Domestic News

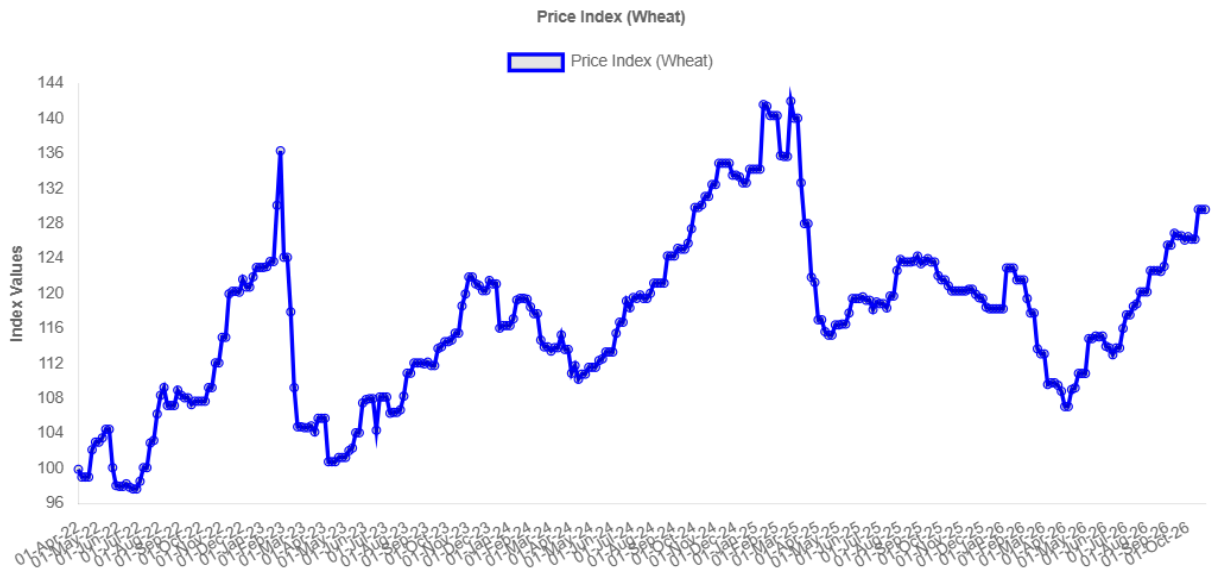

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹30,905 per tonne, down by 275.**
- **Government Cuts Weekly Wheat Auction Allocation Despite Strong Mill Demand:** The government reduced wheat allocation for the October 28, 2026, Food Corporation of India (FCI) auction by 5,000 tonnes to 101,000 tonnes, despite millers bidding above ₹3,100 per quintal in several states amid tight open-market supplies. Allocations for Assam, Telangana and Karnataka were reduced despite high offtake in the previous auction, prompting millers to seek higher weekly quotas. Punjab received an allocation of 25,000 tonnes, up from 23,000 tonnes previously, with successful bids ranging from ₹2,861 to ₹3,065 per quintal. FCI held 48.0 MMT of wheat stocks as of September 1, while government procurement reached 35.8 MMT in the 2026–27 marketing season, compared with 30.0 MMT in the previous season. India's wheat production reached a record 120.7 MMT in 2025–26, but millers continue to report limited private-market availability and expect prices to remain firm. (Source: Business Line)
- **Uttar Pradesh Offers 50% Subsidy on Wheat Seeds for 2026–27 Rabi Season:** The Agriculture Department in Hapur, Uttar Pradesh, is offering a 50% subsidy on wheat seeds to support Rabi sowing. Around 800 quintals of wheat seeds, including DBW-303, HD-3390 and DBW-327 varieties, have reached government seed stores in Hapur. In Etawah, the wheat seed distribution target is 7,524 quintals. Certified wheat seeds are priced at ₹4,738 per quintal, with a government subsidy of ₹2,369 per quintal. Farmers must book seeds online through the Agriculture Department portal or public service centres to avail the subsidy.

