Domestic News

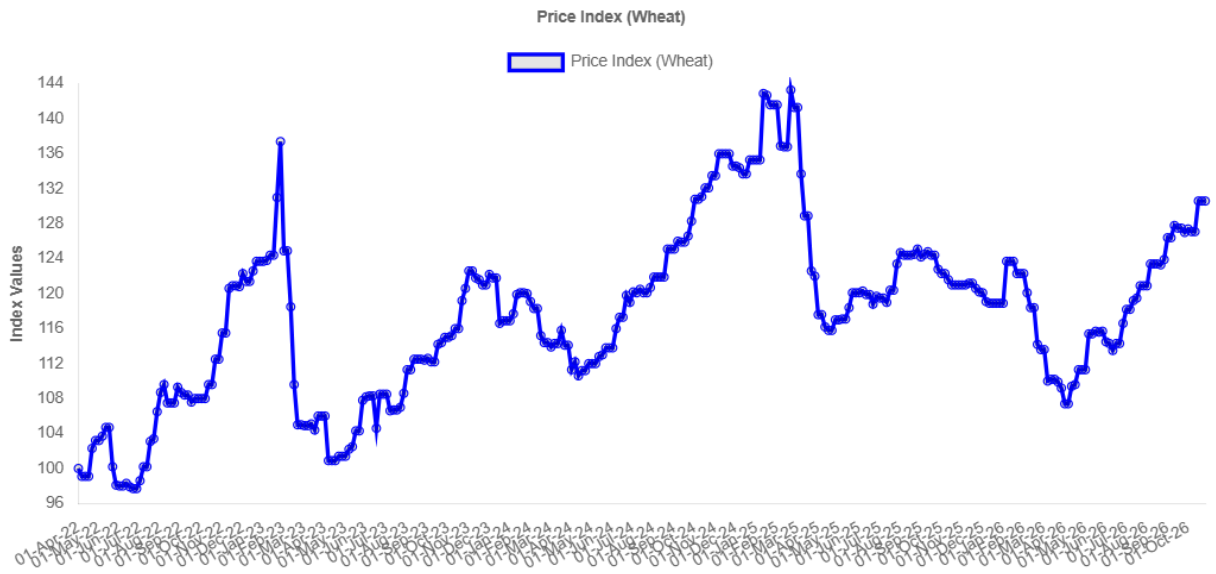

- **Wheat prices trended steadily across most markets. The Delhi market price is quoted at ₹31,275 per tonne, up by 95.**
- **Deficient Monsoon Rainfall Slows India's Wheat Sowing for 2026/27:** India's wheat sowing reached just 11,000 hectares as of October 23, compared with 27,000 hectares a year earlier, amid a 13% southwest monsoon rainfall deficit and concerns over irrigation water availability. Punjab and Rajasthan recorded rainfall deficits of 38% and 22%, respectively, and together account for around 31% of the country's wheat area. Low soil moisture and below-normal reservoir and canal water levels also threaten sowing in Madhya Pradesh, Gujarat, Bundelkhand and parts of central India. The government has set a wheat production target of 121 MMT for 2026/27, following record output of 120.7 MMT in 2025/26. Total rabi crop sowing stood at 1.8 Mha as of October 23, against 2.8 Mha a year earlier.
- **Maharashtra Advises Farmers to Limit Wheat Acreage to Assured Irrigation Availability:** Maharashtra's agriculture department has urged farmers to restrict wheat sowing during the 2026/27 rabi season to areas with assured irrigation, citing deficient rainfall and potential El Niño-related water shortages. Farmers have been advised to assess groundwater levels, soil moisture and available irrigation before finalising acreage, while those with limited water supplies are encouraged to consider alternatives such as gram, safflower and linseed. The department also recommended intercultivation, hoeing, weed control and mulching to conserve soil moisture, alongside drip and sprinkler irrigation to improve water-use efficiency.
- **El Niño and Adverse Weather Threaten Indian Crop Production and Harvest Progress:** A strengthening El Niño, alongside forecast positive Indian Ocean Dipole conditions during October–December, is raising concerns over below-average rainfall across much of India.

