4,700 tonnes offered from Bhopal were sold. Between October 16 and 23, mill-delivered wheat prices in Bengaluru rose by 3.6–6.3%, with Madhya Pradesh-origin wheat increasing to ₹3,400 per quintal and Rajasthan-origin wheat to ₹3,600. The association said increasing weekly national allocations to 3.0 lakh tonnes could release around 6.0 MMT into the market over 20 weeks, compared with approximately 3.0 MMT last year. (Source: Business Line)
- **DAP Shortage in Uttar Pradesh Raises Concerns Over Wheat Sowing:** Farmers in Banda district, Uttar Pradesh, faced a shortage of diammonium phosphate (DAP) fertilizer for nearly a month as potato sowing continued and wheat planting approached. Long queues formed at fertilizer distribution centres and cooperative societies following limited supplies, leaving many farmers without fertilizer. One cooperative society distributed 300 bags of DAP and 150 bags of NPK, while other farmers awaited verification and additional stocks. The district agriculture department said more DAP had been dispatched to distribution centres, with supplies being allocated at five bags per hectare per farmer.

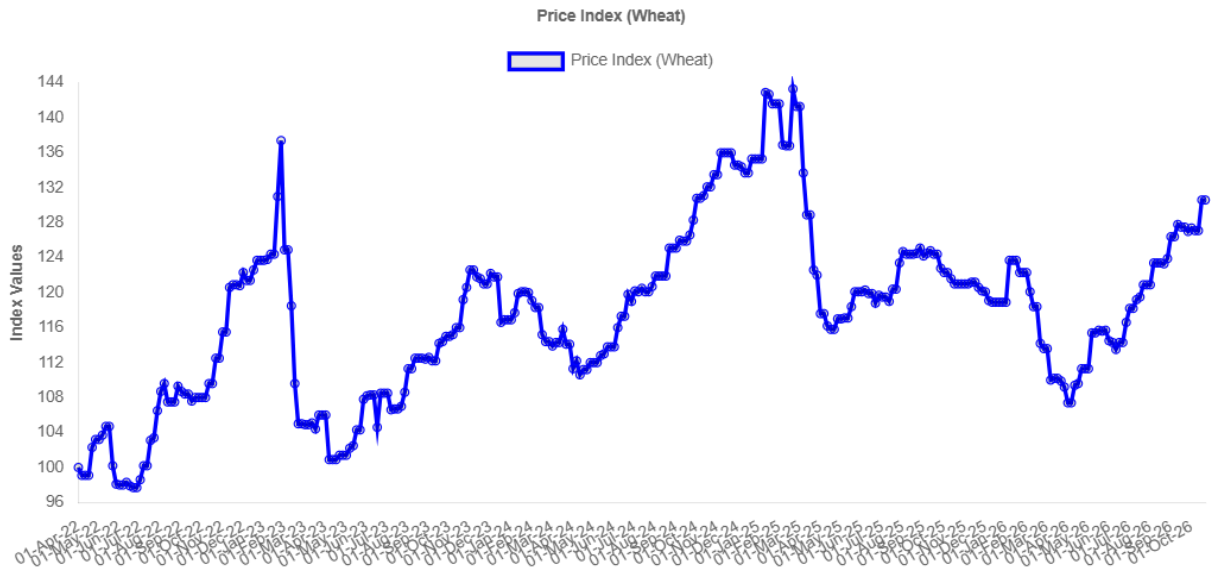

International News

- **CBOT Wheat (Dec 26) closed at 624.75 c/bu, down by 3.5 cents;**
- **MATIF wheat (Dec 26) closed at €234.25, up by €1.5;**
- **South Korean Mill Tenders for 50,000 Tonnes of US Wheat:** A South Korean flour mill has issued a tender to purchase 50,000 tonnes of US wheat, with offers due on October 23, 2026. The purchase will depend on the submitted offers and final tender results.
- **France Wheat Planting Reaches 45% by October 19:** France had planted 45% of its wheat crop by October 19, ahead of 42% at the same time last year, according to FranceAgriMer.
- **CBOT Wheat Futures Face Eighth Consecutive Weekly Decline, Longest Losing Streak Since 1997:** Chicago Board of Trade (CBOT) wheat futures were down 4.7% for the week ending October 23, 2026, putting prices on track for an eighth consecutive weekly decline, the longest such streak since 1997. The downturn follows September's rally to the highest levels since 2023, as the geopolitical risk premium linked to Black Sea export disruptions has eased. Russian grain shipments are increasingly moving through alternative routes, including Baltic ports, while weaker-than-expected US wheat export sales have added pressure. Harvesting in Australia and Argentina is also progressing, with additional supplies expected to enter global markets in the coming months. Corn futures were heading for a fourth consecutive weekly decline amid broader grain-market weakness. (Source: Bloomberg)