International News

- **CBOT Wheat (Dec 26) closed at 625.25 c/bu, up by 0.5 cents;**
- **MATIF wheat (Dec 26) closed at €234.o, down by €0.25;**
- **Europe May Struggle to Meet MENA Wheat Demand of Up to 7.1 MMT in November–December:** Middle East and North Africa (MENA) countries may import 5.6–7.1 MMT of wheat during November–December 2026, potentially straining export supplies from the European Union, Russia and Ukraine. Egypt accounts for the largest uncertainty, with estimated demand of 2.0–3.5 MMT, including potential government purchases of 1.0–1.5 MMT and private-sector demand of 1.2–2.0 MMT. Other expected import demand includes 1.3 MMT from Algeria, 900,000 tonnes from Morocco and 683,000 tonnes from Saudi Arabia. Combined wheat exports from Russia, Ukraine and the EU could reach around 8.3 MMT during the period, constrained by Baltic Sea freezing risks, low Danube water levels and competition from other grain shipments. New-crop supplies from Argentina and Australia are expected to become more significant from late December, limiting additional availability before then.
- **Russia Explores Alternative Wheat Export Route to Turkey Through Abkhazia:** Russian grain exporters are considering shipping wheat and other agricultural products through the port of Ochamchira in Russian-occupied Abkhazia to Turkey, amid disruptions at traditional Black Sea ports. The proposed route would use containers, with initial shipments to Gebze potentially starting once quality-control services become operational, expected by the end of November 2026. Each 20-foot container can carry around 23 tonnes of grain, limiting the route's capacity compared with bulk vessels that can transport more than 100,000 tonnes per voyage. Higher container transport costs and limited port-handling capacity are major constraints, although railway transport subsidies and lower domestic wheat prices have improved its economic viability. The route may provide limited logistical flexibility but is unlikely to replace conventional bulk grain export channels. (Source: Bloomberg)
- **Italian Wheat Prices Rise 24% Amid Black Sea Export Disruptions:** Grain supply disruptions in the Black Sea region have pushed milling wheat prices in Italy up 24%, amid reduced Ukrainian and Russian export flows. Dry-bulk shipments through the Bosphorus have fallen 48%, while Ukraine's grain and pulses exports declined 20% year-on-year during July–September 2026. Global wheat prices increased 6.3% in September. Alternative shipping routes through the Danube, railways, and other ports are facing capacity constraints and higher transportation costs, leaving Ukrainian milling wheat around 31% cheaper than Western European levels in early September. Continued disruptions could tighten internationally available grain supplies, particularly affecting import-dependent countries in Africa.
- **Egypt Plans 6% Increase in Domestic Wheat Procurement Price for 2027 Season:** Egypt plans to raise its domestic wheat procurement price by 6% to EGP 2,650 per ardeb for the 2027 season, from EGP 2,500 in 2026, equivalent to approximately USD 320/tonne. The higher price aims to encourage domestic production and increase deliveries to government reserves. During the 2026 procurement season, the government targeted 5.0 MMT of domestic wheat purchases, with procurement reaching around 4.7 MMT by mid-June. Egypt's wheat production is forecast at approximately 10.0 MMT in 2026, while import requirements for the 2026/27 marketing year are estimated at 13.5 MMT, highlighting continued dependence on foreign supplies despite efforts to boost domestic procurement.
- **Kazakhstan's Wheat Flour Exports Rise 24.5% to 1.4 MMT in January–August 2026:** Kazakhstan exported 1.4 MMT of wheat flour during January–August 2026, up 24.5% year-on-year, while export revenue increased 39.6% to USD 399.9 million. Afghanistan remained the largest buyer, with shipments rising 47.5% to 874,300 tonnes, valued at USD 246.8 million. Exports to Uzbekistan declined 13.0% to 222,200 tonnes, while shipments to Kyrgyzstan increased 14.9% to 134,400 tonnes, to Turkmenistan rose 13.3% to 80,000 tonnes, and to Tajikistan climbed 53.1% to 45,900 tonnes. Exports of feed flour and feed mixtures reached 2.4 MMT, worth USD 577.6 million, as Kazakhstan continues to expand grain processing and value-added agricultural exports.
