## Executive Summary

- **Coriander Farming Declines in Rajasthan's Hadoti as Farmers Lose Interest:** In Rajasthan's Hadoti region, the famous aromatic coriander crop — once known for its strong smell and high quality — is disappearing as farmers are losing interest in growing it, with coriander sowing down by about 50 per cent compared with last year, and if this trend continues the distinctive fragrance from the fields may vanish; the crop is delicate and sensitive to weather, and recent above-average rainfall and cold fears discouraged many farmers from sowing it, while government support programmes like an agricultural export zone created in 2005 have remained inactive, even though Hadoti's coriander has high potash levels and superior aroma that buyers from other states and abroad prefer.
- **14,500 Quintals Arrive at Chhabra Mandi; Coriander Prices Reach ₹10,500:** A total of 14,500 quintals of crops arrived at the Chhabra Agricultural Produce Market (Mandi), with farmers bringing maize, wheat, gram (chickpeas), coriander, soybeans and mustard in tractor-trolleys from distant areas for auction. The mandi administration conducted auctions for all commodities one by one, and farmers received average market prices for their produce. Among the crops, coriander was sold at ₹7,801 to ₹10,500 per quintal.
