Executive Summary

- **At Indore, soybean seed prices were quoted at ₹72,174/tonne, up by ₹623. Soybean meal prices rose by ₹250 to ₹59,250/tonne, while soybean oil prices declined by ₹480 to ₹144,000/tonne. Soymeal (Hypro) prices increased by ₹250 to ₹64,250/tonne.**
- **India's Soybean Output Seen Falling 2.1% to 10.8 MMT in Kharif 2026.**
- **On Tuesday, 20th October, CBOT soybean futures for November 2026 delivery were quoted at 1,247.4 cents per bushel, down by 5.6 cents, indicating weakness in soybean prices. Soybean meal futures for December 2026 delivery declined by USD 6.1 to USD 348.3 per short tonne, while soybean oil futures edged up by 0.01 cents to 66.7 cents per pound.**
- **U.S. Soybean Harvest Reaches 64%, Nears Five-Year Average.**
- **US Soybean Meal Exports Forecast to Rise 11% to Record 20.6 MMT in 2026/27.**
- **Brazil Soybean Planting Advances at Record Pace, but Rainfall Risks Persist.**

Domestic News

- **At Indore, soybean seed prices were quoted at ₹72,174/tonne, up by ₹623. Soybean meal prices rose by ₹250 to ₹59,250/tonne, while soybean oil prices declined by ₹480 to ₹144,000/tonne. Soymeal (Hypro) prices increased by ₹250 to ₹64,250/tonne.**
- **India's Soybean Output Seen Falling 2.1% to 10.8 MMT in Kharif 2026:** India's soybean production is projected at 10.8 MMT in Kharif 2026, down 2.1% from 11.0 MMT in the previous season, according to the Soybean Processors Association of India (SOPA). Prolonged dry spells and moisture deficiency in Maharashtra, Karnataka and Telangana damaged crops across 7.8 lakh hectares, with 7.0 lakh hectares reportedly completely destroyed. Higher production in Madhya Pradesh and Rajasthan is expected to offset much of the losses. Madhya Pradesh output is estimated to rise 32.2% to 5.7 MMT, while Maharashtra production is forecast to fall 33.2% to 3.5 MMT; Rajasthan output is expected to increase 48.2% to 0.9 MMT. Soybean sowing area increased nearly 5% year-on-year to 117.7 lakh hectares, but the harvested area declined to 110.0 lakh hectares due to drought-related crop damage. The average yield is estimated at 981 kg per hectare, marginally below 983 kg per hectare in the previous season.

International News

- **On Tuesday, 20th October, CBOT soybean futures for November 2026 delivery were quoted at 1,247.4 cents per bushel, down by 5.6 cents, indicating weakness in soybean prices. Soybean meal futures for December 2026 delivery declined by USD 6.1 to USD 348.3 per short tonne, while soybean oil futures edged up by 0.01 cents to 66.7 cents per pound.**
- **U.S. Soybean Harvest Reaches 64%, Nears Five-Year Average:** Soybean harvesting across major U.S. producing states reached 64% of acreage as of October 18, 2026, up 18 percentage points from the previous week's 46% and just one percentage point below the 2021–2025 average of 65%. Louisiana led progress at 97%, followed by Arkansas at 87%, Minnesota at 82%, North Dakota at 79% and South Dakota at 78%. Harvesting was ahead of historical averages in Arkansas, Kentucky and Tennessee, while major producing states including Iowa, Nebraska, Ohio and Kansas remained behind their usual pace. Iowa had harvested 57% of its soybean acreage against a five-year average of 74%, while Nebraska stood at 52% compared with 71%. Despite rapid weekly progress, Minnesota remained six percentage points below its historical average of 82%, indicating uneven harvesting progress across the country.
- **US Soybean Meal Exports Forecast to Rise 11% to Record 20.6 MMT in 2026/27:** The US Department of Agriculture's October report projects US soybean meal exports to increase 11% year-on-year to a record 20.6 MMT in marketing year 2026/27, supported by stronger global feed demand, competitive prices and expanding domestic processing capacity. US soybean meal production is forecast to rise 5% as a larger soybean harvest and increased crushing boost supplies. Export sales reached 5.1 MMT as of October 1, exceeding the level recorded during the same period last season. The Philippines remains the largest buyer, with its soybean meal imports projected to increase 10% to 3.9 MMT, driven by poultry industry growth; outstanding US sales to the country were 118,000 tonnes above the five-year average. Mexico, the second-largest market, also recorded outstanding sales 147,000 tonnes above its five-year average, while Canada, Colombia and Vietnam remain key destinations. Strong early-season sales and expanding US supplies are expected to support record exports in 2026/27.
- **Brazil Soybean Planting Advances at Record Pace, but Rainfall Risks Persist:** Brazilian soybean planting is progressing well ahead of schedule, with consultancy Veeries reporting record early sowing in Mato Grosso. However, sparse October rainfall across central Brazil has raised concerns about moisture availability for crop establishment and early development. Rain is expected following a weather front this week, but precipitation is forecast to become limited again next week. The frequency and distribution of rainfall will be critical to monitor as the crop develops toward the December pod-filling stage, when adequate moisture is essential for yield potential.
