Pulses Daily Digest

14 May 2026

Key Updates

- **India (Punjab); Punjab Pushes Crop Diversification Through Pulses and Oilseeds:** Punjab Chief Minister met the Union Agriculture Minister in New Delhi to discuss key agricultural challenges facing the state and emphasized the need for crop diversification through pulses, oilseeds, maize, sunflower, and bajra cultivation. During the meeting, the Union Agriculture Minister assured that the central government would continue supporting Punjab farmers through initiatives such as the Pulse Mission, Oilseed Mission, Cotton Mission, and horticulture development programs. A special committee will also be formed to examine issues related to hybrid paddy seeds and procurement operations.
- **India Raises MSP for Kharif Pulses for 2026-27 Marketing Season:** The Union Cabinet has approved higher Minimum Support Prices (MSP) for kharif pulses for the 2026-27 marketing season, aiming to encourage pulse production and strengthen farmer returns ahead of the upcoming sowing season. Tur MSP has been increased sharply by ₹450 to ₹8,450 per quintal from ₹8,000 last year. Urad MSP has been raised by ₹400 to ₹8,200 per quintal, while moong MSP witnessed a marginal increase of ₹12, taking it to ₹8,780 per quintal. The higher MSP support reflects the government's continued focus on achieving self-reliance in pulses and reducing import dependence. Market participants believe the stronger increase in tur and urad MSP may encourage farmers to expand acreage during the upcoming kharif season, especially amid concerns over weather risks linked to a possible El Niño.
- **India; Above-Normal Pre-Monsoon Rainfall Supports Summer Pulses:** India received cumulative pre-monsoon rainfall of 96 mm during March 1–May 13, 2026, against the normal 92.1 mm, remaining 4% above the Long Period Average (LPA), according to IMD. Central India recorded rainfall 32% above normal, while East & Northeast India stayed 9% above normal. The improved rainfall is supportive for summer moong and urad crops in key producing states such as Madhya Pradesh, Uttar Pradesh, Gujarat and Maharashtra by improving soil moisture and reducing heat stress. However, unseasonal rain, thunderstorms and hailstorm activity in some regions may delay harvesting and affect crop quality in pockets.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on May 8th, India's summer pulses sowing surged to 2497 thousand hectares, compared from 2376 thousand hectares sowed during the corresponding period in last year.
