Pulses Daily Digest

24 April 2026

Key Updates

- **Yellow Pea Imports Fall 50% in Apr–Feb on Lower Demand & Policy Impact:** India's yellow pea imports declined sharply by 50% to 10,58,289 tonnes during April 2025 to February 2026, compared to 21,06,850 tonnes in the same period last year. The drop reflects lower import demand and the impact of policy measures, including import duties. Canada remained the dominant supplier with 8,22,628 tonnes, followed by Russia at 1,90,490 tonnes, while Argentina and other origins contributed limited volumes. Monthly data shows peak arrivals during October–November, with imports moderating significantly in early 2026. The sharp decline indicates improved domestic availability and controlled imports, which may support price stability in the domestic market going forward.
- **Masoor Imports Decline 7% to 9,75,759 Tonnes in Apr–Feb:** India's masoor imports declined by 7% to 9,75,759 tonnes during April 2025–February 2026, compared to 10,46,434 tonnes in the same period last year, indicating relatively stable but slightly lower import demand. Australia remained the largest supplier with 4,81,020 tonnes, followed closely by Canada at 4,53,962 tonnes, while Russia, the USA and other origins contributed smaller volumes. Import activity picked up strongly in the later months, especially from November to February. Despite the marginal decline, steady imports and low domestic arrivals suggest tight supply conditions in the market. Going ahead, lower production and firm global prices may continue to support masoor prices in the domestic market.
- **Chana Imports Drop 35% in Apr–Feb Period on Lower Demand & Higher Domestic Availability:** India's chana imports declined sharply by 35% to 8,14,447 tonnes during April 2025 to February 2026, compared to 12,44,787 tonnes in the same period last year. The fall reflects improved domestic availability and reduced import dependence during the current season. Australia remained the largest supplier with 6,47,744 tonnes, followed by Tanzania at 1,62,236 tonnes, while imports from Myanmar and other origins remained minimal. Monthly trends show peak arrivals during December and January, after which imports slowed significantly. The decline in imports indicates better domestic production and sufficient stock levels, which have reduced the need for overseas buying and helped stabilize market supply.
- **Urad Imports Rise 31% in Apr–Feb Period on Supply Gap:** India's urad imports increased by 31% to 9,72,636 tonnes during April 2025 to February 2026, compared to 7,45,043 tonnes in the same period last year, reflecting tight domestic availability and higher reliance on imports. Myanmar remained the dominant supplier with 7,23,785 tonnes, followed by Brazil at 2,25,103 tonnes, while Thailand and other origins contributed smaller volumes. Monthly trends show strong arrivals during October and November, after which imports moderated but remained higher year-on-year. The rise in imports indicates a supply gap in the domestic market, which has been supported through overseas sourcing to stabilize availability and prices.
- **Tur Imports Rise 18% in Apr–Feb Period on Supply Needs:** India's tur imports increased by 18% to 14,01,779 tonnes during April 2025 to February 2026, compared to 11,91,470 tonnes in the same period last year, reflecting continued reliance on imports to meet domestic demand. Mozambique remained the largest supplier with 5,66,090 tonnes, followed by Tanzania at 3,46,802 tonnes and Myanmar at 3,33,300 tonnes, while Malawi and other origins contributed smaller volumes. Monthly data shows strong arrivals during October to December, with imports moderating in early 2026.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on April 17th, India's summer pulses sowing surged to 1547 thousand hectares, compared from 1349 thousand hectares sowed during the corresponding period in last year.