- **US Southern Plains Wheat Prices Face Pressure Amid Black Sea Developments:** Recent heavy rainfall across the US Southern Plains has improved soil moisture but caused uneven winter wheat planting and some replanting in Oklahoma. Winter wheat acreage is expected to remain relatively stable, although minor shifts toward sorghum in northern Texas and cotton in southwestern Oklahoma are possible. Hard red winter wheat cash prices have fallen to around or below USD 6.00 per bushel in parts of Oklahoma, while the July 2027 futures contract has declined to USD 6.90 and could fall toward USD 6.75. Negative Black Sea market developments and weak US export demand have weighed on prices, with further downside possible if regional trade routes improve.
- **Czech Grain Production Falls 16% to 6.5 MMT in 2026 Due to Adverse Weather:** The Czech Republic's grain production is estimated at 6.5 MMT in 2026, down 16.0% from 7.7 MMT in 2025, as spring frosts, drought and high temperatures reduced crop yields. Total grain area declined 2.1% to 1.2 million hectares. Wheat production fell to 4.4 MMT from 5.2 MMT. The September grain estimate was slightly above the July forecast of 6.4 MMT.
- **Russian Wheat Exports to Georgia Reach Five-Year High:** Russia's wheat exports to Georgia rose 21% year-on-year to USD 77.8 million during January–September 2026, the highest level for the period since 2020. Russia accounted for 95.5% of Georgia's wheat imports, remaining its largest supplier. Georgia last recorded a higher value of Russian wheat imports in January–September 2020, at USD 80.3 million. Other suppliers included Kazakhstan, with shipments worth USD 2.0 million, and the United Arab Emirates, at USD 1.6 million.

- **Kazakhstan's Wheat Flour Exports Rise 24.5% to 1.4 MMT in January–August 2026:** Kazakhstan's wheat flour exports increased 24.5% year-on-year to 1.4 MMT during January–August 2026, while export revenue rose 39.6% to USD 399.9 million. Afghanistan remained the largest buyer, accounting for 874,300 tonnes, up 47.5%, followed by Uzbekistan at 222,200 tonnes, down 13.0%. Exports to Kyrgyzstan increased 14.9% to 134,400 tonnes, Turkmenistan rose 13.3% to 80,000 tonnes, and Tajikistan climbed 53.1% to 45,900 tonnes. Exports of feed flour and feed mixtures reached 2.4 MMT, valued at USD 577.6 million, reflecting growth in Kazakhstan's grain-processing trade.
- **European Wheat Prices Rebound as Black Sea Risks Offset Rising Global Supply:** European wheat futures recovered on October 22, with December Euronext wheat rising 0.6% to €234.3/tonne after falling more than 3% in the previous session, supported by renewed security concerns in the Black Sea region. Continued military attacks have increased uncertainty over grain shipments, while Russian wheat exports through Baltic ports are helping offset disruptions, with October exports potentially reaching 3.0 MMT.
- **Argentina Wheat Crop Forecast at 23.4 MMT Amid Weather Risks:** The Buenos Aires Grain Exchange estimates Argentina's 2026/27 wheat crop at 23.4 MMT, while warning that persistent cloud cover and recent frosts could threaten yields. Weather conditions remain a key factor in determining final production as the crop develops.