International News

- **CBOT Wheat (Dec 26) closed at 611.0 c/bu, down by 4.5 cents;**
- **MATIF wheat (Dec 26) closed at €228.5, up by €2.0;**
- **Argentina Maintains Wheat Production Estimate at 23.4 MMT Despite Adverse Weather:** Persistent rainfall, low temperatures, and limited sunlight in Argentina are slowing fieldwork and increasing crop disease risks. The Buenos Aires Grain Exchange (BAGE) maintained its wheat production estimate at 23.4 MMT, despite late frosts affecting up to 15% of wheat in some areas.
- **Jordan Purchases 60,000 Tonnes of Wheat at $313.95/Tonne in International Tender:** Jordan's state grain buyer purchased 60,000 tonnes of hard milling wheat in an international tender on October 27, against an offer to buy up to 120,000 tonnes. The purchase was reportedly concluded at $313.95/tonne C&F, with shipment scheduled for the first half of February 2027. Other offers ranged from $317.48/tonne to $329.77/tonne C&F.
- **Romanian Milling Wheat Prices Fall as Ukrainian Grain Competition Intensifies:** Romanian 12% protein milling wheat prices declined by USD 5/tonne during October 16–23, 2026, averaging USD 283/tonne FOB Constanța, although remaining USD 50/tonne higher year-on-year. Domestic CPT milling wheat prices also fell by around €8/tonne from seasonal peaks as Ukrainian grain supplies at Romanian ports increased competition. Improved rainfall has supported winter-crop sowing prospects, with some farmers in western Romania considering replacing rapeseed with winter wheat and barley ahead of the 2027 harvest. Barley prices remained firm at €225/tonne CPT amid limited seller availability, while improved water levels on the Rhine and Danube could support shipping conditions.
- **Tunisia Issues Tender for 100,000 Tonnes Each of Soft Wheat and Feed Barley:** Tunisia's state grains agency has issued an international tender to purchase 100,000 tonnes of soft milling wheat and 100,000 tonnes of animal feed barley, with bids due on October 28, 2026. Both commodities are sought in four consignments of 25,000 tonnes each, with wheat shipments scheduled between December 1, 2026, and January 10, 2027, and barley shipments between November 20 and December 30, depending on origin. Suppliers can offer grain from optional origins, but sellers of Black Sea grain cannot invoke force majeure due to Russia–Ukraine war-related disruptions and must arrange alternative supplies if shipments from the region become unavailable.
- **Bangladesh Proposes Russian-Funded Wheat Silo at Payra Port with Capacity of Up to 500,000 Tonnes:** Bangladesh has proposed that Russia finance and build a wheat silo at Payra seaport in Patuakhali, with an initial storage capacity of 200,000 tonnes that could eventually expand to 500,000 tonnes. The proposal follows Russia's offer to finance a silo at Moheshkhali and supply wheat to Bangladesh through government-to-government arrangements. Payra was suggested as an alternative because of its port infrastructure, connectivity, and potential to facilitate wheat distribution to key hubs, including Narayanganj and Baghabari in Sirajganj. Bangladesh currently has 10 operational silos, including six wheat silos with a combined capacity of 350,000 tonnes. A site visit has been proposed to assess the project's feasibility, but construction and financing arrangements have not yet been finalised.
- **Georgia Becomes a Key Growth Market for Russian Wheat as Shipments to Major Buyers Decline:** Russia's wheat exports to Georgia reached USD 77.8 million in value in 2026, the highest level since 2020, when imports totalled USD 80.3 million over the comparable period. Georgia has emerged as one of the few markets recording growth as Russian exporters redirect shipments towards neighbouring countries in the Caucasus and Central Asia amid restrictions and logistical disruptions. Meanwhile, Russian wheat shipments to Türkiye have fallen nearly eightfold and those to Egypt 7.3-fold. In October 2026, Russian grain was shipped to just 15 countries, compared with 29 a year earlier, highlighting the contraction in export destinations amid continuing Black Sea shipping constraints.
