Domestic News

- **Rice prices are mixed across most markets. The Delhi (Basmati) market price is quoted at ₹1,09,000/Tonne.**
- **India's Rice Sowing Area Falls 52.1% Below Last Year as of October 23:** India's reported rice sowing area stood at 102.2 thousand hectares as of October 23, 2026, down 52.1% from 213.1 thousand hectares a year earlier. Tamil Nadu recorded the largest area among the listed states at 73.0 thousand hectares, compared with 172.3 thousand hectares last year, marking a 57.6% decline. Andhra Pradesh reported 5.3 thousand hectares, down 24.3%, while Kerala's area fell 21.4% to 11.0 thousand hectares. Meghalaya and Mizoram recorded declines of 19.6% and 51.5%, respectively, while Puducherry's area decreased 38.9% to 3.7 thousand hectares. Goa reported no current-year sowing against 6.0 thousand hectares last year.
- **Jharkhand Sets ₹109/Quintal Paddy Bonus and Targets 400,000 Tonnes of Procurement in 2026–27:** Jharkhand has announced a bonus of ₹109 per quintal over the Centre's minimum support price (MSP) for paddy farmers in the 2026–27 Kharif season, up from ₹81/quintal in 2025–26. With the central MSP at ₹2,441/quintal for common paddy and ₹2,461/quintal for Grade A, farmers would receive ₹2,550 and ₹2,570/quintal, respectively. The state has set a procurement target of 400,000 tonnes, down 20 lakh quintals from the previous season, with ₹43.6 crore estimated for bonus payments, subject to approval by the Scheme Authorised Committee. The government also plans to restrict paddy inflows from neighbouring states to ensure procurement benefits for local farmers.
- **Paddy Procurement and Lifting Delays Create Storage Pressure in Haryana's Jind and Kaithal Mandis:** Haryana's Jind district recorded paddy arrivals of 192,000 tonnes from 24,749 farmers, of which 124,000 tonnes had been procured but only 89,200 tonnes lifted, leaving purchased stocks accumulated in mandis. Around ₹178 crore has been paid to farmers, while slower lifting is affecting payment timelines. In Jind, the district administration expects 80% of lifting to be completed within a week. In Kaithal's Rajound mandi, cumulative arrivals reached 12,397 tonnes, and procurement totalled 11,551 tonnes, but only 5,860 tonnes had been lifted, leaving 5,691 tonnes awaiting lifting. Delays are tightening market space and could complicate handling of further arrivals unless transportation and lifting operations accelerate. (Source: Amar Ujala)

International News

- **Rough Rice CBOT (Nov 26) closed at 17.1 USD/CWT, down by 40 cents;**
- **Philippines' Rice Stocks Fall 8% as El Niño Raises Regional Supply Risks:** The Philippines' rice stocks declined 8.0% year-on-year to 1.91 MMT as of September 1, 2026, down 12.4% from August, while inventories held by the National Food Authority fell 36.1%. Rice imports increased 20.1% year-on-year to 4.07 MMT as of October 1, led by Vietnam at 2.73 MMT, Thailand at 552,700 tonnes and Myanmar at 418,900 tonnes. A forecast strong El Niño threatens rice production across Southeast Asia, raising concerns over tighter regional supplies and higher prices, particularly as the Philippines imports around one-third of its rice requirements. However, India's record rice stocks could help limit global price pressures and reduce the risk of export restrictions similar to those that contributed to the 2023–24 price spike.
- **Japan Considers Buying Back an Additional 100,000 Tonnes of Rice as Inventories Rise:** Japan's agriculture ministry is considering buying back around 100,000 tonnes of government-stockpiled rice released in 2025, potentially in early 2027, amid excess private inventories. The government has released approximately 590,000 tonnes from its reserves since March 2024 and began procedures in September to buy back 210,000 tonnes. The proposed additional purchase is intended to replenish public reserves without creating supply shortages. The ministry is also considering a non-binding production guideline of 6.9 MMT for table rice in 2027, down from an estimated 7.4 MMT harvest in 2026. Farmers may be encouraged to shift acreage towards feed and processing rice to address supply-demand imbalances and manage market inventories.
- **Thailand's Agricultural Exports Fall 1.9% in January–September 2026 as Rice and Sugar Shipments Decline:** Thailand's agricultural and agro-industrial exports declined 1.9% year-on-year to USD 39.9 billion in January–September 2026, despite a 2.5% increase in September. Rice exports fell 16.6% to USD 3.0 billion, reflecting high production costs and strong international competition. Thailand's overall exports rose 19.6% to USD 304.6 billion during the nine-month period, driven largely by electronics and industrial goods, with full-year export growth projected at 15–16%.
