Key Updates

- **Rajasthan; Pulses Production Estimates Show Higher Chana Output, Lower Kharif Pulse Crop:** Rajasthan released its 2025-26 second advance estimates for rabi pulses and third advance estimates for kharif pulses as on May 5, 2026. Rabi pulse production is estimated at 25,12,056 tonnes, up 15.72% from 21,70,790 tonnes last year. Chana production is estimated sharply higher at 24,52,188 tonnes, compared to 21,01,558 tonnes last year, showing an increase of 19.53%. However, masoor production declined to 23,815 tonnes from 27,165 tonnes, while matar output also fell to 36,050 tonnes from 42,067 tonnes. Kharif pulse production is estimated lower at 19,64,095 tonnes, down 2.28% from 20,10,008 tonnes last year. Tur production declined sharply by 47.79% to 1,592 tonnes, while urad output dropped 27.46% to 91,822 tonnes. Moong production remained almost stable at 13,90,197 tonnes, slightly higher than last year's 13,83,621 tonnes.
- **India; PM-Kisan 22nd Installment of ₹18,640 Crore to Benefit 9,32,00,000 Farmers:** Prime Minister Narendra Modi will release the 22nd installment of the PM-Kisan scheme on Friday in Guwahati, Assam, transferring ₹18,640 crore directly into the bank accounts of around 9,32,00,000 farmers across the country. The Union Agriculture Minister stated that India has transformed from a food-deficit nation into a major global agricultural producer due to strong policy support and farmers' contribution. India has now become the world's largest rice producer with output reaching around 15,00,00,000 tonnes, surpassing China. The country's total foodgrain production increased from 25,20,00,000 tonnes in 2014 to 35,70,00,000 tonnes currently, while horticulture production rose from 27,70,00,000 tonnes to 36,90,00,000 tonnes. The government also highlighted growing self-reliance in pulses production, with record procurement of tur, masoor, and urad under MSP operations. Agricultural credit has expanded from ₹8,45,000 crore in 2014 to ₹28,69,000 crore, while crop insurance claim payments of nearly ₹2,00,000 crore have been transferred to farmers under the crop insurance scheme.
- **Canada; Cold Spring Slows Alberta Pulse Seeding Progress:** Cold temperatures and delayed field conditions are slowing seeding progress across Alberta, impacting pulse crops including peas, lentils, and chickpeas. Durum and pulse crops are leading early planting activity in southern Alberta, but overall seeding pace remains below normal due to cool weather and wet soil conditions. Market reports indicate chickpeas are nearly one-third seeded in some southern regions, while pea and lentil planting has also started gradually. However, unseasonably cold temperatures, snow, and excess moisture in several areas have delayed field operations and slowed crop emergence. Analysts believe improved weather conditions during the second half of May will be crucial for accelerating pulse seeding across Alberta and supporting crop development ahead of the 2026-27 growing season.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on May 1st, India's summer pulses sowing surged to 2349 thousand hectares, compared from 2279 thousand hectares sowed during the corresponding period in last year.
