Key Updates

- **Chennai Pulses Imports at 31,625 Tonnes Led by Tur and Urad:** Pulses imports at Chennai port during 11–17 March 2026 stood at 31,625 tonnes across 1,265 containers, with major arrivals led by Burma tur at 11,800 tonnes and Burma urad at 8,850 tonnes. Additional urad imports came from Brazil (3,450 tonnes) and Thailand (700 tonnes), while masur imports from Canada were recorded at 3,250 tonnes. Other arrivals included Mozambique tur, Brazil brown eye beans and smaller quantities of rajma, chickpeas, cow peas and lima beans. The steady inflow highlights continued import dependence, particularly for tur and urad, to meet domestic demand.
- **India Summer Pulses Sowing Up 18% as of March 20, 2026:** India's summer pulses sowing increased by around 18% to 4.09 lakh hectares as of March 20, 2026, compared to 3.47 lakh hectares in the same period last year. The rise was mainly driven by higher area under moong at 2.57 lakh hectares (up ~18%) and urad at 1.28 lakh hectares (up ~12%), while other pulses also showed strong growth. The increase in acreage reflects favorable conditions and growing farmer interest in summer pulses, which may support production in the coming months.
- **Pulses Prices Trade Below MSP Across Major Commodities:** Mandi prices of key pulses are currently trading below their Minimum Support Price (MSP), indicating weak market conditions and limited farmer realization. Tur is quoted at ₹7,472/quintal, around 6.6% below MSP, while moong is lower by 15.12% at ₹7,442/quintal. Gram prices are down by 12.49% at ₹5,141/quintal, and masur is trading 7.5% below MSP at ₹6,475/quintal. The gap between mandi prices and MSP highlights the need for active procurement support to market prices.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on March 20th, India's summer pulses sowing surged to 409 thousand hectares, compared from 347 thousand hectares sowed during the corresponding period in last year.
