Domestic News

- **Rice prices are mixed across most markets. The Delhi (Basmati) market price is quoted at ₹1,09,000/Tonne.**
- **India's Basmati Rice Yield Expected to Rise 5–10% in 2026:** India's basmati rice yield is expected to increase by 5–10% year-on-year in 2026, supported by favourable monsoon conditions and subsequent rainfall that improved crop growth. Higher yields could increase export availability and support supplies to international markets. Demand for Indian basmati is also expected to grow, supported by the expanding popularity of Indian cuisine in Europe, the United States and other markets. India remains a major global basmati producer and exporter, with the crop contributing significantly to agricultural export earnings.
- **Telangana's Slow Paddy Procurement Raises Concerns Over Rice Stocks and Fine Rice Prices:** Telangana has opened fewer than 2,000 of its 8,283 planned paddy procurement centres as of late October 2026, raising concerns over its target of procuring 6.5 MMT and maintaining a 14-month foodgrain buffer. Private buyers are offering ₹3,100–₹3,700 per quintal for fine paddy varieties, while the Jai Sriram variety reportedly reached ₹5,016 per quintal in Mahabubabad district. The state requires around 238,000 tonnes of fine rice monthly for public distribution and welfare schemes. Available stocks of 964,000 tonnes, together with 1.8 MMT of pending customs-cleared rice deliveries, are projected to cover requirements until September 2027. However, continued procurement delays and competition from private buyers could tighten supplies and increase fine rice prices. (Source: Telangana Today)
- **Superfine Rice Prices Surge to ₹75–₹90/kg in Tamil Nadu Amid Supply Shortages:** Superfine rice prices in Tamil Nadu have risen by around ₹25/kg in recent months, reaching ₹75–₹90/kg ahead of Deepavali. Lower crop yields in Andhra Pradesh, Karnataka and Telangana have tightened supplies of popular BPT and RNR varieties. These neighbouring states traditionally account for around 80% of Tamil Nadu's superfine rice supplies, while cultivation within Tamil Nadu is limited to a few districts due to high water requirements and specific climatic conditions. The reported supply decline, attributed partly to El Niño-related weather impacts, has increased pressure on prices during the festival season. (Source: Deccan Herald)
- **India's Basmati Exports Reach Record 6.1 MMT, but Quality and Traceability Remain Key to Global Trust:** India exported a record 6.1 MMT of basmati rice worth USD 5.9 billion in FY 2024–25, with volumes rising 15.7% year-on-year, strengthening its position as the world's leading basmati exporter. Saudi Arabia, Iraq, Iran, Yemen and the UAE together accounted for over 61% of exports, highlighting both strong demand and concentration risk. However, stricter pesticide-residue requirements in the European Union and growing buyer expectations are increasing the importance of food safety, farm-to-mill traceability, consistent quality and reliable delivery. Improved testing, documentation and faster complaint resolution across the supply chain could help Indian exporters strengthen buyer confidence and expand access to premium markets.
- **OMC Ethanol Tender Raises Concerns Over Maize-Rice Feedstock Balance in India:** India's Grain Ethanol Manufacturers Association (GEMA) has urged the government and oil marketing companies (OMCs) to review ethanol procurement prices and allocation norms for Ethanol Supply Year (ESY) 2026–27, citing concerns over competitiveness between maize- and rice-based producers. The tender sets ethanol prices at ₹60.32/litre for surplus foodgrains, capped at 10.8 billion litres for the first three quarters, ₹64/litre for damaged foodgrains and ₹66/litre for maize-based ethanol, with an additional ₹2.79/litre. Supplies from sugarcane juice, sugar syrup and B-heavy molasses are excluded, while C-heavy molasses-based ethanol remains eligible. Industry estimates put damaged-foodgrain ethanol allocation at around 600 million litres in ESY 2025–26, with manufacturers expecting it to exceed 7 billion litres in 2026–27. GEMA has called for pricing and allocation rules that reflect feedstock costs and provide greater clarity to ensure balanced demand across maize and rice.

International News

- **Rough Rice CBOT (Nov 26) closed at 17.5 USD/CWT, up by 10 cents;**
- **Pakistan and Qatar Explore Rice Supply Deal and Wider Agricultural Investment:** Pakistan and Qatar reviewed opportunities to expand bilateral trade and investment during their Joint Task Force meeting in Doha on October 24, 2026. Food security discussions included a proposed rice supply agreement between Pakistan's Trading Corporation and Qatar's Hassad Food, which is awaiting approval from Pakistan's federal cabinet. Pakistan also invited Qatari investment in modern agriculture, grain silos, cold storage and supply-chain infrastructure. Both countries agreed to advance technical working groups to identify investment opportunities and address outstanding trade issues.
- **Indonesia's Farmers Accelerate Rice Planting Ahead of Forecast Super El Niño:** Farmers in Aceh Besar, Aceh Province, Indonesia, are advancing rice planting to secure supplies ahead of a forecast strong El Niño expected to peak from November 2026 into early 2027. The weather phenomenon raises concerns over extreme drought, reduced water availability, and potential disruption to the upcoming planting season. Accelerated planting is aimed at establishing crops before drier conditions intensify, although the impact on production will depend on rainfall patterns and water availability in the coming months.
