Wheat Daily Digest

27 October 2026

Executive Summary

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,180 per tonne, up by 275.**
- **India's Wheat Sowing Falls 60% to 10.8 Thousand Ha as of October 23.**
- **Madhya Pradesh Cabinet to Consider Disposal of 580,000 Tonnes of Lustre-Lost Wheat Procured in 2020–21.**
- **CBOT Wheat (Dec 26) closed at 615.5 c/bu, down by 9.5 cents;**
- **MATIF wheat (Dec 26) closed at €226.5, down by €7.5;**
- **China's Total Grain Harvest Set for Another Record Year; Wheat Production Rises 0.6%.**
- **Pakistan Plans 6.0 MMT Strategic Wheat Reserves and Sets Price at PKR 4,500 per Maund.**
- **U.S. Winter Wheat Planting Reaches 76%, Emergence Rises to 53%.**
- **Canadian Durum Wheat Arrives in Türkiye as Competitive TMO Prices Curb Further Import Demand.**
- **Wheat Prices Ease on Black Sea Diplomacy Despite Russian Export Constraints and EU Sowing Risks.**

Domestic News

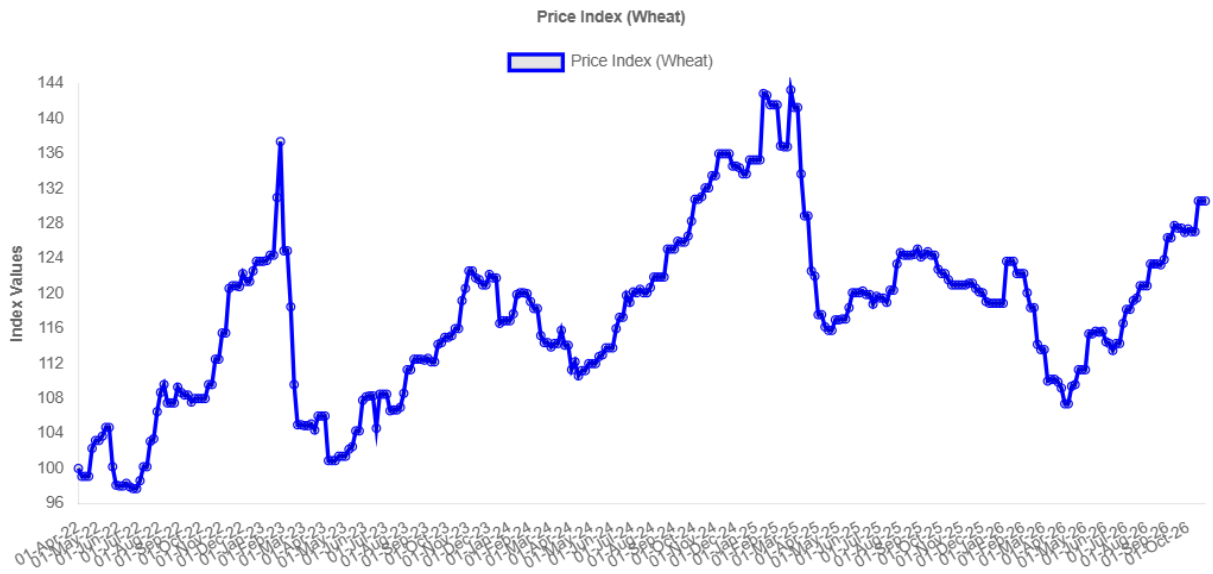

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,180 per tonne, up by 275.**
- **India's Wheat Sowing Falls 60% to 10.8 Thousand Ha as of October 23:** India's wheat sowing area stood at 10.81 thousand hectares as of October 23, 2026, down 60.0% from 27.0 thousand hectares during the corresponding period last year. Rajasthan accounted for the largest share, with 10.2 thousand hectares, while Jammu and Kashmir reported 0.61 thousand hectares, both unchanged year-on-year. Sowing had not yet been reported across the other states and Union Territories.
- **Madhya Pradesh Cabinet to Consider Disposal of 580,000 Tonnes of Lustre-Lost Wheat Procured in 2020–21:** Madhya Pradesh's cabinet meeting on October 27, 2026, is scheduled to consider post-facto approval for the disposal of 580,000 tonnes of lustre-lost wheat procured in 2020–21, as part of a tender process covering 700,000 tonnes. The proposal is among 21 agenda items submitted by the Food, Civil Supplies and Consumer Protection Department. The wheat disposal proposal has not yet been confirmed as approved, with its status dependent on the cabinet's decision.

