Pulses Daily Digest

13 May 2026

Key Updates

- **India Raises MSP for Kharif Pulses for 2026-27 Marketing Season:** The Union Cabinet has approved higher Minimum Support Prices (MSP) for kharif pulses for the 2026-27 marketing season, aiming to encourage pulse production and strengthen farmer returns ahead of the upcoming sowing season. Tur MSP has been increased sharply by ₹450 to ₹8,450 per quintal from ₹8,000 last year. Urad MSP has been raised by ₹400 to ₹8,200 per quintal, while moong MSP witnessed a marginal increase of ₹12, taking it to ₹8,780 per quintal. The higher MSP support reflects the government's continued focus on achieving self-reliance in pulses and reducing import dependence. Market participants believe the stronger increase in tur and urad MSP may encourage farmers to expand acreage during the upcoming kharif season, especially amid concerns over weather risks linked to a possible El Niño.
- **Tamil Nadu; Coimbatore Issues Heatwave Advisory for Pulse Farmers:** The Coimbatore district administration in Tamil Nadu has advised farmers to avoid fresh sowing during the ongoing heatwave as rising temperatures may impact crop growth and reduce yields. Pulses, along with maize, sesame, and groundnut crops, are considered vulnerable to heat stress under current weather conditions. Farmers were advised to avoid field work during peak afternoon hours and carry out irrigation only during early morning or evening periods to reduce moisture loss. The administration also recommended drip and sprinkler irrigation systems, mulching, and shade-net usage to conserve soil moisture and protect crops from extreme heat.
- **USA; Global Pulse Industry Sees Strong Export Opportunities at Pulses 26 Conference:** Global pulse industry leaders gathered in Orlando, Florida during the Pulses 26 conference to discuss rising export demand, quality standards, and future growth opportunities in the pulse sector. The event, hosted by the Global Pulses Confederation, brought together growers, exporters, processors, logistics companies, and international buyers from across the world. Industry representatives highlighted that export markets remain critical for U.S. pulse growers, particularly for peas, lentils, and chickpeas. Buyers focused strongly on product quality, consistency, and traceability, which continue to support the reputation of U.S.-grown pulses in international markets. The conference also emphasized the agronomic benefits of pulses, including natural nitrogen fixation and lower fertilizer requirements, which are becoming increasingly important amid rising fertilizer costs. Industry participants believe growing global demand and stronger trade relationships will continue creating long-term opportunities for pulse exports.

Pulses Sowing Update

According to the Ministry of Agriculture & Farmers Welfare's latest release on May 8th, India's summer pulses sowing surged to 2497 thousand hectares, compared from 2376 thousand hectares sowed during the corresponding period in last year.