International News

- **CBOT Wheat (Dec 26) closed at 615.5 c/bu, down by 9.5 cents;**
- **MATIF wheat (Dec 26) closed at €226.5, down by €7.5;**
- **China's Total Grain Harvest Set for Another Record Year; Wheat Production Rises 0.6%:** China's summer grain harvest reached a record 150.75 million tonnes (MMT) in 2026, up 0.7% or around 1 MMT from last year, according to the National Bureau of Statistics. Wheat production increased to 138.95 MMT, up 0.6% year-on-year, despite a 0.3% decline in planted area to 23.0 million hectares, as average yields rose 0.9% to 6.04 tonnes/ha. The USDA's Beijing agricultural attaché estimates wheat production at 141 MMT and forecasts domestic consumption at 150 MMT, imports at 6 MMT and ending stocks at 118 MMT in 2026/27. Meanwhile, China's autumn grain harvest was over 70% complete by October 15, with overall progress slightly ahead of the long-term average. Favourable growing conditions and stable or slightly higher planted area support the outlook for another bumper total grain harvest, although localised flooding and late-season heat have affected some growing regions.
- **Pakistan Plans 6.0 MMT Strategic Wheat Reserves and Sets Price at PKR 4,500 per Maund:** Pakistan plans to maintain strategic wheat reserves of up to 6.0 MMT under its new National Wheat Policy, with the government setting a wheat price of PKR 4,500 per maund after consultations with provincial governments and the IMF. More than 1.3 MMT of wheat has already been supplied to provinces from PASSCO stocks, while imports of up to 550,000 tonnes remain an option depending on demand. The government said domestic stocks were sufficient to meet current requirements and prioritised procurement from local farmers, with imported wheat estimated to cost PKR 4,500–4,900 per maund. Authorities attributed recent price increases to market manipulation rather than an actual supply shortage and said measures would be taken to curb speculation and unjustified price rises.
- **U.S. Winter Wheat Planting Reaches 76%, Emergence Rises to 53%:** U.S. winter wheat planting across major producing states reached 76% of the intended area as of October 25, 2026, up from 63% a week earlier but below the five-year average of 77%. Planting progress was led by Texas at 95%, Nebraska at 95%, and Washington at 98%, while North Carolina lagged at 24%. Winter wheat emergence reached 53%, up from 39% in the previous week and close to the five-year average of 54%. Washington reported 90% emergence, followed by Nebraska at 80% and Idaho at 66%, while North Carolina stood at 9%.
- **Canadian Durum Wheat Arrives in Türkiye as Competitive TMO Prices Curb Further Import Demand:** Türkiye has received its first shipment of approximately 60,000 tonnes of Canadian durum wheat for the 2026–27 season at İskenderun Port, following the vessel's departure from Vancouver on September 19 and transit through the Panama Canal on October 5, 2026. Earlier purchases were encouraged by relatively high domestic durum wheat prices at the start of the season, despite Türkiye's large wheat harvest. However, further import demand is expected to remain limited as the Turkish Grain Board (TMO) offers first-grade durum wheat at USD 320/tonne to pasta and bulgur exporters and around USD 371/tonne under its regular domestic sales programme. Substantial government wheat stocks and competitive domestic prices are reducing the appeal of Canadian imports, while international wheat prices and TMO's future sales policies will influence Türkiye's durum wheat trade for the remainder of the season.
- **Wheat Prices Ease on Black Sea Diplomacy Despite Russian Export Constraints and EU Sowing Risks:** Global wheat prices weakened on October 27, 2026, as Russia–Türkiye discussions on safer Black Sea grain shipments raised hopes of improved trade flows, although no operational corridor has been agreed. Euronext December 2026 wheat stood at €226.5/tonne, while CBOT December futures fell 0.4% to 613.8 US cents/bushel. Russian wheat exports are forecast at 2.8 MMT in October, well below the 5.1 MMT recorded in October 2025, with the seasonal closure of the Volga–Baltic waterway expected to increase pressure on rail logistics. EU winter wheat sowing remains uneven due to dry soils in parts of central and southern Europe and excessive rainfall in the Baltic region, while US planting reached 76%. US wheat export inspections fell to 184,000 tonnes, and cumulative exports reached 7.4 MMT, down 35% year-on-year, limiting upward price momentum despite continued Black Sea supply risks.
